The Colonial Present

Afghanistan · Palestine · Iraq

DEREK GREGORY

University of British Columbia, Vancouver

*"This is a great book. Gregory has written a book entwining global geography with social danger. **The Colonial Present** takes us through the contemporary wars in Afghanistan, the Palestinian territories and Iraq as connected projects of imperial ambition... **The Colonial Present** is a refreshingly angry book, with all the geographical and historical scholarship to buttress its indictment of American, Israeli and British behavior around the world. It is exquisitely written... This book's screaming truths are must-read heresy."*

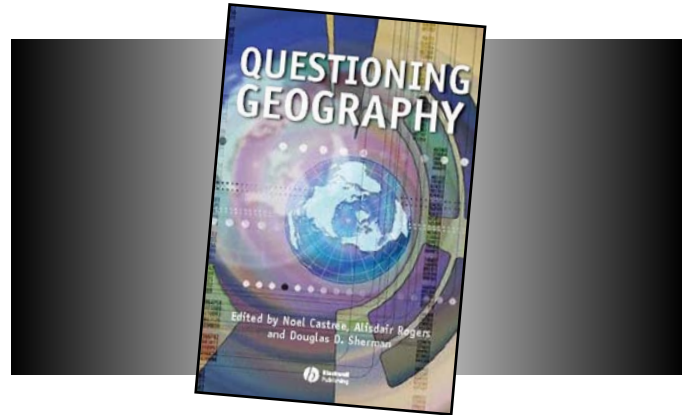

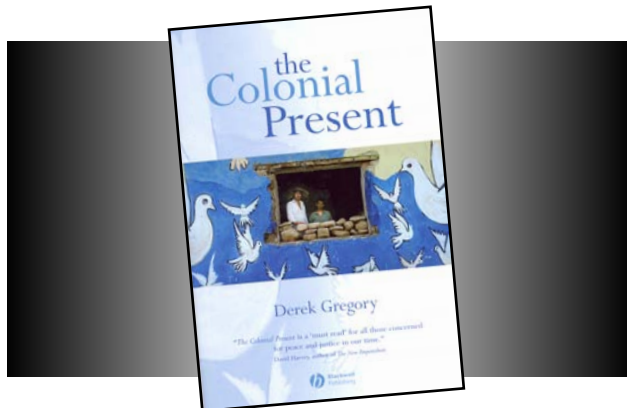

LOS ANGELES TIMES

*"An impassioned plea by one of the world's most eminent geographers to displace the distorted imaginative geographies that have so corrupted our representations of the Islamic world with a geographical imagination that enlarges and enhances our understandings. The long historical geography of the colonial encounter in the Middle East is here laid bare in all its twisted detail in order to comprehend the fractures underpinning contemporary political impasses in Palestine, Afghanistan, and Iraq. **The Colonial Present** is a 'must read' for all those concerned for peace and justice in our time."*

DAVID HARVEY, AUTHOR OF THE NEW IMPERIALISM

In this powerful and passionate critique of the 'war on terror' in Afghanistan and its extensions into Palestine and Iraq, Derek Gregory traces the long history of British and American involvements in the Middle East and shows how colonial power continues to cast long shadows over our own present.

Questioning Geography

Fundamental Debates

Edited by **NOEL CASTREE, ALISAIR ROGERS & DOUGLAS D. SHERMAN**

University of Manchester; Keele College, Oxford; Texas A & M University

"Questioning Geography brings together some of the world's leading geographical thinkers in an honest, refreshing, intellectually vibrant and accessible set of encounters that simultaneously illuminate and develop key debates. While individual chapters show the diversity of philosophical, methodological and substantive concerns in geography, this book ultimately celebrates the vitality of a challenging and robust discipline."

ADAM TICKELL, UNIVERSITY OF BRISTOL

QUESTIONING GEOGRAPHY introduces students to the fundamental debates that animate geography today. Covering both human and physical geography, each chapter addresses a key issue that continues to preoccupy geographers. Questions considered include: Is geography a coherent discipline? Are human and physical geography sciences? In what ways is geography relevant? Supported by essay questions and suggestions for further reading, this accessible text demonstrates to students the distinctiveness and vitality of modern geography.

The Dictionary of Human Geography

Fourth Edition

Edited by R.J. JOHNSTON, DEREK GREGORY,
GERALDINE PRATT & MICHAEL WATTS

University of Bristol; University of British Columbia, Vancouver; University of British Columbia,
Vancouver; University of California, Berkeley

"As a student's companion it could hardly be bettered"

TIMES EDUCATIONAL SUPPLEMENT

"This is easily the best dictionary of human geography in print."

PROGRESS IN HUMAN GEOGRAPHY

This path-breaking guide to the concepts, terms and theories used in human geography has now been fully revised to reflect and to advance changes in the nature and practice of human geography. **THE DICTIONARY OF HUMAN GEOGRAPHY**, Fourth Edition, contains a wealth of new material, to ensure that it remains the definitive resource for a new generation of students and teachers.

The Globalization Reader

Second Edition

Edited by FRANK J. LECHNER & JOHN BOLI

Both Emory University

"An excellent core text for undergraduate and graduate courses on globalization, and would be an excellent starting point for anyone thinking of working in this area."

GEORGE RITZER, UNIVERSITY OF MARYLAND

THE GLOBALIZATION READER makes sense of a term that has become an all-purpose catchword in contemporary debates. The editors have compiled the most relevant literature into a highly readable and accessible format. With its broad coverage of political, economic, cultural, and individual dimensions, this volume provides readers with a deeper understanding of the globalization process.

Place

A Short Introduction

TIM CRESSWELL

University of Wales, Aberystwyth

"This is a truly wonderful book."

MICHAEL BROWN, UNIVERSITY OF WASHINGTON

Place is one of the most fundamental concepts in human geography. This short introduction marries familiar everyday uses of the term with the more complex theoretical debates that have grown up around it.

The text makes the debates intelligible to students, using illustrations from the news, popular culture, and everyday life as a way into more abstract ideas. It traces the development of the concept of place from the 1950s through its subsequent appropriation by cultural geography and the linking of place to politics. Substantial parts of exemplary papers by Doreen Massey and David Harvey are included as a focus for discussion, and the author also considers empirical examples of ways in which the concept of place has been mobilised in research.

Teaching and learning aids include an annotated bibliography, lists of key readings and texts, a survey of web resources, and suggestions for pedagogical resources and student projects.

Putting Workfare in Place

Local Labour Markets and the New Deal

PETER SUNLEY, RON MARTIN & CORINNE NATIVEL*University of Southampton; University of Cambridge; University of Glasgow*

The New Deal for Young People, introduced in April 1998, has been a flagship of the UK's Labour Government. This book is the first comprehensive and authoritative analysis of the New Deal and examines how far the programme has succeeded in responding to the diversity of conditions in local labour markets across the UK.

256 PAGES / 1-4051-0785-5 [ISBN13: 978-1-4051-0785-3] HB / 1-4051-0784-7 [ISBN13: 978-1-4051-0784-6] PB / **DECEMBER 2005****Publics and the City****KURT IVESON***University of Sydney, Australia*

Based on original empirical research conducted in Australia and the United Kingdom between 1996 and 2003, **PUBLICS AND THE CITY** explores the ways in which the urban is used and produced in struggles to establish novel modes of public discourse and sociability.

256 PAGES / 1-4051-2732-5 [ISBN13: 978-1-4051-2732-5] HB / 1-4051-2730-9 [ISBN13: 978-1-4051-2730-1] PB / **SEPTEMBER 2006****After the Three Italies**

Wealth, Inequality and Industrial Change

MICHAEL DUNFORD & LIDIA GRECO*University of Sussex; University of Bari*

AFTER THE THREE ITALIES provides a novel synthesis of the literature on convergence and the new economic geography, and develops a new political economy approach to the analysis of the territorial division of labour. New theoretical and methodological approaches are exemplified through an up-to-date account of Italy's economic performance and of its recent development relative to other European countries and the rest of the world.

KEY TEXTBOOK

Physical Processes in Earth and Environmental Sciences

MIKE LEEDER & MARTA PERÈZ-ARLUCEA

University of East Anglia; University of Vigo

This book provides a sound introduction to the basic physical processes that dominate the workings of the Earth, its atmosphere and hydrosphere. It systematically introduces the physical processes involved in the Earth's systems without assuming an advanced physics or mathematical background.

PHYSICAL PROCESSES IN EARTH AND ENVIRONMENTAL SCIENCES provides an integrated approach to the study of earth, marine and atmospheric environmental sciences, reflecting current trends in undergraduate courses. The text considers the various Earth systems through a basic account of general physical properties, kinematics, forces and dynamics that cause flow transport and deformation. Natural examples of physical processes, rather than abstract physics and maths, are used throughout to illustrate the scientific principles involved.

KEY TEXTBOOK

Global Warming

Understanding the Forecast

DAVID ARCHER

University of Chicago

GLOBAL WARMING: UNDERSTANDING THE FORECAST is a comprehensive introduction to all aspects of global warming. Written in an accessible way, and assuming no specialist prior knowledge, this important book examines the processes of climate change and climate stability, from the distant past to the distant future.

This book examines the greenhouse effect, the carbon cycle, and what the future may hold for global climate. Drawing from a wide range of disciplines, it not only summarizes scientific evidence, but also economic and policy issues, related to global warming. A companion website provides access to interactive computer models of the physics and chemistry behind the global warming forecast, which can be used to support suggested student projects included at the end of each chapter.

GLOBAL WARMING: UNDERSTANDING THE FORECAST provides an essential introduction for anyone, with or without a prior background in science, who needs to have a good understanding of this important issue.

Practical and Theoretical Geoarchaeology

PAUL GOLDBERG & RICHARD I. MACPHAIL

Boston University; University College, London

PRACTICAL AND THEORETICAL GEOARCHAEOLOGY provides an invaluable overview of geoarchaeology and how it can be used effectively in the study of archaeological sites and contexts. Taking a pragmatic and functional approach, this book presents a fundamental, broad-based perspective of the essentials of modern geoarchaeology in order to demonstrate the breadth of the approaches and the depth of the problems that it can tackle.

This book reflects the rapid advances made in the area in recent years, but also gives the reader a firm grasp of conventional approaches. It covers traditional topics with the emphasis on landscapes, as well as anthropogenic site formation processes and their investigation. It also provides guidelines for the presentation of field and laboratory methods and the reporting of geoarchaeological results.

Groundwater in the Environment

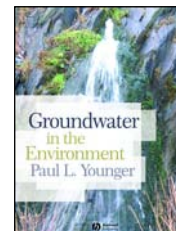

An Introduction

PAUL L. YOUNGER

University of Newcastle

This accessible new textbook provides a thorough introduction to all aspects of groundwater systems and their management. Using straightforward language and analogies to everyday experiences, it explains the origins, nature and behavior of subsurface water without resorting to complicated mathematics. It draws on case studies and cutting-edge research from around the world, giving a unique insight into groundwater occurring in a wide range of different climate zones and geological settings.

Geomorphology and River Management

Applications of the River Styles Framework

GARY BRIERLEY & KIRSTIE FRYIRS

Both Macquarie University

Rivers show a remarkable diversity of character and behavior in any catchment. Human activities have impacted profoundly on the inherent variability in patterns and rates of river adjustment, altering what rivers look like, how they behave, and the structure and function of aquatic ecosystems. This book outlines geomorphic considerations for river management and a generic set of procedures, termed the River Styles framework, which provides a set of tools for interpreting river character, behavior, condition, and recovery potential.

Systematic Reviews in the Social Sciences

A Practical Guide

MARK PETTICREW & HELEN ROBERTS

MRC Social and Public Health Sciences Unit, Glasgow; Child Health Research and Policy Unit, City University

This book outlines the rationale and methods of systematic reviews, giving worked examples from social science and other fields. It requires no previous knowledge, but takes the reader through the process stage by stage. It draws on examples from such diverse fields as psychology, criminology, education, transport, social welfare, public health, and housing and urban policy, among others.

GIS

A Short Introduction

NADINE SCHURMAN

Simon Fraser University

This guide enables students of human geography to take a critical look at the theory and practices that together comprise GIS. It outlines the value - both intellectual and technical - of GIS for human geographers, recognising the positive effects GIS has had on the discipline but also pointing out its limitations.

The guide addresses issues important to human geographers such as how data are represented through digital models and how different ontologies emerge from different data models.

Mapping

A Critical Introduction to GIS and Cartography

JEREMY CRAMPTON

Georgia State University

This new book considers in turn: the historical development of mapping; the competing answers available to the seemingly straightforward question 'why use maps?'; the idea that maps produce space and place; and finally the politics of mapping. An 'interlude' in each of the first three parts gives the reader an opportunity to encounter the issues through examination of case studies.

Biogeography

An Ecological and Evolutionary Approach

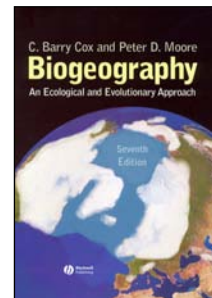

Seventh Edition

C. BARRY COX & PETER D. MOORE

Formerly King's College, London; King's College, London

The latest edition of this highly successful and popular textbook has been completely revised and updated to include the latest developments in biogeography. It offers excellent insight into the multidisciplinary nature of biogeography, providing the student with a sound historical base, up-to-date factual content and a clear explanation of current controversies.

440 PAGES / 1-4051-1898-9 [ISBN13:978-1-4051-1898-9] PB / JANUARY 2005

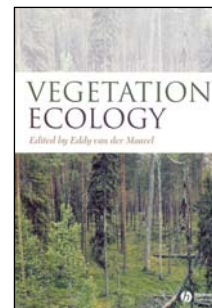

Vegetation Ecology

Edited by **EDDY VAN DER MAAREL**

University of Groningen

VEGETATION ECOLOGY is a comprehensive account of plant communities and their environments. Written by leading experts in their field from four continents, this up-to-date, innovative text covers the composition, structure, ecology, diversity, distribution and dynamics of plant communities, with an emphasis on functional adaptations to the abiotic and biotic processes governing plant communities.

408 PAGES / 0-632-05761-0 [ISBN13:978-0-632-05761-0] PB / 2004

Tropical Rain Forests

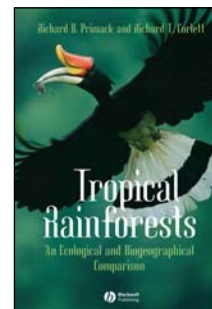

An Ecological and Biogeographical Comparison

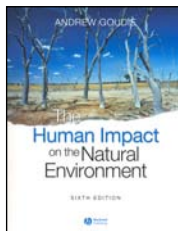

RICHARD B. PRIMACK & RICHARD T. CORLETT

Boston University; University of Hong Kong

The popular view of the tropical rainforest as a monolithic tangle of rain-soaked trees, vines, birds, monkeys and big cats is a widespread myth. **TROPICAL RAIN FORESTS: AN ECOLOGICAL AND BIOGEOGRAPHICAL COMPARISON** explodes that myth by showing that rainforests in different tropical regions are unique despite superficial similarities. Throughout the book the distinctive characteristics of rainforests in tropical Asia, tropical America, Africa, Madagascar, New Guinea, and Australia are emphasized.

The Human Impact on the Natural Environment

Past, Present, and Future
Sixth Edition

ANDREW GOUDIE
University of Oxford

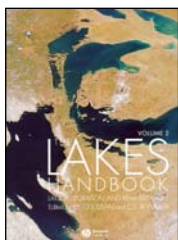

The new edition of this classic student text provides an up-to-date and comprehensive view of the major environmental issues facing the world today, and is an essential introduction to the past, present and future impact of humans on Earth.

Following the successful structure of previous editions, the new edition of **THE HUMAN IMPACT** has been extensively enlarged and updated, with many new figures and up-to-date statistics. Four completely new chapters explore the ways in which global climate change may have an impact on Earth in the future. Other chapters explore the impact of humans upon vegetation, animals, soils, water, landforms, and the atmosphere. A new design makes the text even more accessible and easy to use.

This important book is essential reading for undergraduates in geography or environmental science, and anyone requiring a thorough overview of the impact of humans upon natural processes and systems.

Hydrogeology

Principles and Practice

KEVIN HISCOCK
University of East Anglia

HYDROGEOLOGY: PRINCIPLES AND PRACTICE provides a comprehensive introduction to the study of hydrogeology and the significance of groundwater in the terrestrial aquatic environment. Earlier chapters explain the fundamental physical and chemical principles of hydrogeology, and later chapters feature groundwater investigation techniques and contaminant hydrogeology.

The Lakes Handbook

Limnology and Limnetic Ecology

Edited by P.E. O'SULLIVAN & C.S. REYNOLDS
University of Plymouth; Centre for Ecology and Hydrology, Windermere

THE LAKES HANDBOOK provides an up-to-date overview of the application of ecologically sound approaches, methods and tools using experience gained around the world for an understanding of lakes and their management.

Volume One of the **HANDBOOK** addresses the physical and biological aspects of lakes pertinent to lake management, emphasising those aspects particularly relevant to large, still bodies of water.

Volume Two then considers lake management, with particular emphasis on sustainability, restoration and rehabilitation.

Stable Isotopes in Paleoclimatology

JONATHAN HOLMES & M. MASLIN
Both University College, London

This book examines the application of stable isotopes in the reconstruction of past climatic conditions. With particular emphasis on the Quaternary, **STABLE ISOTOPES IN PALEOCLIMATOLOGY**, provides a comprehensive overview of isotope records in marine sediments, ice cores and continental archives and examines how these may be interpreted.

Geographies of Global Change

Remapping the World

Second Edition

Edited by R.J. JOHNSTON, PETER J. TAYLOR
& MICHAEL J. WATTS

University of Bristol; Loughborough University; University of California, Berkeley

The second edition of this popular collection presents 28 specially commissioned essays by leading geographers from across the world, addressing questions about how and why the world has changed, is changing, and will continue to change. The volume provides students with a series of critical insights into the economic, political, social, cultural and ecological dimensions of change at every geographical scale from the global to the local.

Political Ecology

A Critical Introduction

PAUL ROBBINS

University of Arizona

This text presents a critical survey of the burgeoning field of political ecology, an interdisciplinary area of research which connects politics and economy to problems of environmental control and ecological change. Written to be accessible to students at all levels and from different disciplines, it provides an entertaining and rigorous synthesis of the achievements and shortcomings of the field to date.

The Future of Environmental Criticism

Environmental Crisis and Literary Imagination

LAWRENCE BUELL

Harvard University

This manifesto summarizes the disparate critical practices that constitute ecocriticism. Lawrence Buell, one of the world's leading theorists in ecocriticism, traces the ecocritical movement back to its roots in the 1970s, through its coalescence into a recognizable entity in the early 1990s, to its diversification and proliferation today.

David Harvey

A Critical Reader

Edited by NOEL CASTREE & DEREK GREGORY

University of Manchester; University of British Columbia, Vancouver

David Harvey is among the most distinguished and influential Marxist theorists of his generation. For over three decades he has published works of major insight and originality that have challenged and altered dominant intellectual-political frameworks of understanding in urban studies, geography, sociology and beyond.

This book critically interrogates Harvey's work as a geographer, a Marxist and a public intellectual. Comprising a series of newly commissioned essays written by contributors from across the human sciences, it considers the entire range of Harvey's oeuvre, from the nature of urbanism and the role of space in capitalist accumulation to environmental issues and post-modernism. To aid further study and research, the volume also contains a consolidated bibliography of Harvey's writings.

Territory

A Short Introduction

DAVID DELANEY

Amherst College

This short introduction conveys the complexities associated with the term 'territory' in a clear and accessible manner, and provides an interdisciplinary survey of the many strands of research in the field. Specific areas addressed include: interpretations of territorial structures; the relationship between territoriality and scale; the validity and fluidity of territory; and the practical social processes associated with territorial re-configurations.

David Delaney stresses that how we understand territory is inseparable from our understanding of power, including political power, economic power, and cultural power. In making sense of territory in this way, he presents an overview of how territory is understood across a range of perspectives. He also offers a close, critical reading of Robert Sack's classic work, *Human Territoriality: Its Theory and History*. In an extended illustrative case study, the book explores how territoriality has unfolded in the context of Israel/Palestine.

European Families up against the Demands of Work and Care

Edited by **TEPPO KRÖGER & JORMA SIPILÄ**

University of Jyväskylä; Tampere University

Combining work and care responsibilities is a challenge faced by families in many industrialized nations. This volume focuses on the everyday life of families who live under particularly strained conditions; that is, lone parent families, immigrant families, dual career families, and families who care simultaneously for both their children and an elderly family member. It provides a new perspective on the reality of European family life where care and paid work need to be woven together on a daily basis.

A Companion to Feminist Geography

Edited by **LISE NELSON & JONI SEAGER**

University of Oregon; University of Vermont

"A kaleidoscopic presentation of the riches of feminist geography, revealing at every turn the breadth of its theoretical perspectives, the variety of its objects of inquiry, and the reach of its methodologies."

CINDI KATZ, GRADUATE CENTRE, CITY UNIVERSITY OF NEW YORK

A COMPANION TO FEMINIST GEOGRAPHY captures the breadth and diversity of this vibrant and substantive field. It shows how feminist geography has altered the landscape of geographical inquiry and knowledge since the 1970s, reframing fundamental approaches across a range of disciplines, including architecture, environmental studies, and geography. Further, it situates feminist geography within the context of geographical thought and within interdisciplinary feminist debates.

A Companion to Cultural Geography

Edited by **JAMES DUNCAN, NUALA JOHNSON & RICHARD SCHEIN**

University of Cambridge; Queen's University, Belfast; University of Kentucky

A COMPANION TO CULTURAL GEOGRAPHY brings together original contributions from 40 distinguished international scholars to provide a critical overview of this dynamic and influential field of study.

The volume starts by charting the most significant changes in cultural geography in the twentieth century before going on to introduce the principal approaches animating work in the field today. These theoretical approaches are then grounded in a series of essays on the major thematic areas to which cultural geographers have contributed ---nature, identity, landscape, colonialism, and post-colonialism.

World Culture

Origins and Consequences

FRANK J. LECHNER & JOHN BOLI

Both Emory University

This book explores the development, content, and impact of world culture. Combining several of the most fruitful theoretical perspectives on world culture, including the world polity approach and globalization theory, the book gives a historical treatment of the development of world culture and assesses the complex impact of world culture on people, organizations, and societies. This is a provocative, synthetic, and grounded interpretation of world culture that is essential for any student or scholar of globalization and world affairs.

Postcolonialism

An Historical Introduction

ROBERT J.C. YOUNG

Wadham College, Oxford

"The foremost postcolonial theorist in Britain"

TIMES HIGHER EDUCATION SUPPLEMENT

This acclaimed survey, by one of the leading exponents in the field, explains in clear and accessible language the historical and theoretical origins of post-colonial theory. Acknowledging that post-colonial theory draws on a wide, often contested, range of theory from different fields, Young analyzes the concepts and issues involved, explains the meaning of key terms, and interprets the work of some of the major writers concerned, to provide an ideal introductory guide for those undergraduates or academics coming to post-colonial theory and criticism for the first time.

Identities

Race, Class, Gender, and Nationality

Edited by **LINDA MARTÍN ALCOFF & EDUARDO MENDIETA**

Syracuse University; State University of New York, Stony Brook

This anthology marks the first time that the key essays in the long tradition of philosophical debate surrounding identity categories have been brought together in one volume. **IDENTITIES** comprises the essays that have shaped discussions of identity across disciplines, including selections from Hegel, Marx, Freud, Du Bois, de Beauvoir, Lukàcs, Fanon, Hall, Guha, Hobsbawm, Wittig, Butler, Halperin, Robertson, Said, and Laclau.

Working the Spaces of Neoliberalism

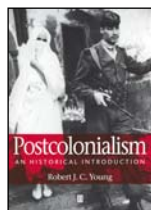

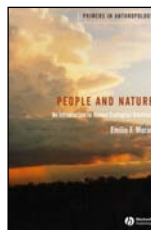

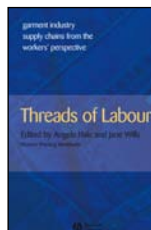

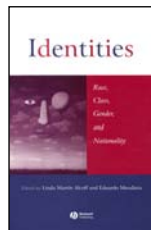

Activism, Professionalisation and Incorporation

Edited by **NINA LAURIE & LIZ BONDI**

University of Newcastle; University of Edinburgh

Drawing on global research, this book argues that processes of professionalisation form an integral part of the production of neoliberal spaces, with profound implications for political activism. It brings together original research from diverse contexts, including studies conducted in the Global South and the Global North.

A Companion to Economic Geography

Edited by **ERIC SHEPPARD & TREVOR J. BARNES**

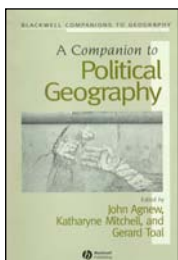

University of Minnesota; University of British Columbia, Vancouver

"This is an instant classic, a landmark that scholars and graduate students will return to for decades to come. Physically and bibliographically, this presentation is state of the art. A 'must' addition to all social science collections worldwide."

P.O. MULLER, UNIVERSITY OF MIAMI

"This is an impressive and very welcome volume. The editors and authors have done a great job and the rest of us should be grateful for the fact that this rich collection of papers is accessible."

Geopolitics and the Post-colonial

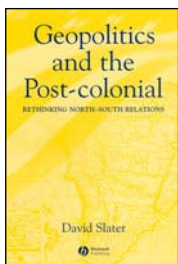

Rethinking North-South Relations

DAVID SLATER

Loughborough University

"This book is the product of a tremendous intellectual maturity and sophistication - the author engages and reworks, with great mastery and success, the best theories of our time."

ARTURO ESCOBAR, UNIVERSITY OF NORTH CAROLINA

Highlighting the contribution of key thinkers from the Third World, this book examines the dynamic nature of spatial power and cultural representation. This book is unique in the way it reconceptualizes geopolitical analysis from a post-colonial perspective. A key motif concerns tracing the historical impact of the United States on the societies of the South and especially the Latin South.

The Form of Cities

Political Economy and Urban Design

ALEXANDER CUTHBERT

University of New South Wales, Sydney

THE FORM OF CITIES offers a considered theoretical introduction to the art of designing cities. It encourages the reader to go beyond abstract social science into the realm of human experience, aesthetics and the creative process in order to understand why cities are how they are; and it demonstrates that cities are replete with symbolic values, collective memory, association and conflict.

The book reviews existing theoretical interpretations underpinning the subject and suggests a new understanding based in political economy. It then refines this approach, elaborating particular ways of conceptualising the city, whether through aesthetics or the prism of gender. The result is an engagingly written text, eschewing jargon but retaining a sophisticated, interpretative edge.

Understanding Urban Policy

A Critical Introduction

ALLAN COCHRANE

The Open University

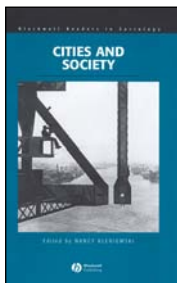

This extensive and theoretically informed review of the evolution of urban policy since the 1960s explores its complex interaction with changing understandings of urban life and social welfare. Highlighting connections and continuities, it examines a broad range of issues that have helped to define urban policy at different times and in different places, including race, economic regeneration and competitiveness, managing dangerous places, community and managerialism.

The author draws on arguments and evidence from the UK but with explicit cross reference to developments in the US, because of the way in which the development of urban policy in the two countries has been intertwined. He also considers the emergence of European and globalized forms of (neoliberal) urban policy since the mid 1990s, before reflecting on the hopes and possibilities that might be realized through urban policy in the future.

Readings in Planning Theory

Second Edition

Edited by SCOTT CAMPBELL & SUSAN S. FAINSTEIN

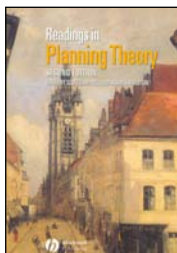

University of Michigan; Columbia University

The second edition of this very successful volume examines the current state of planning theory and the new directions it has taken in recent years. The editors have selected a set of classic and contemporary writings to address a central question: What role can planning theory play in making the good city and region within the constraints of a capitalist political economy and a democratic political system?

Getting into Local Power

The Politics of Ethnic Minorities in British and French Cities

ROMAIN GARBAYE

University of Paris, Sorbonne

"This excellent book is a substantial contribution to the field bringing together the urban politics and race policy literatures in a fascinating comparative study. It is an interesting story, well told, and highly instructive for policy-makers and academics alike."

PETER JOHN, UNIVERSITY OF MANCHESTER

Romain Garbaye presents a comparison of the politics of ethnic minorities in British and French cities, with a focus on the election of city councillors in Birmingham, Lille and Roubaix between 1980 and 2001.

Cities, War, and Terrorism

Towards an Urban Geopolitics

Edited by STEPHEN GRAHAM

University of Durham

"This is a brilliant, disturbing book."

DEREK GREGORY, UNIVERSITY OF BRITISH COLUMBIA

CITIES, WAR, AND TERRORISM is the first book to look critically at the ways in which warfare, terrorism, and counter-terrorism policies intersect in cities in the post-Cold War period. It provides up-to-date analyses of a range of specific urban sites, including those involved in the Cold War, the Balkan wars, the Israeli-Palestinian conflict, the 9/11 attacks, the 'War on Terror' attacks on Afghanistan and Iraq, and urban anti-globalization battles.

Cities of Europe

Changing Contexts, Local Arrangements, and the Challenge to Urban Cohesion

Edited by YURI KAZEPOV

University of Urbino

CITIES OF EUROPE is a unique combination of book and CD-ROM examining the effects of changing contexts on the spatial and political arrangements of western European cities.

Comprising a series of contributions by well known scholars from the field of urban studies, the book makes an important contribution to debates about the nature of current socio-economic transformations, the tensions to which they are giving rise, and how western European urban societies are dealing with them.

The CD-ROM accompanying the book features a series of 2000 pictures from seventeen cities, as well as 126 thematic maps, interviews with established scholars and literature reviews.

JAN P. PRONK ET AL

Former Minister for Development Co-operation of the Netherlands

In this volume, a select group of experts puts development aid under the microscope. Examining its history, its rationale, and its effectiveness, they reach some challenging conclusions as to the part aid plays in catalysing, or indeed stifling, development. While some argue that aid remains vital, and must be maintained or increased, others are more sceptical, and fear that it may even prolong underdevelopment in certain circumstances.

SERIES: DEVELOPMENT AND CHANGE SPECIAL ISSUES

From Modernization to Globalization

Social Perspectives on International Development

J. TIMMONS ROBERTS & AMY HITE

College of William and Mary, Virginia; Tulane University

FROM MODERNIZATION TO GLOBALIZATION is a reference for scholars, students and development practitioners on the issues of processes of social change and development in the Third World. It provides carefully excerpted samples from both classic and up-to-date writings in the development literature, as well as, a general introduction.

Decolonization and its Impact

A Comparative Approach to the End of the Colonial Empires

MARTIN SHIPWAY

Birkbeck College, London

DECOLONIZATION AND ITS IMPACT is a ground-breaking comparative study of decolonization from before the Second World War to the early 1960s. It focuses on the process and impact of decolonization at the level of the 'late colonial state' and of colonial societies, with reference to a number of key cases across the European colonial empires.

SERIES: HISTORY OF THE CONTEMPORARY WORLD

SERIES EDITORS: PETER CATTERALL & LAWRENCE FREEDMAN

256 PAGES / 0-631-19967-5 [ISBN13: 978-0-631-19967-0] HB / 0-631-19968-3 [ISBN13: 978-0-631-19968-7] PB / SEPTEMBER 2006

The Anthropology of Development and Globalization

From Classical Political Economy to Contemporary Neoliberalism

Edited by MARC EDELMAN & ANGELIQUE HAUGERUD

Hunter College, City University of New York; Rutgers University

THE ANTHROPOLOGY OF DEVELOPMENT AND GLOBALIZATION is a collection of readings that provides an unprecedented overview of this field that ranges from its classical origins to today's debates about the 'magic' of the free market.
