

# ECOLOGY & EVOLUTION

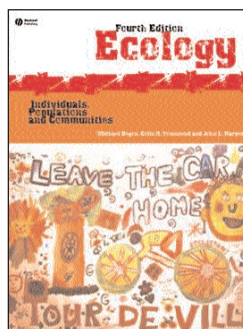

£27.99      1993      0632035463  
Looks at the influence of natural selection on behaviour.

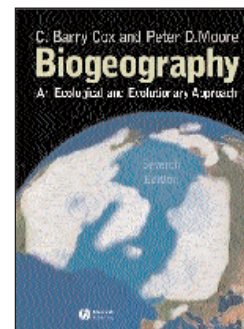

£29.99      2004      1405111135  
This established and popular textbook is the definitive guide to the study of insects.

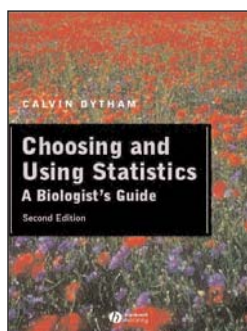

£34.99      2004      1405107243  
Offer a fresh approach to physiology, integrating comparative and environmental aspects.

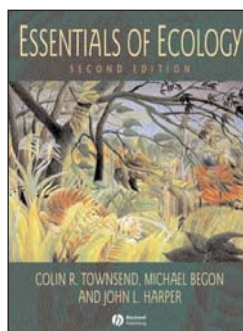

£32.50      2005      1405111178  
The leading textbook in its field.

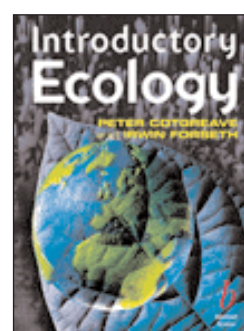

£32.95      2005      1405118989  
Offers excellent insight into the multi-disciplinary nature of biogeography, providing the student with a sound historical base, and a clear explanation of current controversies.

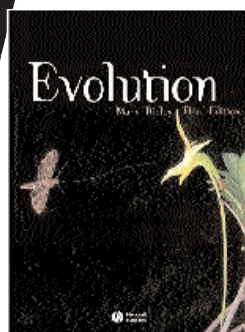

£22.99      2003      1405102438  
Updated to cover the very latest versions of the computer packages described.

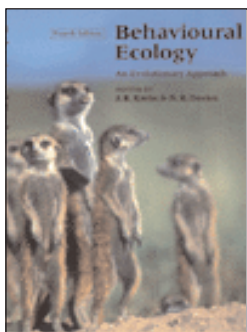

£29.99      2002      1405103280  
An accessible, state-of-the-art format designed to cultivate the understanding of the natural world.

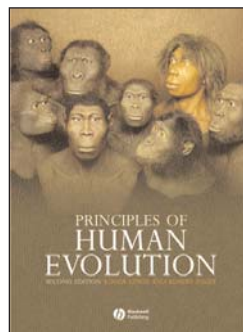

£21.99      2002      0632042273  
A core introductory text which examines basic principles of ecology.

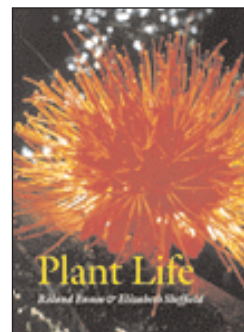

£27.50      2003      1405103450  
The premier undergraduate text in the study of evolution.

£32.99      1997      0865427313  
The latest edition of a classic in behavioural ecology.

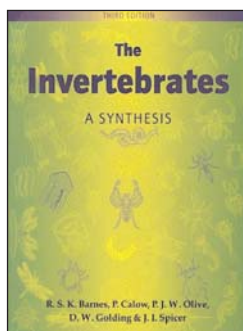

£29.99      2003      0632047046  
An in-depth introduction to paleoanthropology and the study of human evolution.

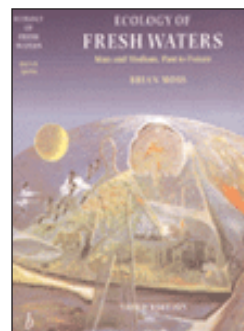

£24.99      2000      0865427372  
Makes sense of the bewildering diversity of plants.

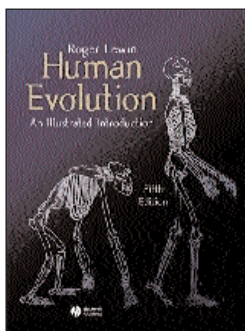

# ECOLOGY & EVOLUTION

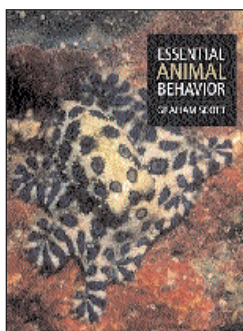

£32.50      2001      0632047615  
The first and only textbook to integrate both approaches and thus meet the modern teaching needs of the subject.

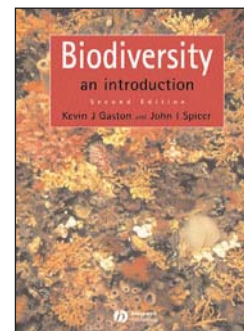

£29.99      1998      0632035129  
A comprehensive and stimulating introduction to rivers, lakes and wetlands.

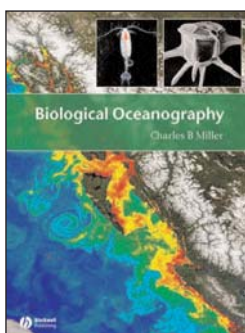

£19.99      2004      1405103787  
Thoroughly updated to include coverage of the latest discoveries and perspectives

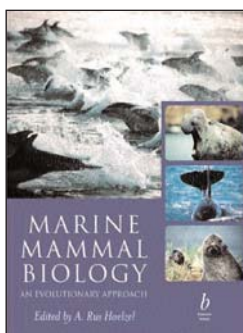

£22.99      2004      0632057998  
A comprehensive introduction to all areas of the subject

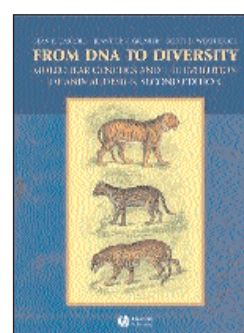

£19.99      2003      1405118571  
A short and simple introduction to biodiversity.

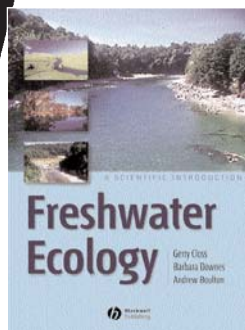

£29.99      2003      0632055367  
A comprehensive, up-to-date introduction to many aspects of ocean ecology.

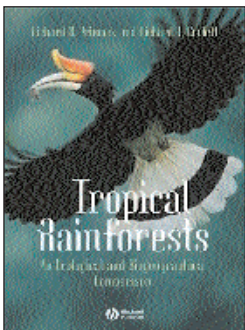

£29.95      2002      0632052325  
A general introduction to the biology of marine mammals, and an overview of the adaptations that have permitted mammals to succeed in the marine environment.

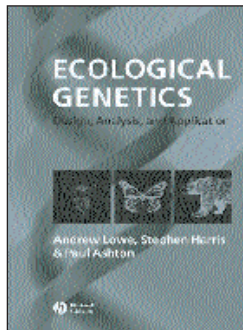

£32.50      2004      1405119500  
Presents the general principles of the genetic basis of morphological change through a synthesis of evolutionary biology with genetics and embryology.

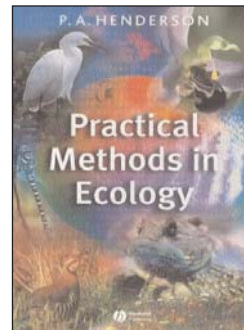

£27.50      2003      063205266X  
The only freshwater ecology textbook that is specifically aimed at an introductory level.

£39.99      2004      0632045132  
This accessible book examines rain forests in different tropical regions emphasizing their unique characteristics and ecology.

£29.99      2004      1405100338  
Addresses the fundamental problems of which of the many molecular markers should be used and how the resulting data should be analysed in clear, accessible language.

£19.99      2003      1405102446  
An introductory manual of methods used by ecologists to collect and analyze data.
