NOTES FOR AUTHORS

1. Mission and Objectives Transactions in GIS aims to publish original research articles, review articles, guest editorials, short technical notes, and book reviews on the evolving science, technology, and application of Geographic Information Systems. Within this broad remit, we recognize four interconnected themes as follows:

- practical and theoretical issues influencing the development of GIS
- the collection, analysis, modelling, interpretation and display of spatial data within GIS
- the connections between GIS and related technologies
- new GIS applications that help to solve problems affecting the natural, built, social and/or business environments

The journal will not knowingly publish papers that have appeared in conference proceedings and elsewhere in the same or substantially the same form.

2. Refereeing All papers will be submitted to three referees for their opinions. The names of referees shall be confidential to the editors. The editors will have ultimate responsibility for accepting papers.

3. Presentation of manuscripts Three hard copies of the manuscript and illustrations should be submitted, typed in double line spacing, on A4 or 8.5 x 11 inch paper, on one side only, with a margin of at least 3 cm all round. Manuscripts should be presented in English. The SI system should be used. Pages should be numbered, and the following layout should be observed

- Title page.* This should contain the title, names and affiliations of all authors, four or five key words for indexing purposes, and a short title for the running head.
- Abstract page.* The title should be repeated at the top of this page and an abstract of 200 words or less should follow.
- Main text.* The main text of the article should follow with numbered sections and subsections. Length of papers should not exceed 6,000 words without the prior approval of one of the editors.
- Equations.* All equations in an article should be numbered as (1), (2), etc. near the right-hand margin on the same line as the equation itself.
- Footnotes.* The use of footnotes should be avoided and endnotes will only be allowed in special circumstances.
- Appendices.* These should be used sparingly and placed between the main text and references.
- Acknowledgements.* These should be placed on a separate page between the main text and references.
- Tables.* Tables should be numbered and referred to in the main text. Each table should start with a caption and appear on a separate sheet in the manuscript.
- Illustrations.* Maps, photographs, and other diagrams should be supplied at a size suitable for reduction to widths of 70 or 149 mm. Illustrations can be submitted in black and white or colour although the final copies will be published in black and white unless otherwise agreed with the main editor. Authors should submit a list of illustration numbers and captions on a separate sheet of paper. Individual maps and diagrams should be numbered accordingly and each one produced on a separate sheet of paper.
- References.* These should be supplied using the author/date system. References should be cited in the text as either (Date 1986), (Cosyn and Paniconi 1996) or (Abel et al 1994) and listed in alphabetical order of author and chronological order by author (oldest first) in the reference section. Titles of books, periodicals, conference proceedings, and publishers should be supplied in full and not abbreviated. References to material published on the Internet should give the full Universal Resource Locator (URL). Some examples of commonly cited reference formats are:

4. Copyright material

Written permission to use copyrighted material (text, tables, and illustrations) must be obtained from the original copyright holders and submitted with the manuscript.

5. Submission

Authors based in Africa, Europe, and the Middle East should send their manuscripts to Dr A Stewart Fotheringham. Authors living in Asia and the South Pacific should send their manuscripts to Dr Gary J. Hunter. All other manuscripts, including book reviews, should be sent to Dr John P Wilson. The editor's addresses are listed on the title page. Authors should keep a copy of their manuscripts. The publishers accept no responsibility for manuscripts lost in the post.

6. Publication

Final submission of the manuscript should comprise digital and paper copies of text, tables, maps, and other diagrams. Digital files should use Word (97 or higher) or WordPerfect (version 8 or higher) for text and CMYK separated EPS or TIFF formats for maps and other diagrams. The corresponding author will be asked to transfer copyright in the article to the publishers when they return the digital and paper copies of the final manuscript.

7. Proofs and offprints

The corresponding author will be sent proofs for checking. These should be returned promptly and within 48 hours to the main editor. Five copies of the journal issue in which the paper is published will be supplied free of charge. Additional offprints may be ordered by completing a form that is supplied with the proofs. There are no page charges.
