NEW EDITION OF KEY TEXTBOOK IN 2007

The Globalization Reader

Third Edition

Edited by **FRANK J. LECHNER & JOHN BOLI**

Both Emory University

"An excellent core text for undergraduate and graduate courses on globalization, and would be an excellent starting point for anyone thinking of working in this area."

GEORGE RITZER, UNIVERSITY OF MARYLAND
OF THE PREVIOUS EDITION

This new edition of **THE GLOBALIZATION READER** conveys the complexity, importance, and contentiousness of globalization from diverse vantage points. Providing a deeper understanding of the globalization process, this third edition:

- Is fully revised and updated with new material on economic globalization, the role of media and religion in cultural globalization, and the link between environmentalism and the globalization of social problems
- Ranges in coverage across economic, political, cultural, and experiential dimensions of social change
- Includes a wide variety of perspectives on globalization and captures some of the fault lines in current debates
- Stimulates discussion by including provocative contemporary works and by structuring sections around arguments that serve as connecting themes.

Exam Copy Available **NOVEMBER 2007** - 512 PAGES

ISBN13: 978-1-4051-5553-3 PB

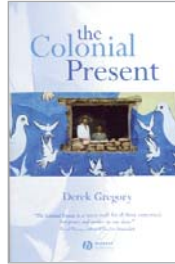

The Colonial Present

Afghanistan. Palestine. Iraq

DEREK GREGORY

University of British Columbia, Vancouver

*"This is a great book. Gregory has written a book entwining global geography with social danger. **The Colonial Present** takes us through the contemporary wars in Afghanistan, the Palestinian territories and Iraq as connected projects of imperial ambition... **The Colonial Present** is a refreshingly angry book, with all the geographical and historical scholarship to buttress its indictment of American, Israeli and British behavior around the world. It is exquisitely written... This book's screaming truths are must-read heresy."*

LOS ANGELES TIMES

"Powerfully and persuasively argued. Passionately written. A daring, brilliant analysis. Quite simply the most significant book written by a geographer in some time."

ALLAN PRED, UNIVERSITY OF CALIFORNIA, BERKELEY

In this powerful and passionate critique of the 'war on terror' in Afghanistan, Palestine, and Iraq, Derek Gregory traces the long history of British and American involvements in the Middle East and shows how colonial power continues to cast long shadows over our own present.

2004 - 392 PAGES - ISBN13: 978-1-57718-089-0 HB - ISBN13: 978-1-57718-090-6 PB

Place

A Short Introduction

TIM CRESSWELL

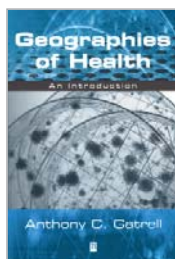

Royal Holloway, University of London

"This is a truly wonderful book. It is short but not trite or superficial. It is in depth without being dense. It is timely without ignoring classic issues and debates. There is a clear pedagogy here, which is often missing in texts, and it is well written by an outstanding geographer."

MICHAEL BROWN, UNIVERSITY OF WASHINGTON

This text makes debates about place intelligible to students, using illustrations from the news, popular culture, and everyday life as a way into more abstract ideas. It traces the development of the concept of place from the 1950s through its subsequent appropriation by cultural geography and the linking of place to politics.

Exam Copy Available **SERIES: SHORT INTRODUCTIONS TO GEOGRAPHY - SERIES EDITORS: GERALDINE PRATT & NICK BLOMLEY**
2004 - 168 PAGES - ISBN13: 978-1-4051-0671-9 HB - ISBN13: 978-1-4051-0672-6 PB

Geographies of Health

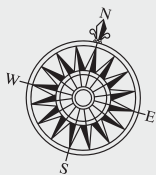

An Introduction

ANTHONY C. GATRELL

Lancaster University

This text shows how health may be studied from geographical perspectives and reviews a wide range of studies linking health outcomes with social and physical environments. The structure of the book is designed to guide the reader through the relevant theoretical perspectives, methodologies and research.

Exam Copy Available **2001** - 312 PAGES - ISBN13: 978-0-631-21984-2 HB - ISBN13: 978-0-631-21985-9 PB

Geography Compass

www.geography-compass.com

Edited by **MICHAEL BRADSHAW & BASIL GOMEZ**

Unique in its range, **GEOGRAPHY COMPASS** is an online-only journal publishing original, peer-reviewed surveys of current research from across the entire discipline. **GEOGRAPHY COMPASS** publishes state-of-the-art reviews, supported by a comprehensive bibliography and accessible to an international readership. **GEOGRAPHY COMPASS** is aimed at senior undergraduates, postgraduates and academics, and will provide a unique reference tool for researching essays, preparing lectures, writing a research proposal, or just keeping up with new developments in a specific area of interest.

Areas covered include:

- Economic Geography
- Social Geography
- Cultural Geography
- Political Geography
- Urban Geography
- Development
- Biogeography
- Environment and Society
- GIS
- Climatology
- Earth Observations
- Geomorphology
- Hydrology & Water Resources

Questioning Geography

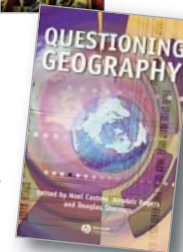

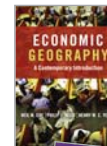

Fundamental Debates

Edited by **NOEL CASTREE, ALASDAIR ROGERS & DOUGLAS D. SHERMAN**

University of Manchester; Keele College, Oxford; Texas A & M University

"Questioning Geography brings together some of the world's leading geographical thinkers in an honest, refreshing, intellectually vibrant and accessible set of encounters that simultaneously illuminate and develop key debates."

ADAM TICKELL, UNIVERSITY OF BRISTOL

QUESTIONING GEOGRAPHY introduces students to the fundamental debates that animate geography today. Covering both human and physical geography, each chapter addresses a key issue that continues to preoccupy geographers. Questions considered include: Is geography a coherent discipline? Are human and physical geography sciences? In what ways is geography relevant? Supported by essay questions and suggestions for further reading, this accessible text demonstrates to students the distinctiveness and vitality of modern geography.

2005 - 328 PAGES - ISBN13: 978-1-4051-0191-2 HB - ISBN13: 978-1-4051-0192-9 PB

The Student's Companion to Geography

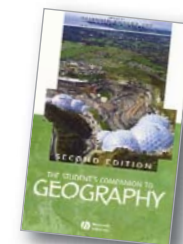

Second Edition

Edited by **ALASDAIR ROGERS & HEATHER A. VILES**

Keele College, Oxford; University of Oxford

"The second edition of The Student's Companion to Geography provides a comprehensive guide to the discipline throughout the English-speaking world. The authorship contains a welcome mix of old and young, and the style is refreshing throughout. The content is, of course, extremely wide ranging and will prove very helpful to anyone wishing to 'get started' on some aspect of the subject."

TIM BURT, UNIVERSITY OF DURHAM

THE STUDENT'S COMPANION TO GEOGRAPHY is an essential resource for those studying geography at university, as well as for those thinking of applying in the future. Contributions from leading geographers from around the world provide a whole range of information about what today's geography is all about, how to study it and how to find out more.

2002 - 416 PAGES - ISBN13: 978-0-631-22132-6 HB - ISBN13: 978-0-631-22133-3 PB

The Dictionary of Physical Geography

Third Edition

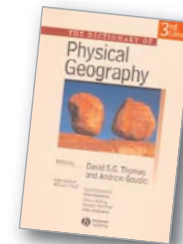

Edited by **DAVID S. G. THOMAS & ANDREW GOUDIE**

University of Sheffield; University of Oxford

"The Dictionary is a remarkable collaborative effort and a valuable resource. It is a very worthwhile purchase for anyone studying or teaching physical geography."

Spaces of Colonialism

Delhi's Urban Governmentalities

STEPHEN LEGG

University of Nottingham

SPACES OF COLONIALISM provides an analysis of the attempts made by the Government of India to secure and order Delhi, the capital of the Raj from 1911-1947. Following the path from New to Old Delhi this book contains a mass of new empirical data that illustrates how these seemingly separate cities were united by shared political rationalities and landscapes of control.

NEW IN 2007

People/States/Territories

The Political Geographies of British State Transformation

RHYS JONES

University of Wales

PEOPLE/STATES/TERRITORIES examines the role of state personnel in shaping, and being shaped by, state organizations and territories. The text develops a conceptual understanding of the state as a continually emerging and contingent territorial organization, which is reproduced, transformed, and contested by state personnel.

APRIL 2007 - 224 PAGES - ISBN13: 978-1-4051-4033-1 HB - ISBN13: 978-1-4051-4034-8 PB

NEW IN 2007

Publics and the City

KURT IVESON

University of Sydney

PUBLICS AND THE CITY investigates struggles over the making of urban publics, considering how the production, management and regulation of 'public spaces' has emerged as a problem for both urban politics and urban theory.

APRIL 2007 - 256 PAGES - ISBN13: 978-1-4051-2732-5 HB - ISBN13: 978-1-4051-2730-1 PB

Driving Spaces

A Cultural-Historical Geography of England's M1 motorway

PETER MERRIMAN

University of Wales, Aberystwyth

This academic study offers a unique perspective on the production and consumption of spaces of driving. Focusing on the design, construction and use of England's M1 motorway in the 1950s and 1960s, Peter Merriman traces the social and cultural geographies and histories of the spaces of motorway driving.

The Association of American Geographers (AAG)

The Association of American Geographers (AAG) is a scientific and educational society founded in 1904. For 100 years the AAG has contributed to the advancement of geography. Its members, who span 62 countries, share interests in the theory, methods, and practice of geography. The AAG conducts educational and research projects that advance geographic understanding, geographic literacy, and geographic learning. It advances professional studies in geography and encourages the application of geographic research in education, government, and business. With its staff based in Washington, D.C., the AAG is known for forming partnerships and developing and managing programs, international outreach, and outcomes to the policymaking sector.

Glacier Science and Environmental Change

Edited by **PETER G. KNIGHT**
Keele University

GLACIER SCIENCE AND ENVIRONMENTAL CHANGE is an authoritative and comprehensive reference work on contemporary issues in glaciology. It explores the interface between glacier science and environmental change, in the past, present, and future.

This book is essential reading for advanced undergraduates, postgraduate research students, and professional researchers in glaciology, geology, geography, geophysics, climatology, and related disciplines.

Inventing the Earth

Ideas on Landscape Development Since 1740

BARBARA A. KENNEDY
University of Oxford

This book chronicles how successive generations of natural philosophers, geologists and geomorphologists have come to invent different views of the Earth over the past 250 years.

Using as its central viewpoint changing ideas about the significance of the action of rain and rivers on the Earth's surface, **INVENTING THE EARTH** shows how our contemporary 'truths' have come to be accepted and, with no guarantee that our current view of the Earth is correct, exposes the frailty of even the most impeccably scientific visions of the Earth.

The Cryosphere and Global Environmental Change

OLAV SLAYMAKER & RICHARD E. J. KELLY
University of British Columbia; University of Waterloo

This is the first textbook to consider all aspects of the cryosphere system (ice sheets, sea ice, snow, river and lake ice, glaciers, and permafrost) in the context of global environmental change driven by human activity and climate. As well as clearly describing the present state of our understanding of the complex interactions between the cryosphere and environmental change, the book provides a wealth of data to inform the global change debate.

Braided Rivers

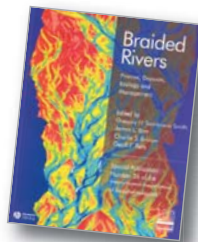

Process, Deposits, Ecology and Management

Edited by **GREGORY H. SAMBROOK SMITH, JIM L. BEST, CHARLIE S. BRISTOW & GEOFF E. PETTS**

University of Birmingham; University of Leeds; Birkbeck College, London; University of Birmingham

This important book brings together eighteen cutting-edge research papers first presented at the Second International Conference on Braided Rivers. The conference discussed the latest research on the dynamics, deposits and ecology of these rivers. The papers in this book include discussions of the morphology of braided rivers and aspects of their sediment transport, depositional models, numerical modelling, engineering applications, system scale understanding, aspects of bank protection and the sustainable management of braided rivers and their ecology.

KEY TEXTBOOK

"David Archer has provided a masterful and lucid explanation of a complex environmental problem. This is all you need to understand the issues."

RAY BRADLEY,
UNIVERSITY OF
MASSACHUSETTS

Global Warming

Understanding the Forecast

DAVID ARCHER

University of Chicago

GLOBAL WARMING: UNDERSTANDING THE FORECAST is a comprehensive introduction to all aspects of global warming. Written in an accessible style, this important book examines the processes of climate change and climate stability, from the distant past to the distant future.

Examining the greenhouse effect, the carbon cycle, and what the future may hold for global climate, this text draws on a wide range of disciplines, and summarizes not only scientific evidence, but also economic and policy issues, related to global warming. A companion web site at **www.understandingtheforecast.org** provides access to interactive computer models of the physics and chemistry behind the global warming forecast, which can be used to support suggested student projects included at the end of each chapter. Solutions and artwork from the book are available to instructors at **www.blackwellpublishing.com/archer**.

GLOBAL WARMING: UNDERSTANDING THE FORECAST provides an essential introduction to this vital issue for both students and general readers, with or without a science background.

Estuaries

Monitoring and Modeling the Physical System

JACK HARDISTY

University of Hull

Estuaries are complex and fascinating natural environments, where constantly changing water depths generate rapidly reversing currents and transport vast quantities of salt, heat, and sediment on a daily basis. **ESTUARIES: MONITORING AND MODELING THE PHYSICAL SYSTEM** examines these processes, offering extensive information about the geological evolution of estuaries, and details of bathymetry, tides, currents, salt and heat, and suspended sediment.

The book is strongly supported by a website at www.blackwellpublishing.com/hardisty which includes regularly updated dynamic internet references, Excel routines for individual formulae and diagrams and full coding for the estuarine model.

JANUARY 2007 - 176 PAGES - ISBN13: 978-1-4051-4642-5 HB

Tectonic Geomorphology of Mountains

A New Approach to Paleoseismology

WILLIAM B. BULL

Formerly of University of Arizona

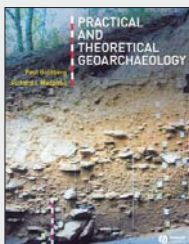

This book explores how landscapes respond to tectonic deformation. Including much previously unpublished research and theory, **TECTONIC GEOMORPHOLOGY OF MOUNTAINS** uses new approaches to enhance theoretical models of landscape evolution and to solve practical problems such as the assessment of earthquake hazards. Readers will learn how to use key landforms as reference levels in changing landscapes, estimate rates of mountain-range uplift, and map seismic shaking caused by prehistoric earthquakes.

JUNE 2007 - 320 PAGES - ISBN13: 978-1-4051-5479-6 HB

KEY TEXTBOOK

Practical and Theoretical Geoarchaeology

PAUL GOLDBERG &
RICHARD I. MACPHAIL

Boston University; University College, London

"There is a new exceptionally good geoarchaeology text - it is written for you. It tells you what a soil is, what a sediment is, is easy to read, well illustrated and designed for the field archaeologist and not just the environmental and soil scientist."

MICHAEL J. ALLEN, THE PREHISTORIC SOCIETY

Taking a pragmatic and functional approach, this book presents a fundamental, broad-based perspective on the essentials of modern geoarchaeology in order to demonstrate the breadth of the approaches and the depth of the problems that it can tackle.

This book reflects the rapid advances made in the area in recent years, but also gives the reader a firm grasp of conventional approaches. It covers traditional topics with the emphasis on landscapes, as well as anthropogenic site formation processes and their investigation. It also provides guidelines for the presentation of field and laboratory methods and the reporting of geoarchaeological results.

2005 - 472 PAGES
ISBN13: 978-0-632-06044-3 PB

Groundwater and the Environment

An Introduction

PAUL L. YOUNGER

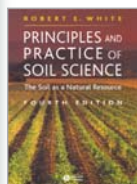

University of Newcastle upon Tyne

This accessible new textbook provides a thorough introduction to all aspects of groundwater systems and their management. Using straightforward language and analogies to everyday experiences, it explains the origins, nature, and behavior of subsurface water without resorting to complicated mathematics.

It draws on case studies and cutting-edge research from around the world, giving a unique insight into groundwater occurring in a wide range of different climate zones and geological settings.

JULY 2006 - 312 PAGES

KEY TEXTBOOK

Physical Processes in Earth and Environmental Sciences

MIKE LEEDER & MARTA PÉREZ-ARLUCEA

University of East Anglia; University of Vigo

"Remarkably comprehensive, full of delightful asides and comments, and written in a style that aptly combines erudition and charm."

CHRIS PAOLA, NATIONAL CENTER FOR EARTH-SURFACE DYNAMICS

This book provides a sound introduction to the basic physical processes that dominate the workings of the Earth, its atmosphere and hydrosphere. It systematically introduces the physical processes involved in the Earth's systems without assuming an advanced physics or mathematical background.

PHYSICAL PROCESSES IN EARTH AND ENVIRONMENTAL SCIENCES provides an integrated approach to the study of Earth, marine and atmospheric environmental sciences, reflecting current trends in undergraduate courses. The text considers the various Earth systems through a basic account of general physical properties, kinematics, forces and dynamics that cause flow transport and deformation. Natural examples of physical processes, rather than abstract physics and maths, are used throughout to illustrate the scientific principles involved.

2005 - 336 PAGES - ISBN13: 978-1-4051-0173-8 PB

Systematic Reviews in the Social Sciences

A Practical Guide

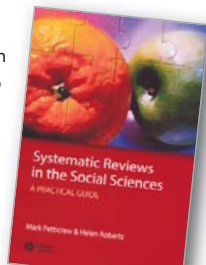

MARK PETTICREW & HELEN ROBERTS

MRC Social and Public Health Sciences Unit, Glasgow; Child Health Research and Policy Unit, City University

*"Anyone who wants to learn, or understand, about systematic reviewing should beg, borrow, steal or buy a copy of **Systematic Reviews in the Social Sciences**. It's a real gold-mine of information presented clearly and with great humour".*

SIR MICHAEL RAWLINS, CHAIRMAN, NATIONAL INSTITUTE FOR HEALTH AND CLINICAL EXCELLENCE (NICE)

This book outlines the rationale and methods of systematic reviews, giving worked examples from the social sciences and other fields. It requires no previous knowledge, but takes the reader through the process stage by stage. It draws on examples from such diverse fields as psychology, criminology, education, transport, social welfare, public health, and housing and urban policy, among others.

GIS

A Short Introduction

NADINE SCHURMAN

Simon Fraser University

"This is an excellent choice for an introductory undergraduate GIS class, and it should also be required reading for all critics who have dismissed GIS as being purely technical enterprise. It takes the reader through the nuts and bolts of GIS concepts while at the same time scrutinizing its intellectual and social implications. The discussion of GIS applications, highlighted by contemporary case studies, does an admiral job of conveying the curious messiness of actual GIS practice"

STACY WARREN, EASTERN WASHINGTON UNIVERSITY

This guide enables students of human geography to take a critical look at the theory and practices that together comprise GIS. It outlines the value - both intellectual and technical - of GIS for human geographers, recognising the positive effects GIS has had on the discipline but also pointing out its limitations.

The Handbook of Geographical Information Science

Edited by JOHN P. WILSON & A. STEWART FOTHERINGHAM

University of Southern California; National University of Ireland, Maynooth

This **HANDBOOK** is an essential reference to the rapidly expanding field of Geographic Information Science. Designed to suit those who want an in-depth treatment of the subject, it comprises around 40 substantial essays, each written by a recognized expert in a particular area.

The **HANDBOOK** covers the full spectrum of research in the field. Contributors explore the major trends influencing the collection, organization, and dissemination of geographically referenced data sets, and review the defining characteristics of the database solutions used in GIS products. They consider the opportunities for using GIS to conduct spatial analysis, and examine the ways in which it has been used to advance cartographic modeling and visualization. Finally, they portray GIS at work, surveying its increasing number of applications.

The editors introduce the **HANDBOOK** with an essential overview of the origins, history, and state of the art of Geographic Information Science, before providing brief summaries of the chapters that follow. They conclude the book with two final chapters setting out how Geographic Information Science is likely to evolve in the future.

Tropical Rain Forests

An Ecological and Biogeographical Comparison

RICHARD B. PRIMACK & RICHARD T. CORLETT
Boston University; University of Hong Kong

"This fascinating book provides a fresh look at the ecology of our world's tropical forests... I strongly recommend this book both to anyone with a professional interest in the biology (or biological conservation) of tropical forests, and to new graduate-level students looking for an overview of rainforest community ecology... The book is well written and always thought provoking."

Managing and Designing Landscapes for Conservation

Moving from Perspectives to Principles

Edited by **DAVID LINDENMAYER & RICHARD HOBBS**
Australian National University; Murdoch University

The distinctive relationships between landscape change, habitat fragmentation, and biodiversity conservation are highlighted in this original and useful guide to the theory and practice of ecological landscape design. Using original, ecologically-based landscape design principles, the text underscores current thinking in landscape management and conservation.

KEY TEXTBOOK

Biogeography

An Ecological and Evolutionary Approach
Seventh Edition

C. BARRY COX & PETER D. MOORE
Formerly at Kings College, London; Kings College, London

"An excellent introductory text on biogeography... clearly and neatly written, very well structured and effectively illustrated... Yet again, the authors have very successfully revitalized their classic text and I am absolutely certain that it will remain a bestseller for many more years to come."

PROGRESS IN PHYSICAL GEOGRAPHY

The latest edition of this highly successful and popular textbook has been completely revised and updated to include the latest developments in biogeography. It offers excellent insight into the multidisciplinary nature of biogeography, providing the student with a sound historical base, up-to-date factual content and a clear explanation of current controversies.

KEY TEXTBOOK

The Human Impact on the Natural Environment

Past, Present, and Future

Sixth Edition

ANDREW GOUDIE

University of Oxford

"A well-illustrated textbook, it is a brilliantly concise examinations of just how much we are changing the world around us. A classic. Geography at its best."

NEW SCIENTIST

The new edition of this classic student text provides an up-to-date and comprehensive view of the major environmental issues facing the world today, and is an essential introduction to the past, present and future impact of humans on Earth.

Following the successful structure of previous editions, this new edition has been extensively enlarged and updated, with many new figures and up-to-date statistics. Four completely new chapters explore the ways in which global climate change may have an impact on Earth in the future. Other chapters explore the impact of humans upon vegetation, animals, soils, water, landforms, and the atmosphere. A new design makes the text even more accessible and easy to use.

This important book is essential reading for undergraduates in geography or environmental science, and anyone requiring a thorough overview of the impact of humans upon natural processes and systems.

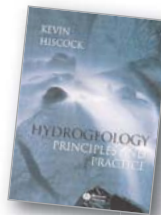

2005 - 376 PAGES - ISBN13: 978-1-4051-2704-2 PB

Hydrogeology

Principles and Practice

KEVIN HISCOCK

University of East Anglia

HYDROGEOLOGY: PRINCIPLES AND PRACTICE

provides a comprehensive introduction to the study of hydrogeology and the significance of groundwater in the terrestrial aquatic environment.

Earlier chapters explain the fundamental physical and chemical principles of hydrogeology, and later chapters feature groundwater investigation techniques and contaminant hydrogeology. The artwork and solutions to questions are available to instructors on CD-ROM.

The Lakes Handbook

Limnology and Limnetic Ecology

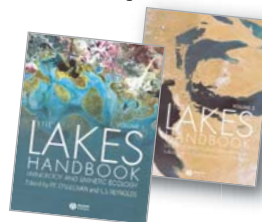

Edited by P. E. O'SULLIVAN & C. S. REYNOLDS

University of Plymouth; Centre for Ecology and Hydrology, Windermere

THE LAKES HANDBOOK provides an up-to-date overview of the application of ecologically sound approaches, methods and tools using experience gained around the world for an understanding of lakes and their management.

Volume one of the HANDBOOK addresses the physical and biological aspects of lakes pertinent to lake management, emphasizing those aspects particularly relevant to large, still bodies of water.

Volume two then considers lake management, with particular emphasis on sustainability, restoration and rehabilitation.

Environmental Anthropology

A Historical Reader

Edited by

MICHAEL R. DOVE & CAROL CARPENTER

Both Yale University

ENVIRONMENTAL ANTHROPOLOGY is a collection of historically significant readings, dating from early in the twentieth century up to the present, on the cross-cultural study of relations between people and their environment. Like the focus of many environmental movements, much recent work in ecological anthropology has been crisis-driven, with a focus on the here and now. Often missing from this work is a wider perspective - including the context in which the research itself is being done. Current work on the human dimensions of deforestation or global climate change, for example, can be informed and strengthened by an understanding of the century-old intellectual lineage of the underlying issues.

Geographies of Global Change

Remapping the World

Second Edition

Edited by **R. J. JOHNSTON,**

PETER J. TAYLOR &

MICHAEL J. WATTS

University of Bristol; Loughborough

University; University of California,

Berkeley

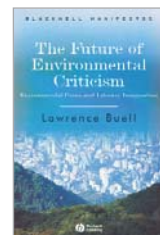

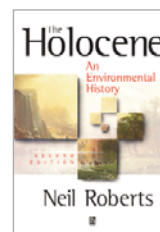

"[This] excellent collection, which more than maintains the high standards of the first edition... has been expanded and revised to take into account changes over the last six years, changes that are substantive in character, as well as changes in emphasis in the ongoing and broader debate about globalization. Always clear in its arguments, it takes the fertile theme of globalization in all its variety of expression, to demonstrate the many and nuanced ways in which geography matters. It will appeal particularly to undergraduates but it is a book from which we can all learn something."

KEVIN COX, OHIO STATE UNIVERSITY

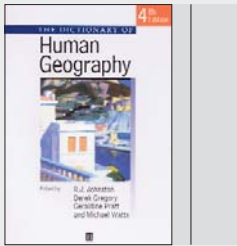

The second edition of this popular collection presents 28 specially commissioned essays by leading geographers from across the world, addressing questions about how and why the world has changed, is changing, and will continue to change.

The Introductory Reader in Human Geography

Contemporary Debates and Classic Writings

Edited by WILLIAM G. MOSELEY,
DAVID A. LANEGAN & KAVITA PANDIT
Macclester College; University of Georgia; University of Georgia

This reader is a lively and stimulating companion to standard classroom texts in human geography. Featuring a dynamic collection of material, the volume is designed to foster a clear understanding of human geography and its concepts, debates and controversies.

The topics selected are accessible to introductory students, yet enduring in their insights, influential in the development of the discipline, or relevant to contemporary policy debates. The book includes sections on: population and migration; environment; agriculture, and society; cultural geography and place; urban and economic geography; development geography; and political geography. Each chapter contains an introduction by the editors followed by several essays addressing these specific themes.

This engaging and thought-provoking resource is an ideal supplement to any introductory human geography textbook. It can also be used very effectively on its own as an introduction for anyone coming to the subject for the first time.

Cities of Whiteness

WENDY S. SHAW
University of New South Wales

"Cities of Whiteness is an important contribution to our understanding of how race works in the postmodern city. It shows in clear and convincing detail how whiteness is bound up with property, heritage and fear."

ALASTAIR BONNETT, NEWCASTLE UNIVERSITY

In **CITIES OF WHITENESS**, Wendy S. Shaw challenges existing ideas about urban change, race and cosmopolitan urbanism. By questioning the notion of white ethnicity and engaging with Indigenous peoples' experiences of whiteness – past and present, Shaw provides new ways of seeing cities and of conceptualising the processes of power that are at work within them. In doing so, she pushes the boundaries of critical race studies in geography and studies of the city more broadly.

David Harvey

A Critical Reader

Edited by NOEL CASTREE & DEREK GREGORY

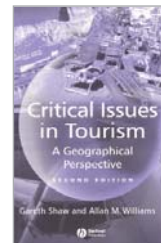

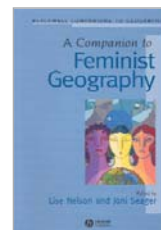

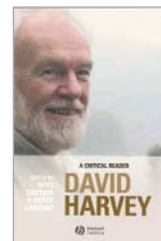

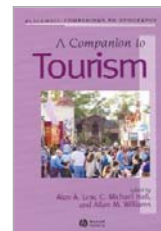

University of Manchester; University of British Columbia, Vancouver

"David Harvey: A Critical Reader is a landmark assessment of the work, and diverse influences, of this leading geographer-cum-social theorist. No stodgy hagiography, the Reader presents a series of punchy, personal, political, and often profound reflections on four decades of Harvey's contributions. In locating Harvey and his interlocutors, the Reader also suggestively maps out the shifting terrain of critical thinking around the spatialities of late capitalism."

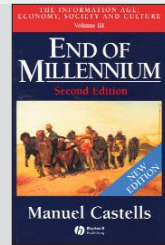

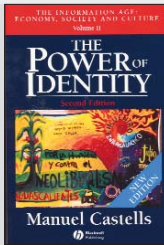

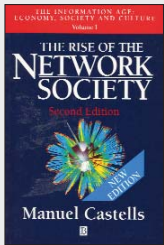

JAMIE PECK, UNIVERSITY OF WISCONSIN-MADISON

David Harvey is among the most distinguished and influential Marxist theorists of his generation. For over three decades he has published works of major insight and originality that have challenged and altered dominant intellectual-political frameworks of understanding in urban studies, geography, sociology and beyond. He remains one of the most trenchant contemporary critics of global capitalism and its effects. This book critically interrogates Harvey's work as a geographer, a Marxist and a public intellectual.

Philosophy of Technology

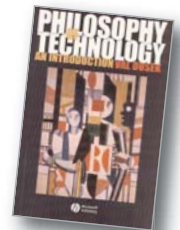

An Introduction

VAL DUSEK

University of New Hampshire

PHILOSOPHY OF TECHNOLOGY: AN INTRODUCTION skillfully guides readers through the core philosophical issues raised by technology's increasingly ubiquitous and powerful presence in society and our daily lives. Considering first the question of what technology is, Dusek goes on to address a wide range of concerns, including technocracy, technological rationality, technological determinism, and varieties of resistance to technology. Penetrating study questions at the end of each chapter provide the necessary tools to critically examine the nature of technology and its impact on our lives.

Global Movements

Action and Culture

KEVIN MCDONALD

University of Melbourne

"Global Movements is essential reading for all those trying to understand our twenty-first-century society. It is the first complex account of new forms of worldwide protest and society."

TIM JORDAN, OPEN UNIVERSITY

The past decade has witnessed an extraordinary rise of new global movements that throw into question the way we think about culture, power, and action in a globalizing world. This book surveys the field and explores some of the most significant of these movements, including antiglobalization and new Islamic movements.

The Idea of Culture

TERRY EAGLETON

University of Manchester

"As always, Eagleton shows a provocative wealth of learning. He is able to see the many sides of a problem, to put it in context and suggest new ways of viewing it, a healthy corrective to the soundbite society."

TIMES HIGHER EDUCATION SUPPLEMENT

2000 - 168 PAGES - ISBN13: 978-0-631-21966-8 PB

Cultural Geography

A Critical Introduction

DON MITCHELL

Syracuse University

"Mitchell has written a significant and provocative book that deserves and rewards serious scrutiny."

ANNALS OF THE ASSOCIATION OF AMERICAN GEOGRAPHERS

This book provides a critical evaluation of the transformation of cultural geography which has occurred over the past two decades. **CULTURAL GEOGRAPHY** explains cultural change in different geographical settings, from the politics of everyday life to the production and consumption of landscapes, to the politics of sexuality, gender, race, and nationality. Using a range of contemporary "culture wars" as examples - ranging from a struggle over public art in Denver to the politics of Jean-Marie le Pen in France - the author illustrates how cultural geographic analysis can be an important tool for understanding, and progressively intervening in contemporary cultural change.

SERIES: CRITICAL INTRODUCTIONS TO GEOGRAPHY

2000 - 352 PAGES - ISBN13: 978-1-55786-892-3 PB

World Culture

Origins and Consequences

FRANK J. LECHNER & JOHN BOLI

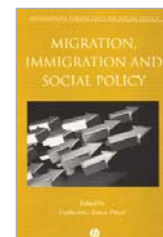

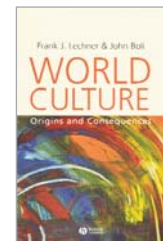

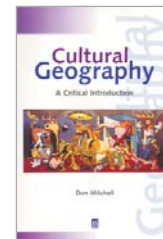

Both Emory University

This book explores the development, content, and impact of world culture. Combining two of the most fruitful theoretical perspectives on world culture - the world polity approach and globalization theory - the book traces the development of world culture from the mid-nineteenth century to the present day. It includes extensive illustrations of key issues and empirical research, gives a historical treatment of the development of world culture, and assesses the complex impact of world culture on people, organizations, and societies.

This is a provocative, synthetic, and grounded interpretation of world culture that is essential for any student or scholar of globalization and world affairs.

Postcolonialism

An Historical Introduction

ROBERT J. C. YOUNG

Wadham College, Oxford

"The foremost postcolonial theorist in Britain"

TIMES HIGHER EDUCATION SUPPLEMENT

This acclaimed study by one of the leading exponents in the field introduces 'postcolonialism' in both theoretical and historical terms. Young provides a wide-ranging analysis of postcolonial theory's emergence from anticolonial movements in Europe, Africa, Asia, and Latin America, tracing the development of a transnational third-world counter-modernity through the work of major figures of the freedom struggles, including Cabral, Connolly, Fanon, Gandhi, Guevara, Nkrumah, Mao, Mariátegui, and Senghor, and through the roles played by women activists.

Ideas of Landscape

An Introduction

MATTHEW JOHNSON

University of Southampton

IDEAS OF LANDSCAPE offers an engaging discussion of the theory and practice of landscape archaeology today. Drawing on his local experience, Matthew Johnson focuses on the so-called English landscape tradition and discusses why it is so distinctive: it stands at some distance from North American and other approaches, in which 'theory' plays a more prominent role. Johnson identifies the origins of this tradition in English Romanticism, through the influence of the 'father of landscape history' W. G. Hoskins among others, and argues that the strengths and weaknesses of landscape archaeology can be traced back to the underlying theoretical discontents of the Romantic movement.

The Blackwell Companion to Globalization

Edited by GEORGE RITZER

University of Maryland

This COMPANION features original essays on the complexity of globalization and its diverse and sometimes conflicting effects. Written by top scholars in the field, it offers a nuanced and detailed examination of globalization that includes both positive and critical evaluations. The essays focus on key questions in the debate surrounding globalization: Does globalization bring with it more or less inequality? How is power distributed globally? What role does technology play? What is the significance of the nation-state in contemporary globalization? The volume also explores the often overlooked underbelly of globalization, including coverage of international terrorism, sex trafficking, corruption, war, and environmental problems.

NEW EDITION OF
KEY TEXTBOOK

A Concise History of World Population

Fourth Edition

MASSIMO LIVI-BACCI
University of Florence

Since its original publication in 1992, this book has become the standard history of world population. It examines the changing patterns of its growth, and the effects of migrations, wars, disease, technology, and culture. Its underlying purpose is to explain the links between nature, culture, and population and thereby to look at ways of preventing future environmental collapse and human catastrophe. It is valued for its informative and accessible style, the reasoned treatment of issues crucial to the future of every species, and the contemporary recasting of theory.

HIV and AIDS in Africa

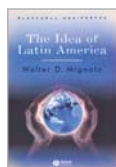

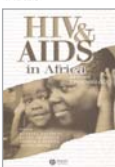

Beyond Epidemiology

Edited by **EZEKIEL KALIPENI, SUSAN CRADDOCK, JOSEPH R. OPPONG & JAYATI GHOSH**

University of Illinois at Urbana-Champaign; University of Minnesota; University of North Texas; Dominican University of California

HIV AND AIDS IN AFRICA: BEYOND EPIDEMIOLOGY seeks to shift the predominant understandings generated by biomedical and epidemiological research, recognizing that HIV transmission in sub-Saharan Africa is a complex and regionally-specific phenomenon rooted in local economies, deepening poverty, migration, gender, war, global economies, and cultural politics. International contributors from across the social sciences further our understanding of AIDS by looking at the epidemic from angles often inadequately explored.

Economic Geography

A Contemporary Introduction

NEIL M. COE, PHILIP F. KELLY &
W. C. YEUNG

University of Manchester; York University, Toronto; National
University of Singapore

"Economic Geography brings teaching and learning in economic geography into the twenty-first century. Nothing like it has been written before. The text uses the whole world for its illustrations, and its open-minded theoretical sensibility resonates perfectly with the discipline. Economic geography has a text appropriate for the world in which we now live."

TREVOR BARNES, UNIVERSITY OF BRITISH COLUMBIA

"At long last, a new, innovative, thought-provoking, introductory economic geography text - one that combines current theoretical insights with an impressive array of issue-based empirical examples drawn from across the world. Challenging and stimulating - Coe, Kelly and Yeung have set a new standard."

PETER DICKEN, UNIVERSITY OF MANCHESTER

This book introduces and explores the contemporary geographical insights into economic processes. Using an innovative style it poses and debates topical questions from an economic-geographical perspective.

- ❑ Contrasts a distinctively geographical approach with popular conceptions and assumptions in economics and management studies.
- ❑ Debates a wide range of topics including economic discourses, uneven development, commodity chains, technology and agglomeration, the commodification of nature, states, transnational corporations, labour, consumption, economic cultures, gender, and ethnic economies.
- ❑ Is richly illustrated with examples, vignettes, and case studies drawn from a variety of sectors around the world.
- ❑ Includes a rich array of photos, figures, text boxes, sample essay questions and annotated lists of further reading.

Turf Wars

Discourse, Diversity, and the Politics of Place

GABRIELLA GAHLIA MODAN

Ohio State University

TURF WARS: DISCOURSE, DIVERSITY, AND THE POLITICS

OF PLACE is the fascinating story of an urban neighborhood undergoing rapid gentrification. It is a story about how the members of a multi-ethnic, multi-class Washington, D.C., community deploy language to project conflicting images of their neighborhood. Waging wars around such issues as public toilets and public urination, the 'morality' of co-ops and condos, and characterizations of 'good' girls and 'bad' boys, community members use these themes to create identities for themselves as legitimate community members (e.g. as tough urbanites or sophisticated historic preservationists) while creating identities to discredit others (e.g. 'people who belong in the suburbs'). **TURF WARS** taps the power of discourse analysis to provide insight into the ways that local activity shapes larger urban social processes.

Designing Cities

Critical Readings in Urban Design

Edited by ALEXANDER R. CUTHBERT

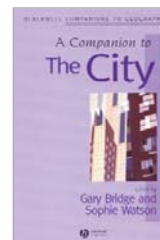

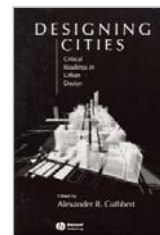

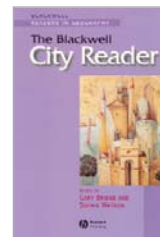

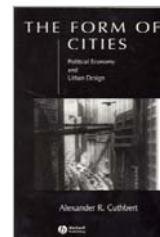

University of New South Wales, Sydney

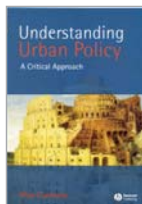

The volume has been carefully structured to help students gain an understanding of the theoretical context from which urban design has emerged. At the same time, it promotes a particular theoretical paradigm, suggesting that urban design is best viewed as a branch of spatial political economy. The selection of articles advances this idea as far as possible, both in its organization and in its content.

Understanding Urban Policy

A Critical Introduction

ALLAN COCHRANE

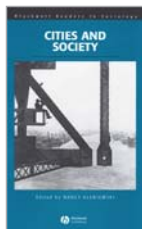

The Open University

"An immensely enjoyable book, bringing a valuable historical perspective to bear and written in a critical but lucid style... it will challenge and enlighten its readers."

PAUL BURTON, UNIVERSITY OF BRISTOL

This extensive and theoretically informed review of the evolution of urban policy since the 1960s explores its complex interaction with changing understandings of urban life and social welfare. Highlighting connections and continuities, it examines a broad range of issues that have helped to define urban policy at different times and in different places, including race, economic regeneration and competitiveness, managing dangerous places, community, and managerialism.

Readings in Planning Theory

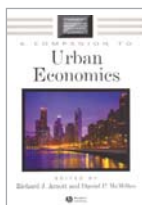

Second Edition

Edited by SCOTT CAMPBELL & SUSAN S. FAINSTEIN

University of Michigan; Harvard University

The second edition of this very successful volume examines the current state of planning theory and the new directions it has taken in recent years. The editors have selected a set of classic and contemporary writings to address a central question: What role can planning theory play in making the good city and region within the constraints of a capitalist political economy and a democratic political system?

Cities of Tomorrow

An Intellectual History of Urban Planning and Design in the Twentieth Century
 Third Edition

PETER HALL

University College London

"Cities of Tomorrow remains the definitive story of modern Euro-American planning. The seamless integration of new information and perspectives in this latest edition reaffirms its status as a classic, compelling and extraordinarily readable synthesis."

ROBERT FREESTONE,
 UNIVERSITY OF NEW SOUTH WALES

A Companion to Urban Economics

Edited by RICHARD J. ARNOTT & DANIEL P. MCMILLEN

Boston College; University of Illinois at Chicago

A COMPANION TO URBAN ECONOMICS provides a state-of-the-art overview of this field, communicating its intellectual richness through a diverse portfolio of authors and topics. The text provides a set of expert, conceptually interesting, and engagingly written essays that together demonstrate the spirit of modern urban economics.

SERIES: BLACKWELL COMPANIONS TO CONTEMPORARY ECONOMICS

Real Estate Appraisal

From Value to Worth

SARAH SAYCE, RICHARD COOPER, JUDY SMITH & PIERS VENMORE-ROWLAND

Kingston University; Kingston University; Chartered Surveyor; I-Analysis Training, Property Financial Consultants

This book takes a new approach to property appraisal by exploring the pricing mechanism in this changing context. It develops the notion of the pricing mechanism in relation to property and covers practical issues of comparison and the real problems in applying valuation theory. For supporting material please go to www.blackwellpublishing.com/sayce

Neighbourhood Renewal and Housing Markets

Community Engagement in the US and UK

Edited by **HARRIS BEIDERD**

University of Birmingham

"This is an exciting and important book. It contains a wealth of material on topics that include community renewal, ethnic relations, participation, conflict, and urban change. It successfully bridges the transatlantic divide, offering a wide array of valuable insights for researchers, policy-makers and students."

MALCOLM HARRISON, UNIVERSITY OF LEEDS

NEW

Urban Economics and Real Estate

Theory and Policy

JOHN MCDONALD & DANIEL MCMILLEN

Both University of Illinois at Chicago

"This masterful book by two of the most active researchers and clearest expositors in urban economics renders cutting-edge research on contemporary issues accessible to the general reader. Its fresh perspective yields both precision and incisiveness."

MARCUS BERLIANT, WASHINGTON UNIVERSITY, ST. LOUIS

Unique in its coverage, **URBAN ECONOMICS AND REAL ESTATE** allows an instructor to teach separate courses in either urban economics or urban real estate, or a blend of the two topics. Given the rapidly changing empirical side of urban demography, the text is accompanied by a website with new examples added annually and various discussions and tips about the latest data sets that become available.

SEPTEMBER 2006 - 640 PAGES
ISBN13: 978-1-4051-3118-6 HB

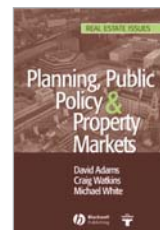

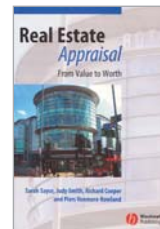

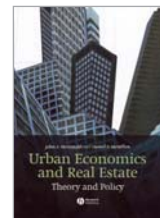

Planning, Public Policy & Property Markets

DAVID ADAMS, CRAIG WATKINS & MICHAEL WHITE

University of Glasgow; University of Sheffield; Heriot-Watt University

The focus of this book is on how public policy - and especially the planning system - both shapes and reflects the essential characteristics of land and property markets. It challenges the common misconceptions that property markets operate in isolation from public policy and that planning permission is the only significant form of state intervention in the market.

Urban China in Transition

Edited by JOHN R. LOGAN

Brown University

With China rapidly becoming a world power, this book evaluates such multi-dimensional changes as migration, crime, gated communities, neighborhood associations, suburbanization and women's status.

Chapters are co-authored by experts on urban Chinese life together with others whose expertise is on the particular topic. Comparisons to urban areas in the United States, Eastern Europe, Asia, and South America pose thoughtful questions about the possible trajectory of Chinese urban development, while underscoring its uniqueness. The result is a broad theoretical and historical perspective that sharply focuses the Chinese experience through alternative prisms, thus enriching theoretical discussion and debate.

Getting Into Local Power

The Politics of Ethnic Minorities in British and French Cities

ROMAIN GARBAYE

University of Paris, Sorbonne

Romain Garbaye presents a comparison of the politics of ethnic minorities in British and French cities, with a focus on the election of city councillors in Birmingham, Lille and Roubaix between 1980 and 2001. It shows that, while the Labour-run Birmingham City Council has co-opted a significant number of councillors of African-Caribbean and Asian background, the population of North African origins in Lille has obtained little or no representation.
