THE FOLLOWING LIST INCLUDES CURRENT articles of potential interest to MLJ readers. The list comes from our survey of 104 leading journals that are devoted to foreign and second language learning or related fields such as applied psycholinguistics, curriculum development, educational methodology, educational technology, linguistics, and psychology. Articles on literary topics are not included. Certain journal titles may not appear in a particular listing if no new issue was available to us when our survey was done. For a complete listing of journals, including their Web addresses, if any, readers are referred to the MLJ Web site at http://polyglot.lss.wisc.edu/mlj

Switching languages, switching palabras task”; E. Moreno, K. Federmeier, & M. Kutas, “hemispheric processes in on-line reading sphere: An illusory link?”; J. Coney, “Probing Personal names and the human right hemisphere: An role of the left hemisphere”; A. Landgrebe, B. Mohr, & J.
