Ace the GMAT

BRANDON ROYAL

Education Consultant

In order to attain the high GMAT scores needed to get into the top business schools of their choice, an increasing number of prospective business-school candidates are taking the GMAT more than once. But how does one go about aching the test for the first time or bolstering a second attempt? The book is a distillation of the experiences of a veteran test-prep instructor, MBA admissions coach, author and education raconteur. It offers a philosophy built on two simple but powerful propositions:

- ❑ Identify the principles behind classic problem types.
- ❑ Succeed first by not getting the easy questions wrong and then go on to get the difficult questions right!

ACE THE GMAT contains two of the author's own inventions: The Big Seven Number Cracker for open-ended variable problems in Data Sufficiency and the Four-Corner Question Cracker for Reading Comprehension questions.

Knowledge at Work

Creative Collaboration in the Global Economy

ROBERT J. DEFILLIPPI, MICHAEL B. ARTHUR & VALERIE J. LINDSAY

Suffolk University; Suffolk University; Victoria University of Wellington

"Both scholarly and streetwise, this book does a great job in showing what knowledge work means for the lives of the people who do it, and the performance of the organizations that try to manage it."

HARRY SCARBOROUGH, UNIVERSITY OF WARWICK

Using examples from the film, software and boat building industries this highly topical book focuses on the processes through which knowledge is created, accumulated and put to use in the knowledge-driven global economy. It suggests that organizations need to understand the link between individual, community, organization and industry learning if they are to capitalize on project-based learning.

Management and Creativity

From Creative Industries to Creative Management

CHRIS BILTON

University of Warwick

"The book will appeal to a broad audience of creatives, policy-makers and students looking for an alternative, sounder framework for understanding how to nurture creativity in the workplace."

MANAGEMENT TODAY

In this book, Chris Bilton, who has worked as a performer, writer, arts worker and academic, challenges the stereotypical opposition between 'creatives' and 'suits'. Creativity, he suggests, is not just about spontaneous discovery and inspiration, it is also a self-conscious, deliberately managed process. Similarly, management is not only shaped by rational processes, it also involves insight, intuition, creativity and risk.

Bilton draws on the work of management theorists and creativity theorists, and on the practical experience of individuals working in creative industries, in his attempt to improve our understanding of the relationship between the management of creativity and creative approaches to management. His work forms part of a wider move to consider the relevance of creative processes and structures in our new, creative economy.

Using case materials this book examines the relevant statutes, judicial decisions, executive orders, and administrative policies that shape the respective rights of managers and workers in the workplace. It enables students and professionals to understand the principles underlying the law so that they themselves can evaluate an organization's decisions.

New cases have been added to illustrate the continued application of disparate treatment and disparate impact analysis. Chapters on gender and leave issues in employment, EEO classifications, employment of the handicapped, courts and affirmative-action, employer involvement in employee non-work activities, drug testing and the law, and courts and affirmative-action have also been revised to incorporate new developments.

Conscience and Corporate Culture

KENNETH E. GOODPASTER

University of St Thomas

"A timely and important book that shows how high the stakes are today."

TOM PIPER, HARVARD BUSINESS SCHOOL

In the past few years, monumental corporate scandals have been emblazoned on every front page, but people have largely responded with ambivalence to events such as Enron's collapse and the tragedy of NASA's Columbia. In this book, Goodpaster identifies the common patterns among such recent events, and argues for the development of an ethical response. Reporting on more than three decades of professional evolution, the book serves as a platform for communication between doers and thinkers on a subject that is profoundly difficult and important.

KEY TEXTBOOK

Real World Research

A Resource for Social Scientists and Practitioner-Researchers
Second Edition

COLIN ROBSON
University of Huddersfield

*"Second editions, like movie sequels, rarely surpass the originals. **Real World Research** is a stunning exception. Robson has brilliantly expanded and revised what was already the best book on how to actually do research in applied settings."*

JOSEPH A. MAXWELL, GEORGE MASON UNIVERSITY

"Even the most anxious and resistant novice will surely feel they have a new insight (and hopefully, confidence) into the various approaches to social research. Robson manages to combine cool objectivity with both enthusiasm and passion. One can see why the first edition was successful."

ANTHONY GALE, UNIVERSITY OF PORTSMOUTH

This successful text provides students with the skills necessary to conduct research outside the laboratory, in real world situations. It covers both qualitative and quantitative approaches and contains examples drawn from the fields of applied psychology, applied social science, health studies, social work and education.

BOB BURGESS, UNIVERSITY OF LEICESTER

Written specifically to address the needs and concerns of the undergraduate, this tightly focused volume guides students through the process of conducting and completing a research project and is relevant to all disciplines that require the use of social research methods.
