Risk Analysis provides a focal point for new developments in risk analysis for scientists from a wide range of disciplines. The analysis of risks is increasingly viewed as a field in itself, and the demand for a more orderly and formal treatment of risks is great. Risk Analysis is designed to meet these needs of organization, integration, and communication. The journal covers topics of great interest to regulators, researchers, and scientific administrators. It deals with health, environmental, engineering, mathematical and theoretical aspects of risks, and social and psychological aspects of risks such as risk perception, acceptability, economics, and ethics. All scientific articles in Risk Analysis are fully peer reviewed.

Official Journal of the Society for Risk Analysis: Society members should direct all correspondence, such as changes of address, to Society for Risk Analysis, 1313 Dolly Madison Boulevard, Suite 402, McLean, Virginia 22101. Telephone: (703) 790-1745; fax: (703) 790-2627; e-mail: SRA@BurkInc.com. Statements and opinions expressed in publications of the Society for Risk Analysis or in presentations given during its regular meetings are those of the author(s) and do not necessarily reflect the official position of the Society for Risk Analysis, the editor(s), or the organizations with which the authors are affiliated. RISK ANALYSIS: An International Journal (ISSN: 0272-4332) is published six times per year in February, April, June, August, October, and December by Blackwell Publishers, Inc., with offices at 350 Main Street, Malden, MA 02148, USA, and 108 Cowley Road, Oxford OX4 1JF, UK. Call U.S. 1-800-835-6770, 1-781-388-8200; fax: 781-388-8232; or e-mail: subscib@blackwellpub.com.

INFORMATION FOR SUBSCRIBERS: For new orders, renewals, sample copy requests, claims, change of address and all other subscription correspondence, please contact the Journals Department at the publisher’s Malden office.

INSTITUTIONAL SUBSCRIPTION RATES FOR VOLUME 21, 2001: Institutions: the Americas, $643; rest of world, £500. Members of the Society for Risk Analysis receive the journal as part of their membership dues. All orders must be paid by credit card, business check, or money order. Checks and money orders should be made payable to Blackwell Publishers. Canadian institutions please add 7% GST. Please visit the SRA website at http://www.sra.org or the Blackwell website at http://www.blackwellpub.com for more information.

BACK ISSUES: Back issues from the current and previous two volumes are available from the publisher’s Malden office at the current single issue rate.

MICROFORM: The journal is available on Microfilm. For microfilm service, address inquiries to University Microfilms International, 300 North Zeeb Road, Ann Arbor, MI 48106-1346, USA.

ADVERTISING: For information and rates please contact Publishers Communication Group, Phone: 617-395-4055; fax: 617-354-6875, or e-mail: sabine.mourlon@pcgplus.com.

COPYRIGHT: All rights reserved. Reproduction, storage, or transmission of this work in any form or by any means beyond that permitted by Sections 107 and 108 of the U.S. Copyright Law is unlawful without prior permission in writing of the Publisher, or in accordance with the terms of licences issued by the Copyright Clearance Center (CCC) and other organizations authorized by the publisher to administer reprographic reproduction rights. Please note, however, that all institutions with a paid subscription to this journal may make photocopies for teaching purposes free of charge provided such copies are not resold. For educational photocopying requests that do not originate from an institution with a paid subscription, please contact the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, phone: 978-750-8400, fax: 978-750-4470. For all other permissions inquiries, including requests to republish material in another book, please contact the Journals Permission Manager at the publisher’s Oxford office, 108 Cowley Road, Oxford, OX4 1JF, U.K., tel.: +44 1865 791100; fax: +44 1865 791347.

Finally! Software for Dose-Response Modeling, Benchmark Dose Estimation and Risk Assessment

If your work involves testing the safety of chemical or environmental agents, assuring the efficacy of pharmaceutical agents, analyzing and fitting curves to dose-response data, or computing benchmark doses, then you need ToxTools. ToxTools gives you previously unavailable, easy-to-use procedures designed specifically for these toxicological problems.

ToxTools lets you choose from a rich class of easy-to-fit dose-response models:
- Probit
- Weibull
- Multistage
- Logit
- Linear, polynomial and power regression

All ToxTools procedures can accommodate clustered data as well as independent observations; ToxTools also offers several specialized models designed specifically for developmental toxicity analysis.

ToxTools provides significance tests for trend, and pairwise tests:
- Correlated and uncorrelated data
- Binary and continuous data
- Both large sample (asymptotic) and small sample (exact) methods

ToxTools lets you model joint continuous and binary outcomes — for example, weight and malformation outcomes among live animals in developmental toxicity testing.

ToxTools fully integrates quantitative risk estimation with dose-response modeling, letting you estimate risk and predict Benchmark Dose levels using fitted dose-response models:
- Binary or continuous outcomes
- Multivariate risk estimation

“‘ToxTools may provide one of the most accessible set of tools for deriving risk estimates for clustered toxicology data.’ — John Bailar. Dept. of Mathematics and Statistics, Miami University, and co-author of Statistics for Environmental Biology and Toxicology.”

THE MILBANK QUARTERLY
A JOURNAL OF PUBLIC HEALTH AND HEALTH CARE POLICY

PUBLISHED ON BEHALF OF THE MILBANK MEMORIAL FUND

Edited by BRADFORD H. GRAY

The Milbank Quarterly is devoted to scholarly analysis of significant issues in health and health care policy. It presents original research, policy analysis, and commentary from academics, clinicians, and policy makers. The in-depth, multidisciplinary approach of the journal permits contributors to explore fully the social origins of health in our society and to examine in detail the implications of different health policies. Topics addressed in The Milbank Quarterly include the impact of social factors on health, prevention, allocation of health care resources, legal and ethical issues in health policy, hospital administration, and the organization and financing of health care.

ISSN: 0887-378X. VOLUME 79 (2001) CONTAINS 4 ISSUES.
