The Blackwell Dictionary of Sociology

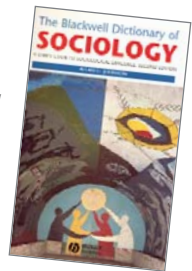

A User's Guide to Sociological Language
Second Edition

ALLAN G. JOHNSON

Hartford College

"Here is a book that every academic library and every department of sociology should own. The author's short opening essay is clear and valuable [and he] has chosen his vocabulary items well. Every word I looked up was there. His essay definitions are good, and closely representative of the discipline, [and] he precisely grasps the distinctive elements of each concept."

CONTEMPORARY SOCIOLOGY

This second edition of Allan G. Johnson's one-volume dictionary includes 75 new entries, as well as an expanded biographical section, extensive revisions and updates, and more thorough cross-referencing. The combination of clear prose, engaging examples, a single author's voice, and minimal assumptions about the average reader's prior knowledge of the field, makes this a distinctive and valuable reference work.

Johnson defines amorphous and fuzzy sociological concepts in a lively and sensible way and his book provides an introduction to what it means to think sociologically. For a deeper understanding of social life, and of the only discipline dedicated to making sense of it in all its diversity, this **DICTIONARY** is a perfect guide.

Classical Sociological Theory

Second Edition

Edited by CRAIG CALHOUN, JOSEPH GERTEIS, JAMES MOODY, STEVEN PFAFF & INDERMOHAN VIRK

New York University; University of Minnesota; Ohio State University; University of Washington; Indiana University, Bloomington

"Comprehensive but judicious, the editors have established the definitive canon of what is important in classical sociology. An invaluable contribution to teaching and to the appreciation of the classical tradition, the second edition is essential reading."

BRYAN S. TURNER, EDITOR OF THE CAMBRIDGE DICTIONARY OF SOCIOLOGY

This comprehensive collection of classical sociological theory is the definitive guide to the roots of sociology from its undisciplined beginnings to its current guideposts and reference points in contemporary sociological debate. The volume:

- ▣ Explores influential works of Marx, Durkheim, Weber, Mead, Simmel, Freud, Du Bois, Adorno, Marcuse, Parsons, and Merton
- ▣ Provides editorial introductions which lend historical and intellectual perspective to the substantial readings
- ▣ Includes a new section with new readings on the immediate 'pre-history' of sociological theory, including the Enlightenment and de Tocqueville
- ▣ Updates individual reading selections throughout.

Contemporary Sociological Theory

Second Edition

Edited by CRAIG CALHOUN, JOSEPH GERTEIS, JAMES MOODY, STEVEN PFAFF & INDERMOHAN VIRK

New York University; University of Minnesota; Ohio State University; University of Washington; Indiana University, Bloomington

"This new, and much improved, edition of a superior reader offers a judicious sampling of influential readings in contemporary sociological theory admirably supplemented by knowing editorial overviews."

MICHAEL HECHTER, ARIZONA STATE UNIVERSITY

This meticulous collection of contemporary sociological theory is the definitive guide to current perspectives and approaches in the field. The text:

- ▣ Includes the work of major figures including Foucault, Giddens, Bourdieu, Bauman, and Habermas
- ▣ Is organized thematically, with editorial introductions to put the readings into theoretical perspective
- ▣ Examines current key topics in the field such as such as symbolic interactionism, phenomenology, structuralism, network theory, critical theory, feminist theory, and the debates over modernity and postmodernity
- ▣ Includes new selected readings to bring the collection right up to date.

From Modernism to Postmodernism

An Anthology

Expanded Second Edition

Edited by **LAWRENCE E. CAHOONE**

College of the Holy Cross

This revised and expanded second edition of Cahoone's classic anthology provides an unparalleled collection of the essential readings in modernism and postmodernism.

The anthology puts contemporary debate in the context of the criticism of modernity since the seventeenth century, thus allowing the reader to appreciate postmodernism by first understanding the development of modernity.

Social Theories of Risk and Uncertainty

Edited by **JENS O. ZINN**

University of Kent at Canterbury

Written by leading experts in the field, **SOCIAL THEORIES OF RISK AND UNCERTAINTY** is an introduction to mainstream theorizing on risk and uncertainty in sociology. The book provides an overview of the historical developments and conceptual aspects of risk, identifies why theorizing on risk is necessary, and highlights specific sociological contributions to this field of research. Individual chapters explore key topics including: risk society and reflexive modernization, culture and risk, governmentality and risk, systems theory and risk, and edgework and voluntary risk taking.

This volume is an excellent resource that establishes the basis for further theorizing and future research. Ultimately it offers a comprehensive look at the promises, pitfalls, and perspectives of risk theorizing.

The Blackwell Dictionary of Modern Social Thought

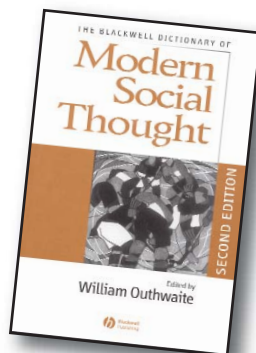

Second Edition

Edited by **WILLIAM OUTHWAITE**

University of Sussex

"This is still the best dictionary around and an effective antidote to the inflated importance given to current gurus of social thought. Students could abandon their textbooks and follow this reference trail."

MARGARET ARCHER, UNIVERSITY OF WARWICK

Modern social thought ranges widely across the social sciences, philosophy, political theories and doctrines, cultural ideas and movements, and the influence of the natural sciences. This **DICTIONARY** provides an authoritative and comprehensive overview of the main themes of social thought, principal schools and movements of thought, and those institutions that have been the subject of social analysis or engendered significant doctrines and ideas.

Detailed entries cover major currents of thought, philosophical and cultural trends, and the individual social sciences from anthropology to welfare economics. These are supplemented by shorter accounts of specific concepts and phenomena.

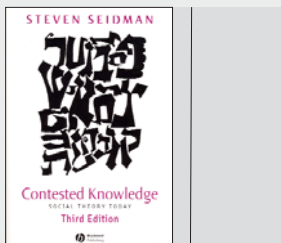

This second edition updates about 200 entries and includes new entries on the internet, ethnic cleansing and other topics. Each entry includes suggestions for further reading, and the volume contains a bibliography of all sources cited within the text.

KEY TEXTBOOK

Contested Knowledge

Social Theory Today
Third Edition

STEVEN SEIDMAN

State University of New York, Albany

"There is no better social theory text for demonstrating to students the political relevance of both past and current social thinkers. Seidman compellingly argues for a more lively, publicly-engaged sociology."

Contested Knowledge is required reading for any discussion of how social theory can help us make sense of our own times."

NANCY L. FISCHER,
MACALESTER COLLEGE

CONTESTED KNOWLEDGE combines social analysis and moral advocacy, showing how social theory can and does -- and sometimes doesn't -- work within the public and political sphere. This third edition has been reorganized to be more accessible for the student, and includes a new chapter on social theory today, and several short biographies on major social theorists.

Anthropologies of Modernity

Foucault, Governmentality, and Life Politics

Edited by **JONATHAN XAVIER INDA**

University of California, Santa Barbara

ANTHROPOLOGIES OF MODERNITY brings together a range of anthropological writings inspired by the French philosopher Michel Foucault - specifically by his work on governmentality and biopower. It considers Foucault's contribution to current theories of modernity and treats modernity as an ethnographic object by focusing on its concrete manifestations.

Thinking Sociologically

Second Edition

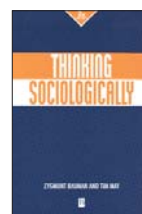

ZYGMUNT BAUMAN & TIM MAY

Universities of Leeds and Warsaw; University of Salford

In this lucid, stimulating and original book, Zygmunt Bauman and Tim May explore the underlying assumptions and tacit expectations which structure our view of the world. The authors elucidate key concepts in sociology: for example, individualism versus community, and privilege versus deprivation. While charting a course through sociology's main concerns, Bauman and May also examine the applicability of sociology to everyday life.

Contemporary Philosophy of Social Science

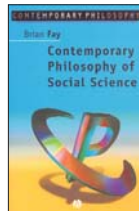

A Multicultural Approach

BRIAN FAY

Wesleyan University

"In a textbook fashion that is accessible to undergraduate and graduate students alike, Fay offers a multicultural/dialectical approach to social inquiry that is designed to eliminate the traditional dualistic way of thinking that currently dominates the philosophy of social science. For those who are wont to explore the many questions that philosophers of social science are most interested in examining, I would definitely suggest Fay's book. He clearly articulates and assesses many of the difficult arguments in the philosophy of social science."

Sociological Methodology, Volume 36

Edited by **ROSS M. STOLZENBERG**

Late of University of Chicago

SOCIOLOGICAL METHODOLOGY is a compendium of new and sometimes controversial advances in social science methodology. Contributions come from diverse areas and have something useful - and often surprising - to say about a wide range of topics ranging from legal and ethical issues surrounding data collection to the methodology of theory construction. In short, **SOCIOLOGICAL METHODOLOGY** holds something of value - and an interesting mix of lively controversy, too - for nearly everyone who participates in the enterprise of sociological research.

Citizenship

Discourse, Theory, and Transnational Prospects

PETER KIVISTO & THOMAS FAIST

Augustana College; University of Bielefeld

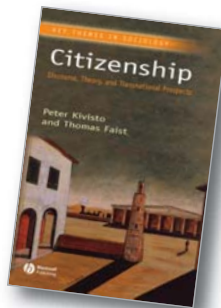

A significant addition to the growing body of literature in the field, this volume explores the important role of citizenship in the world's liberal democracies and how it is evolving. Long a neglected topic in the social sciences, citizenship is now at the forefront of scholarly discussions on democracy worldwide. In an increasingly global society, constructive dialogue on various themes shaping citizenship studies is indispensable.

CITIZENSHIP reviews the four broadly conceived themes that shape contemporary citizenship - inclusion, erosion, withdrawal, and expansion - and highlights their interconnectedness. This important new look at the current and future state of citizenship will appeal to anyone interested in the study of immigration, political sociology, or globalization.

Globalization and Sport

Edited by RICHARD GIULIANOTTI & ROLAND ROBERTSON

University of Durham; University of Aberdeen

GLOBALIZATION AND SPORT is a unique collection which places sport at the heart of debates on global processes. The book is the first of its kind to feature major critical interventions by some of the world's leading sociologists and anthropologists on the subject of sport. The collection contains articles by the editors (Richard Giulianotti and Roland Robertson), George Ritzer, David Andrews, Frank Lechner, William Kelly, Thomas Hylland Eriksen, Barry Smart, Paul James, Chris Rumford, and Gary Armstrong. The chapters provide a mixture of original theories and fresh research material, examining sport in a diversity of settings, including Europe, the Americas, Australasia, Africa, and Asia.

The book will be essential reading for anyone interested in globalization processes or sport. It will appeal to students and academics across disciplines, notably in sociology, anthropology, sport studies, cultural studies, political science, and international relations.

Saving Globalization from Itself

GUILLERMO DE LA DEHESA
Centre for Economic Policy Research

SAVING GLOBALIZATION FROM ITSELF examines the two fundamental arguments that are often raised against globalization: that it produces inequality and that it increases poverty. Here Guillermo de la Dehesa, current Chairman of the Centre for Economic Policy Research, demonstrates how despite popular belief, acceleration of globalization actually stands to reduce the levels of poverty and inequality worldwide and explains, in detail, the ways in which wealthy nations and developing countries alike have failed to implement changes that would result in a reversal of these social ills. Dehesa dispels the notion of the so-called 'victim of globalization' and poses the question: could increased technological, economic, and cultural change actually save the world from international income inequality; and by extension, further violence, terrorism, and war?

Winners and Losers in Globalization

GUILLERMO DE LA DEHESA

Centre for Economic Policy Research

Is globalization a limitless source of benefit to humanity? Or is it responsible for the increasing gap between wealthy and poor nations, job flight and a host of other ills? How can the positive results of globalization be shared more broadly and any negative effects be minimized? In this book Guillermo de la Dehesa offers an objective and dispassionate analysis of the emotionally charged globalization debate, detailing the economic effects of globalization on individuals, governments, nation states and businesses.

Global Movements

Action and Culture

KEVIN MCDONALD

University of Melbourne

"Global Movements is essential reading for all those trying to understand our twenty-first-century society. It is the first complex account of new forms of worldwide protest and society."

TIM JORDAN, OPEN UNIVERSITY

The past decade has witnessed an extraordinary rise of new global movements that throw into question the way we think about culture, power, and action in a globalizing world. This book surveys the field and explores some of the most significant of these movements, including antiglobalization and the new Islamic movements.

These movements require a rethinking of the very idea of social movement, a concept that owes a great deal to the civic and industrial culture that was so critical to Western modernity, but may be less adequate when exploring forms of culture, action, and communication in a globalized world. This book explores key dimensions of these movements, the tensions they confront, and the crises to which they are subject. It will provide an essential text for students on globalization and social movements.

Decolonizing Development

Colonial Power and the Maya

JOEL WAINWRIGHT

The Ohio State University

DECOLONIZING DEVELOPMENT extends the debate over the ways that colonialism shaped the modern world by examining the relationship between colonialism and development as forms of power. Bringing postcolonialism and political economy together to study the experience of development among the Maya of Belize, this book argues that the hegemony of capitalism as development was built when colonialism extended capitalist social relations to the corners of the globe. In this process, colonized spaces - such as the Mesoamerican home of the Maya - were transformed into state territory under the sway of national development.

DECOLONIZING DEVELOPMENT breaks new ground by showing that development constitutes a fundamental postcolonial aporia: it creates the very problems that it aims to solve - such as power inequalities and unsustainable livelihoods - and yet it remains essentially necessary. Development politics is therefore a stage upon which colonial struggles are replayed. For its novel analysis of these dynamics, this book will be of great value to scholars of postcolonialism, development, geography, and the Maya.

China's Limits to Growth

Greening State and Society

Edited by PETER HO & EDUARD B. VERMEER

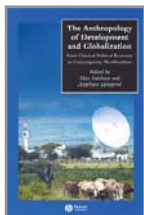

University of Groningen; Leiden University

China's dependence on coal to fuel its economic growth is expected to cause the country to surpass the USA as the leading national emitter of greenhouse gases within the next two decades. Moreover, should the number of privately-owned cars in China grow to equal that in the USA, demand for oil would exceed worldwide production by almost one fifth. This book brings together a multi-disciplinary team of experts to study the environmental challenge posed by China's phenomenal growth.

CHINA'S LIMITS TO GROWTH: GREENING STATE AND SOCIETY reviews the country's environmental experience with regard to issues such as cleaner production, green car technology, resettlement resulting from dam building, and biotechnology. Moving beyond the traditional dichotomy between alarmist, radical views and moderate notions of incremental change, the book's contributors suggest that Chinese development presents compelling reasons for rethinking the viability of greening.

The Anthropology of Development and Globalization

MARC EDELMAN & ANGELIQUE HAUGERUD

City University of New York; Rutgers University

Development — is it a powerful vision of a better life for the half of the world's population who subsist on two dollars a day? Or is it a failed Enlightenment legacy, an oppressive 'master narrative'? Such questions inspire a field newly animated by theories of globalization, modernity, cultural hybridity, and transnationalism. **THE ANTHROPOLOGY OF DEVELOPMENT AND GLOBALIZATION** is a collection of readings that provides an unprecedented overview of this field that ranges from its classical origins to today's debates about the 'magic' of the free market.

Twilight Institutions

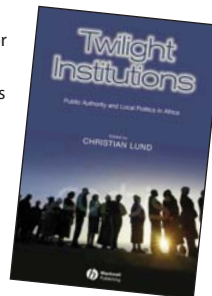

Public Authority and Local Politics in Africa

Edited by **CHRISTIAN LUND**

Roskilde University

State and society are powerful concepts, but actual public institutions in Africa defy clear-cut distinctions. Questions of citizenship, property and security are not the preserve of the state. While formal government is often weak and sometimes failing, public authority is dislocated to, or appropriated by, other institutions that endeavor to act as the state. Focusing on the condition of public authority in Africa, **TWILIGHT INSTITUTIONS** investigates how a range of institutions seek voluntary compliance to their authority, and claim legitimacy in an attempt to govern.

This volume approaches public authority 'from below', exploring a variety of concrete encounters between forms of public authority and the more or less mundane practices of ordinary people. The expertly written essays in this collection reflect upon the failure of government institutions to maintain control; while there is no shortage of institutions attempting to exercise authority, none is continuously successful. Fading in and out of power, these institutions operate in the twilight between state and society, between public and private.

Global Issues

An Introduction
Third Edition

JOHN L. SEITZ
Wofford College

"This is a very interesting book. On the one hand its range of titles suggests little out of the ordinary. On the other hand its treatment of the subject matter and the very restrained use of language make it an ideal book to use for discussions on these issues. It doesn't try to preach neither does it over-simplify. Even though the text appears to be pitched at an older audience, lower secondary students would find the text accessible. For a good overview on the pros and cons of key current issues this book is hard to beat."

TEGNEWS (OF THE PREVIOUS EDITION)

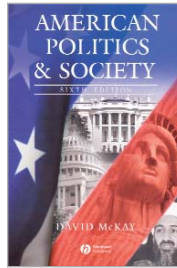

GLOBAL ISSUES is an introduction to many of the most important environmental, economic, social, and political concerns of modern life. This third edition:

- ❑ Offers a unified perspective on a complex range of global issues in a variety of societies, both developed and developing
- ❑ Includes new sections on foreign aid and development assistance, terrorism, the relationship between geography and wealth and poverty, food and the overweight, and the Millennium Development Goals
- ❑ Features an updated and expanded section on climate change, as well as a new glossary
- ❑ Illustrates key topics and issues with diagrams and photographs
- ❑ Provides guides to further reading, media, and internet resources, and suggestions for discussing and studying the material.

Short Contents:

Introduction: The Creation of Global Issues. **1.** Wealth and Poverty. **2.** Population. **3.** Food. **4.** Energy. **5.** The Environment. **6.** Technology. **7.** Alternative Futures.

Political Keywords

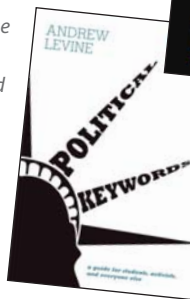

A Guide for Students, Activists, and Everyone Else

ANDREW LEVINE

University of Maryland at College Park

"Andrew Levine's **Political Keywords** is at the same time a political dictionary, a course on political philosophy, and an analysis of the current political scene and prospects. It is also extremely readable, its abundant learning lightened by Levine's openness and wit, all helping to make **Political Keywords** accessible to a wide range of people interested in politics, propaganda, and the human prospect."

EDWARD S. HERMAN, CO-AUTHOR (WITH NOAM CHOMSKY) OF *MANUFACTURING CONSENT*, AND AUTHOR OF *BEYOND HYPOCRISY: DECODING THE NEWS IN AN AGE OF PROPAGANDA*

The entries in **POLITICAL KEYWORDS** work together to create a timely dictionary of contemporary political vernacular from 'alienation' to 'Zionism'. Extensive cross-referencing, suggested further readings, and a comprehensive glossary make **POLITICAL KEYWORDS** the ideal guide to navigating a landscape of dangerously vague terms.

Edited by **KIM ENGLAND & KEVIN WARD**

University of Washington, Seattle; University of Manchester

"Neoliberalism is a word that can easily come to mean everything and so nothing. And yet the process and relations of 'neoliberalization' are far more significant than either of these meanings. By focussing on places in which neoliberalization is shaped and experienced and on critical analyses of the processes and relations of which it is constituted, this book reveals its profound importance."

ROGER LEE, QUEEN MARY, UNIVERSITY OF LONDON

This book emphasizes the complexity and contingency of neoliberalization through a variety of topics across a range of settings in the Global North and the Global South. The book is an analysis of cultural, social as well as political economic expressions of neoliberalization and argues for an appreciation of the relational geographies of neoliberalization.

"The author clearly lays out major ideas and conflicts regarding these variables using both historical and contemporary thinkers, including de Beauvoir, Marx, Weber, Bourdieu, and W.J. Wilson... Highly Recommended."

CHOICE

GENDER, RACE, AND CLASS is a critical overview of these three well-known dimensions of the social world. The study of these as a combined topic has evolved over the years, and this concise, accessible volume shows why the subject continues to resonate both in and outside the academy. Drawing on both scholarly and popular cultural examples to illustrate the workings of gender, race, and class, the book synthesizes the wealth of research on each of the topics, while also presenting a set of intellectually and politically compelling reasons for analyzing them together.

Drawing upon the expertise of a cadre of scholars and practitioners, this book has four parts: conceptualizing violence and exploitation against females; violence against girls and female adolescents; violence against women; and cultural and international perspectives on violence against women. Contributors place violence against women and girls within a variety of cultural and religious perspectives, and also present theories of violence, the role of stereotyping, and the effect of violence in the larger community. Issues addressed include cyber violence, female genital mutilation, violence against elderly women, disabled women, and pregnant women, and public health issues.

The Maternal Wall

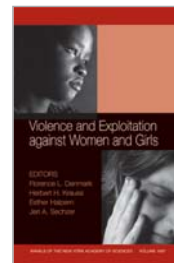

Research and Policy Perspectives on Discrimination against Mothers

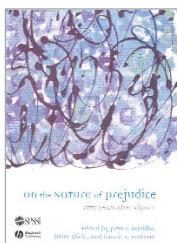

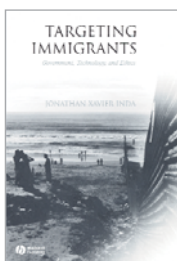

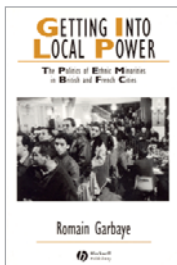

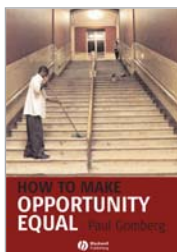

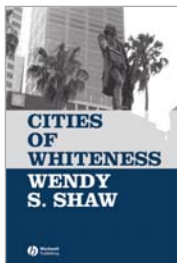

Edited by MONICA BIERNAT, FAYE J. CROSBY & JOAN WILLIAMS

University of Kansas at Lawrence; University of California, Santa Cruz; University of California; Hastings College of Law

Over the past few decades, the feminist revolution has brought a lot of changes. There is a lot of evidence that the glass ceiling is being shattered. For one particular group, however, gender equity remains elusive. That group is working mothers, for whom the problem of the 'glass ceiling' has now turned into a related, different problem: 'the maternal wall'.

Cities of Whiteness

WENDY S. SHAW

University of New South Wales

In **CITIES OF WHITENESS**, Wendy S. Shaw challenges existing ideas about urban change, race and cosmopolitan urbanism. By questioning the notion of white ethnicity and engaging with indigenous peoples' experiences of whiteness - past and present, Shaw provides new ways of seeing cities and of conceptualising the processes of power that are at work within them. In doing so, she pushes the boundaries of critical race studies in geography and studies of the city more broadly.

An Introduction to Diaspora

JANA EVANS BRAZIEL

University of Cincinnati

AN INTRODUCTION TO DIASPORA is a critical introduction to diaspora and the field of diasporic studies. The book surveys patterns of diasporic movement (economic migration, political asylum, and global capital or 'corporate' mobility) and the myriad issues impacting various diasporic communities globally. It also highlights key issues (labor, gender, sexuality, race, transnational activism, global capitalism) that are significant to contemporary discussions of diaspora or diasporic studies.

How to Make Opportunity Equal

Race and Contributive Justice

PAUL GOMBERG

Chicago State University

Distributive injustices such as low pay, inferior healthcare and housing, as well as diminished opportunities in school continue to blight the lives of millions of the urban poor in America and beyond. This book announces a new theory of justice. Paul Gomberg focuses on how race and class inevitably structure unequal life prospects. He shows how human society can be organised in a way that does not socialize children for lives of routine labor and proposes that true equality of opportunity comes only when all labor, both routine and complex, is shared.

The Idea of English Ethnicity

ROBERT J. C. YOUNG

New York University

In recent years, particularly since devolution in the UK, there have been many attempts to identify what exactly Englishness really involves. In this major contribution to debates about English identity, leading cultural theorist Robert J. C. Young argues that the uncertainty about the nature of the English is the long-term result of the fact that in the nineteenth and early twentieth centuries Englishness was never really about England, the place, its essence, or its national character, at all. It was rather developed as a form of ethnic identity for those who were precisely not English, but rather made up the English diaspora around the world.

Science, Technology, and Society

A Sociological Approach

WENDA K. BAUCHSPIES,
JENNIFER CROISSANT &
SAL RESTIVO

Pennsylvania State University; University of Arizona;
Rensselaer Polytechnic Institute

"In clear and understandable language, this introduction to STS brings home the point that science and technology are social constructions by human communities. Its applications range from science's border with religion, to cyborgs, robots, and new reproductive technologies. Students will quickly turn on to what STS is all about."

RANDALL COLLINS,
UNIVERSITY OF PENNSYLVANIA

SCIENCE, TECHNOLOGY, AND SOCIETY: A SOCIOLOGICAL APPROACH is a comprehensive guide to the emergent field of science, technology, and society studies and its implications

for today's culture and society. Written in an accessible style, and designed especially for students, the book emphasizes the sociological sciences as the foundation for STS studies. It opens with a discussion of current STS topics, research tools, and theories, and tackles some of the most urgent issues on the STS agenda: power and culture, race, gender, colonialism, the internet, cyborgs and robots, and biotechnology.

Case studies highlight particular ideas and their practical application. A glossary and further reading suggestions complete **SCIENCE, TECHNOLOGY, AND SOCIETY**, making it an indispensable introduction to a controversial area of inquiry.

Science and Technology in Society

From Biotechnology to the Internet

DANIEL LEE KLEINMAN

University of Wisconsin-Madison

"An excellent book for an introduction to science and technology studies in the context of a social science survey course or seminar."

CHOICE

This thoughtful and engaging text challenges the widely held notion of science as somehow outside society, and the idea that technology proceeds automatically down a single, inevitable path. Through specific case studies involving contemporary debates, this book shows that science and technology are fundamentally part of society and are shaped by it.

Drawing on concepts from political sociology, organizational analysis, and contemporary social theory, this book is a first-rate study of technoscience that places power, stratification, and discourse at its center. The author shows how actors (typically social groups or organizations) in powerful positions shape developments in technoscience in significant ways, and how new developments affect people differently depending on class, race, gender, and geographical location. Avoiding dense theoretical debate, this book is ideal for those interested in science and technology studies.

SOCIAL SCIENCE & MEDICINE
(OF THE SECOND EDITION)

Sociology and its applications are key components of the core foundation programme taught to all nursing students on degree and diploma courses. This acclaimed textbook explores the nature of sociology and sociological research, and their application to health and healthcare. It is organized in four parts: the nature of sociology and sociological research, the social patterning of health and disease, the social aspects of illness and dying; and the organization and delivery of health care.

This new edition explores current contexts of nursing and interprofessional working. It examines new approaches to understanding social inequalities in health, and experiences of chronic illness and dying, and explains recent changes in the NHS and health policy and explores their implications for nursing.

The Blackwell Companion to Medical Sociology

Edited by **WILLIAM C. COCKERHAM**

University of Alabama, Birmingham

THE BLACKWELL COMPANION TO MEDICAL SOCIOLOGY is a comprehensive collection of 26 original essays by leading medical sociologists from all over the world. The articles are organized both topically and by region to provide thorough coverage of the concerns, issues, and future directions of the discipline.

Editor William C. Cockerham contributes a fine introductory chapter that analyzes the field and then organizes the book in two parts. Part One covers the substantive areas of medical sociology, including essays on the sociology of the body, women's health, work stress, and the modern health care system. Part Two then applies those subjects to individual countries and societies in the Americas, Europe, the Middle East, Asia, and Africa to provide a comparative reference for the most important topics in the field. This **COMPANION** thoroughly demonstrates that every region has its own unique medical perspectives and practices.

Why Youth is Not Wasted on the Young

Immaturity in Human Development

DAVID F. BJORKLUND

"In this accessible and provocative work, David Bjorklund argues that childhood is not just a training for adulthood. Rather, it serves important adaptive functions that we need to acknowledge and value."

SIR MICHAEL RUTTER, AUTHOR OF GENES AND BEHAVIOR

Challenging common perceptions of children as simply 'adults in training', **WHY YOUTH IS NOT WASTED ON THE YOUNG** urges readers to re-examine childhood through an evolutionary lens, seeing it as an essential stage of development with its own unique purposes, separate from those of adulthood; a time of growth and discovery that should not be rushed.

The Hidden Life of Girls

Games of Stance, Status, and Exclusion

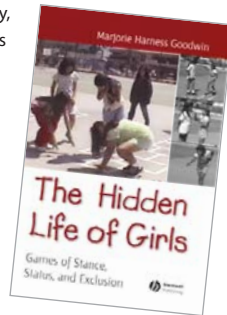

MARJORIE HARNESS GOODWIN

University of California, Los Angeles

"This fascinating and important book gives us a rarely seen inside perspective on the dynamics of girls' social negotiation, contestation, and hierarchy. Critically addressing key misrepresentations and omissions of children's life-worlds in previous scholarship, Goodwin provides a much-needed counterpoint to that research and puts girls' experiences squarely at the center of her analysis."

MARY BUCHOLTZ, UNIVERSITY OF CALIFORNIA, SANTA BARBARA

On countless playgrounds each day, girls are at work crafting intricate social arrangements through language and embodied action. In this ground-breaking ethnography, the interactions of girls of diverse ethnicities and social classes show that rather than avoiding conflict, they actively seek it out, challenging the notion that girls are inherently supportive of each other.

Cults and New Religions

A Brief History

DOUGLAS E. COWAN & DAVID G. BROMLEY

University of Waterloo; Virginia Commonwealth University

CULTS AND NEW RELIGIONS offers an overview of the history and development of eight new religious movements in the late twentieth century: the Church of Scientology, Transcendental Meditation, Unificationism, The Family International, the Ramtha School of Enlightenment, the Branch Davidians, Heaven's Gate, and Wicca.

Each chapter profiles a new religion, describing its origins, doctrines and rituals, leadership and organization. Each one also includes a discussion of one of the major sources of controversy surrounding these movements, controversies that have led to these movements being popularly regarded as 'cults'; whether they are indeed authentic religions; the validity of claims that brainwashing techniques are used to gain and retain members; their potential for violence; the implications of experimentation with unconventional sexual practices; and the deeply rooted cultural fears they engender.

Urban China in Transition

Edited by JOHN R. LOGAN

Brown University

China is rapidly becoming a world power. No longer a developing country, China's cities are undergoing transformations of historic proportions. This book evaluates these multi-dimensional changes.

With input from professionals in a variety of fields **URBAN CHINA IN TRANSITION** analyzes Chinese trends in diverse topics including: migration, crime, gated communities, neighborhood associations, suburbanization, and women's status. Comparisons to urban areas in the United States, Eastern Europe, Asia, and South America pose thoughtful questions about the possible trajectory of Chinese urban development, while underscoring its uniqueness.

Turf Wars

Discourse, Diversity, and the Politics of Place

GABRIELLA GAHLIA MODAN

Ohio State University

"Turf Wars is endlessly rich and lively, and will be a fundamental text on how Americans in the beginning of the twentyfirst century live in cities."

JANE HILL, UNIVERSITY OF ARIZONA

TURF WARS: DISCOURSE,**DIVERSITY, AND THE POLITICS OF****PLACE** is the fascinating story

of an urban neighborhood

undergoing rapid

gentrification. It is a story

about how the members

of a multi-ethnic, multi-

class Washington, D.C.,

community deploy

language to project conflicting

images of their neighborhood. **TURF WARS** taps the

power of discourse analysis to provide insight into the

ways that local activity shapes larger urban social

processes.

In this innovative text, Modan offers a detailed, rich, and highly engrossing ethnographic account of a neighborhood and the people who live and work there.

Challenging Welfare Issues in the Global Countryside

Edited by
GEORGE GIACINTO GIARCHI

University of Plymouth

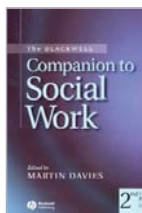

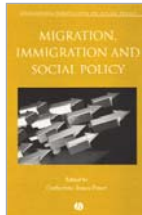

There has currently been an increased interest in countryside issues and rural social welfare. This has led to a greater demand for British and transnational rural studies, hence this edited collection. Here, exemplars ranging from the more industrialized regions of Britain, Continental Europe, the USA and Australia, and of rural localities in the less industrialized contexts of India and Mexico, direct attention to multi-dimensional factors affecting rural space, socio-political urban-rural relations, conflicting urban-rural tensions and opposed values. The authors add to existing studies that inform contemporary urban-rural dialogue, in respect of social policy and rural welfare in a changing global countryside.

Social Policy in the Modern World

A Comparative Text

MICHAEL HILL

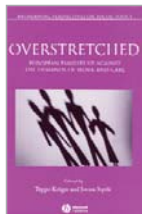

University of Brighton

This text provides a coherent, thematic account of social policy in the modern world. Taking a comparative perspective, it explores similarities and differences in the ways in which different countries approach social policy, both by looking at the broad characteristics of those policies and by examining variations in the ways in which key issues of social welfare are handled.

Migration, Immigration and Social Policy

Edited by **CATHERINE JONES FINER**

University of Birmingham

This thought-provoking and authoritative collection of papers tackles a subject of urgent international concern - migration, immigration and social policy. The volume presents forthright yet realistic analyses of the key issues: from the case for a world-wide system of migration management, to the quest for an EU asylum policy; from a review of European countries' treatment of asylum seekers, to the welfare and citizenship implications of actual reception arrangements in Britain; from the tortuous implications of direct democracy in Switzerland to the pace of new positive integration moves in Denmark and Norway. Taken together, these papers constitute an important intervention in policy debates about migration and immigration.

Sociolinguistic Theory

Second Edition

J. K. CHAMBERS

University of Toronto, Canada

SOCIOLOGICAL THEORY presents a critical synthesis of sociolinguistics that centers on the study of language variation and change, and identifies opportunities for future research. Since the inception of sociolinguistics four decades ago, the correlation of dependent linguistic variables with independent social variables has provided the theoretical core of the discipline. This volume reviews the essential findings that form its foundation and shows how empirical explorations have made it the most stimulating field in the contemporary study of language.

Death, Mourning, and Burial

A Cross-Cultural Reader

Edited by **ANTONIUS C. G. M. ROBBEN**

Utrecht University

There are few topics that stir the imagination more than the study of how humans across cultures have dealt with the inevitable and universally shared experience of death. In **DEATH, MOURNING, AND BURIAL**, an indispensable introduction to the anthropology of death, readers will find a rich selection of some of the finest ethnographic work on this fascinating topic. This collection offers cross-cultural readings that span the period from dying to afterlife, approach this transition as a social process, and demonstrate the great variation of cultural responses to death.

Cultural Bodies

Ethnography and Theory

Edited by **HELEN THOMAS & JAMILAH AHMED**

Goldsmiths College, University of London; Sage Publications

Bringing together an international and multidisciplinary team of scholars, **CULTURAL BODIES** draws on ethnography as a useful means of exploring our everyday social and cultural environments and, in doing so, demonstrates the constant need for researchers and their research to be made accountable to readers. In this way, ethnography reveals as much about the frameworks of social research as it does about the societies that they move in and out of. By focusing on the body and ethnography, **CULTURAL BODIES** constitutes an important step in developing these two key areas of study and the relationship between them.

Embodying Sociology

Retrospect, Progress & Prospects

Edited by **CHRIS SHILLING**

University of Portsmouth

Reflecting developments in consumer culture, medical technology, identity politics, ecological awareness, genetic engineering and bio-politics, 'the body' has become one of the fastest growing, most influential, and most contested subjects in the social sciences and humanities.

Comprising cutting edge contributions from Europe, America and Asia, this collection brings together a series of theoretical, methodological and empirical analyses by leading international exponents of body studies and a new generation of scholars concerned with exploring the structural, interactional and phenomenological features of human embodiment.

Connecting the concerns of classical sociologists to new advances in social theory, anthropology, feminism and social research - and introducing for the first time the study of 'body pedagogics' - this volume takes the sociological study of the body in an exciting new direction and opens up new horizons for the sociological imagination.

Against Automobility

Edited by STEFFEN BÖHM, CAMPBELL JONES, CHRIS LAND & MATTHEW PATERSON

University of Essex; University of Leicester; University of Essex; University of Ottawa

Despite the promise of freedom and autonomy that has been claimed to characterize the automobile, the automobile is also implicated in wholesale ecological destruction, automated industrial factory production and a uniquely individualistic

conception of autonomy. This contradiction at the heart of automobility is the target of this book, which takes to task the moving 'iron cages' that roam the modern landscape. Given the ubiquity of the automobile, and the patent contradictions and impossibilities on which it rests, it is strange that automobility has escaped serious critical theoretical attention for so long.

In this volume, distinguished scholars from across the social sciences and humanities focus a critical theoretical gaze on the automobile or, more accurately, on the regime of automobility that conjoins a particular conception of autonomy with a particular conception of mobility and sees the automobile as the pure living embodiment of automobility. The contributors interrogate not simply 'the car' but also the social forms of organization that enable, and are reproduced by, widespread automobility; the cultural reproduction of auto-mobile subjectivities; and the political refiguration of autonomy and constraint that have been driven by automobility. In doing so, they open the space for a political evaluation and reappraisal of automobility in all of its facets.

This volume will be of interest to those working in areas such as geography, politics, consumption and cultural studies, but also to those in critical theory and the sociology of objects and of everyday life. It shows a way of thinking about, against, and beyond the current regime of automobility.

Sports Mega-Events

Social Scientific Analyses of a Global Phenomenon

Edited by JOHN HORNE & WOLFRAM MANZENREITER

University of Edinburgh; University of Vienna

Developments in new technologies of mass communication, especially the development of satellite television, have created unprecedented global audiences for events like the Olympics and the FIFA World Cup. The influx of corporate sponsorship money into sports 'megs' has provided an important source of income for host cities and the international organizations running world sports events. Sports mega-events are now seen as useful in the selling of all manner of commercial products and as valuable promotional opportunities for cities and regions, showcasing their attractions to global audiences and helping to attract tourism and outside investment. The enthusiasm to host sports mega-events has grown massively in the past 20 years, but research has pointed out significant gaps between forecast and

actual outcomes, between economic and non-economic rewards, between the experience of mega-events in advanced and in developing societies.

This collection of specially commissioned essays asks penetrating questions about why governments and cities compete for the right to host these major international sporting events?

What are the tradeoffs and opportunity costs of doing so? Do such events ultimately deliver the benefits, economic and otherwise, that their proponents proclaim?

This volume offers a distinctive and timely comparative analysis of the sociological, economic, and political significance of bids for, and the hosting of, sports mega-events throughout the world - Europe, Asia, North America, Australasia and South Africa. The contents will appeal to an international readership in sociology, geography, economics, sports studies and sports management and cultural studies. The breadth of coverage and international composition of the specialist contributors makes this a compelling and substantive addition to the sociological literature in sport, leisure and popular cultural studies.

The volume covers those topics with the greatest depth of creative scholarship in this field: theories of latinismo; immigration; political and economic perspectives; education; race, class, gender and sexuality; and language and religion.

In addition, the collection concentrates on areas of broader concern, including history, identity, public representations, cultural expression and racialization, incorporating coverage of African and Native American heritage. The result is a dynamic reference work that spans the diversity of issues, topics and approaches to the study of what is now the largest minority population in the United States.

RECONFIGURING AMERICAN STUDIES is a vigorous, bold account of the changes in the field of American Studies over the last 35 years. Through this set of carefully selected, key essays by an editorial board of expert scholars, the book demonstrates how changes in the field have produced new genealogies that tell different histories of both America and the study of America. The volume includes writings from earlier eras to show how changing perspectives have enabled older concepts and debates to emerge in a different context, casting new light on their significance and impact.

Skulls to the Living, Bread to the Dead

The Day of the Dead in Mexico and Beyond

Edited by **STANLEY BRANDES**

University of California, Berkeley

"Erudite and charming, Brandes' book provides a welcome antidote to previous studies of Day of the Dead 'morbidity,' segueing seamlessly from the Mexican festivities to Mexican-Americans in California. The book is destined to become a classic in Hispanic studies."

DAVID D. GILMORE, SUNY, STONY BROOK

SKULLS TO THE LIVING, BREAD TO THE DEAD poses a serious challenge to the widespread stereotype of the morbid Mexican, unafraid of death, and obsessed with dying. In fact, the Day of the Dead, as shown here, is a powerful affirmation of life and creativity. Beautifully illustrated, this book is essential for anyone interested in Mexican culture, art, and folklore, as well as contemporary globalization and identity formation.

American Identities

An Introductory Textbook

Edited by **LOIS P. RUDNICK, JUDITH E. SMITH & RACHEL LEE RUBIN**

All University of Massachusetts, Boston

AMERICAN IDENTITIES is a dazzling array of primary documents and critical essays culled from American history, literature, memoir, and popular culture that explore major currents and trends in American history from 1945 to the present. The textbook charts the rich multiplicity of American identities as refracted through the different lenses of race, class, and gender, and shaped by common historical social processes such as migration, families, work, and war. Rather than simply teaching history, **AMERICAN IDENTITIES** actively engages students in the history-making process while developing the skills crucial to interpreting meaningful and enduring cultural texts.

Women and Media

A Critical Introduction

CAROLYN M. BYERLY & KAREN ROSS

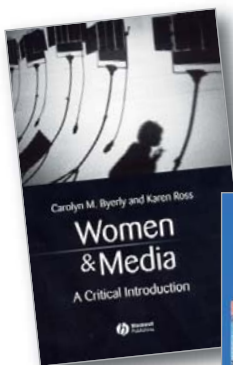

Howard University; Coventry University

"Byerly and Ross not only advocate but succeed in integrating theory with empirical data, and may inspire a few readers to undertake their own media action."

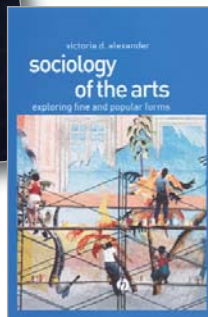

LINDA STEINER, RUTGERS UNIVERSITY

WOMEN AND MEDIA is a thoughtful cross-cultural examination of the ways in which women have worked inside and outside mainstream media organizations since the 1970s. The book provides an overview of the key issues and developments in feminist media critiques and interventions over the last 30 years, beginning with the extant literature in this growing field and ending with a new study of women's media activism in 20 nations.

The authors recount and analyze the first-hand narratives of nearly 100 women media activists whose work has contributed to the making of a feminist public sphere that has moved women leaders and agendas more forcefully into their societies.

Sociology of the Arts

Exploring Fine and Popular Forms

VICTORIA D. ALEXANDER

University of Surrey

SOCIOLOGY OF THE ARTS is a comprehensive overview of the sociology of art and an authoritative work of scholarship by a leading expert in the field. The book synthesizes the various theoretical models of art sociology, and provides empirical examples as well as stimulating exemplars of sociological work on the arts. Case studies of art works are from both ends of the cultural spectrum: fine arts (theatre, dance, symphony, opera) and popular arts (Hollywood movies, pop music, pulp fiction, TV drama, comedy and advertising). These studies, combined with the book's considerable theoretical breadth and insight, explore how art is created, distributed, received, consumed, and used by people who experience it. The book also discusses the newly emerging question of the art object itself, and the meaning of art works.

SOCIOLOGY OF THE ARTS is a clearly written, well-organized synthesis for students, and a unique contribution to the field. This international selection of perspectives, empirical research, and case studies makes this book essential for teaching and learning the sociology of art, and will be of great interest to scholars.

Television in the Multichannel Age

A Brief History of Cable Television

MEGAN MULLEN

University of Wisconsin-Parkside

This concise textbook surveys the cultural, industrial, and regulatory history of cable and multichannel television since its origins around 1950. Focussing on the United States, the book chronicles the development of multichannel television, complete with biographical sketches, photographs, and charts. It concludes with the present-day synergistic media scene, speculating about how new technologies, such as broadband networks, will absorb existing technologies.

Reducing Prejudice and Promoting Social Inclusion

Integrating Research, Theory and Practice on Intergroup Relations

Edited by **BIREN (RATNESH) A. NAGDA, LINDA R. TROPP & ELIZABETH LEVY PALUCK**
University of Washington; University of Massachusetts, Amherst; Yale University

Building on the legacies of Allport, Williams and Lewin, the field of intergroup relations has made great strides in the development of theory, research, and practice in the last half-century. This issue examines the integration of these three strands of scholarship and action as we look ahead to the next half-century of psychological work on intergroup relations.
