Vienna, Austria
The OPEC Review is a quarterly energy journal prepared by the OPEC Secretariat in Vienna. Each issue consists of a selection of original research papers on economic issues affecting the global energy industry and related topics, such as Third World development and the environment. The principal objective of the OPEC Review is to broaden awareness of these issues, enhancing scholarship in universities, research institutes and other centres of learning. The scope is international.

The OPEC Review welcomes submissions from academics and other energy experts. Prospective authors wishing to submit papers should refer to the page entitled “Submissions of papers to the OPEC Review” at the back of each issue. This contains all the relevant details.

All correspondence about subscriptions should be sent to Blackwell Publishers, which publishes and distributes the quarterly journal on behalf of OPEC in March, June, September and December.
OPEC News Agency (OPECNA)

The Agency’s news is gathered from a worldwide network of experienced correspondents and stringers, based not only in Member Countries, but also in other hubs of the world energy industry, including London, Paris, New York and Singapore. An e-mail subscription to OPECNA costs €110 per month for individuals or private users and €292 per month for the media or other subscribers, who wish to re-use OPECNA material for their own transmissions. E-mail is the fastest and most reliable way of receiving OPECNA transmissions. However, if you wish to subscribe to the service, but would prefer to receive it by either fax or regular mail, please contact us, stating your location, and we will contact you with the price details.
Recent issues of the OPEC Review

September 2002
Risk measurement for oil and gas exploration: the marriage of geological and financial techniques — Thomas Stauffer
The prospects for the oil sector in the Iraqi economy after sanctions — Imad Jabir
Energy use and GDP growth, 1950–97 — Rögnvaldur Hannesson
Oil price movements and globalisation: is there a connection? — Robert Looney

June 2002
Oil outlook to 2020 — Rezki Lounnas and Garry Brennand
Short-term forecasting of non-OPEC supply — a statistical analysis — S.M.R. Tayyebi Jazayeri and A. Yahyai
Using non-time-series to determine supply elasticity: how far do prices change the Hubbert curve? — Douglas B. Reynolds
A simple economic analysis of electricity deregulation failure — Ferdinand E. Banks

March 2002
Short-term forecasting of non-OPEC supply: a test of seasonality and seasonal decomposition — S.M.R. Tayyebi Jazayeri and A. Yahyai
Evidence that the terms of petroleum contracts influence the rate of development of oil fields — Mustafa Bakar Muhmud and Alex Russell
Stimulation of investment in international energy through Nigerian tax exemption laws — Uche Jack Osimiri
Energy indicators — OPEC Secretariat

December 2001
Global energy outlook: an oil price scenario analysis — Shokri Ghanem, Rezki Lounnas and Garry Brennand
The hybrid permit cum price ceiling policy proposal: intuition from the prices versus quantities literature — Gary W. Yohe
World oil reserves: problems in definition and estimation — Ghazi M. Haider
A vector autoregressive analysis of an oil-dependent emerging economy — Nigeria — O. Felix Ayadi. Amitava Chatterjee and C. Pat Obi
The closure of European nuclear power plants: a commercial opportunity for the gas-producing countries — Jean-Pierre Pauwels and Carine Swartenbroekx

June 2001
Has the accuracy of energy projections in OECD countries improved since the 1970s? — Jan Bentzen and Hans Linderoth
Oil product consumption in OPEC Member Countries: a comparison of trends and structures — Atmane Dahmani
Oil and macroeconomic fluctuations in Ecuador — François Boye
Energy indicators — OPEC Secretariat

March 2001
Estimating oil product demand in Indonesia using a cointegrating error correction model — Carol Dahl and Kurtubi
The gas dimension in the Iraqi oil industry — Thamir Abbas Ghadhban and Saadallah Al-Fathi
The Russian coal industry in transition: a linear programming application — Bo Jonsson and Patrik Söderholm
The future of gaseous fuels in Hong Kong — Larry Chuen-ho Chow

September 2001
What have we learned from the experience of low oil prices? — A.F. Alhajji
The estimation of risk-premium implicit in oil prices — Jorge Barros Luis
The economics of an efficient reliance of biomass, carbon capture and carbon sequestration in a Kyoto-style emissions control environment — Gary W. Yohe
The geopolitics of natural gas in Asia — Gawdat Bahgat

People requiring copies of these papers, or the issues in which they appear, should contact the Managing Editor, OPEC Review, at the OPEC Secretariat in Vienna.

OPEC Secretariat
The OPEC Review is a quarterly energy journal prepared by the OPEC Secretariat in Vienna. Each issue consists of a selection of original research papers on economic issues affecting the global energy industry and related topics, such as Third World development and the environment. The principal objective of the OPEC Review is to broaden awareness of these issues, enhancing scholarship in universities, research institutes and other centres of learning. The scope is international.

The criteria for publication in the OPEC Review are that the material is the product of research in an area of interest and value to the readership, and that it is presented in an objective and balanced manner. Submission of a paper will be held to imply that it contains original, unpublished work and is not being submitted for publication elsewhere. Manuscripts are evaluated by referees.

Submission should be made to: Editor-in-Chief, OPEC Review, OPEC Secretariat, Obere Donaustrasse 93, 1020 Vienna, Austria (tel. +43 1 211 12; fax. +43 1 214 98 27). Abstracts of up to 150 words should be included. In the covering letter, or on a separate sheet, the following details of the principal author should be given: full name (and, if different, desired name for publication purposes), title, affiliation, full postal address and telephone and fax numbers. Similar details should be provided for all co-authors, although they need not include telephone and fax numbers. Copyright in published papers rests with the OPEC Review; the OPEC Review will not refuse any reasonable request by authors to reproduce their contributions to the journal.

Manuscripts should be written in clear English, typed double-spaced, on one side of the paper only, and not exceed 8,000 words. Tables and figures should carry titles, relate directly to the text and be easily comprehensible. Where possible, camera-ready artwork should be provided for figures. Mathematical expressions should be clearly presented, with equations numbered. Footnotes should be indicated in the text consecutively, with superscript numbers, and should be explained either at the bottom of each page or in a list at the end of the text. Reference citations in the text should be by last name(s) of author(s) and date (for joint authorship of three or more names, the words “et al” should be inserted after the first name); references should be spelt out and listed in alphabetical order at the end of the paper (after the footnote listings). For more details of style, please refer to this or another recent issue of the OPEC Review.

The OPEC Review is prepared using principally Adobe PageMaker on PCs. In addition to their supplying regular hard copies, authors are encouraged to submit their papers by email (prid@opec.org) or on 3 1/2-inch diskette, preferably in a popular word-processing programme, such as Microsoft Word or Corel WordPerfect, backed up in ASCII format if possible. Diskette labels should contain the title of the paper (abbreviated, if necessary), the principal author's name, the software used and the date of submission.

Fifteen free offprints of each published paper, as well as one complimentary copy per author of the issue containing the paper, will be sent to principal authors (or, where specified and with numbers adjusted accordingly, to individual authors of joint papers).
