EDITORIAL STATEMENT

The Australian Journal of Politics and History aims to publish scholarly research and writing of the highest quality. Because the journal reaches a wide and diverse audience, contributors must address a significant research problem, which would be of general interest to those working in the fields of history, political studies, and international affairs. Preference will be given to papers on the politics and history of Australia and modern Europe, intellectual history, political theory, and the history of political thought. The journal will also publish articles in the fields of international politics, Australian foreign policy, and Australia’s relations with countries of the Asia-Pacific region. Purely descriptive papers will not be accepted. The editors welcome the contribution of shorter critical notices and research notes, and will endeavour to publish controversies and symposia. The journal invites expressions of interest in producing a single issue on a particular theme or topic of contemporary political and historical interest. Prospective guest editors should submit proposals to the editors.
