

## GENERAL

- Approval of the paper for publication ([Author Statements](#)) signed by all authors. An author must have made significant contributions to the design and execution and analysis and writing of the study, and he or she must share responsibility for what is published. We ask the authors to specify their individual contributions and, if appropriate, we publish this information.
  - As a rule, the number of authors should be limited to 6. The names of others who contributed in varying degree to the article should be mentioned under the heading: "Acknowledgements".
  - Clear statement that the study has been approved by an institutional ethics committee where appropriate
  - Reports on randomized trials must conform to [Consort guidelines](#) and should be submitted with their protocols. Please state trial registration number and authority.
  - In case a manuscript contains photographs of patients, we require a certificate by the author that consent to publish such a photograph has been given by the child's parent or caretaker.
  - Manuscripts should be formatted double-spaced in font size Times New Roman 12 or similar. Use the SI-system of notation
  - Manuscripts arranged as follows: title page, abstract, text, acknowledgements, complete list of abbreviations used (for publication in article info box), references, tables, figure legends, figures (each part starting on a new page)
  - Compliance with permitted number of pages (see table below). Each exceeding page will incur a charge of **GBP 110.-**
  - We confirm that we would be prepared to pay the extra charge
  - Supporting Information for online publication. [Guidelines for Supporting Information](#)
- Conflict of interest and funding - Authors are responsible for recognizing and disclosing financial and other conflicts of interest that might bias their work. They should acknowledge in the manuscript all financial support for the work and other financial or personal connections to the work. If reported research has been supported by pharmaceutical or other industries, this should be stated. Even if there is no specific funding, please state "No specific funding!"

## ABSTRACT

- The Abstract structured with (headings) emphasis on: **Aim, Methods, Results** and ending with one or two sentences of **Conclusion** summarizing the message of the article. Please note that the Conclusion of the abstract will be highlighted in a separate text box in the final version of the article in print and online. Therefore author(s) are asked to carefully consider the message given here.
- To optimize your abstract for search-engines please see <http://authorservices.wiley.com/bauthor/seo.asp>
- Maximum 5 Keywords listed alphabetically and suitable for indexing purposes
- Formatted as illustrated below:

**Abstract** (example)

**Aim:** To determine whether primary or secondary growth hormone ... (text) **Methods:** In 38 patients with Rett syndrome... **Results:** ... **Conclusion:** .....

## FIGURES

- Confirmation that a colour original has to be printed in colour and that funds are available to cover costs of reproduction (**GBP 200.-/Image and GBP 60.00,-/each following image**). Please download the [Colour Work Agreement Form](#)

## REFERENCES

- Text indicators numbered sequentially with Arabic numerals in parentheses
  - Journal title abbreviations conforming with the *Index Medicus* listing
  - The Vancouver Style recommendations followed
  - Presented as illustrated below: (*When more than six authors, list first six and then add "et al."*)
1. Kühl C, Andersen GE, Hertel J, Mølsted-Pedersen L. Metabolic events in infants of diabetic mothers during the first 24 hours after birth. *Acta Paediatr* 1982; 71:19-25
  2. Feigin RD. Bacterial meningitis beyond the neonatal period. In: Feigin RD, Cherry JD, editors. *Textbook of pediatric infectious diseases*. 2nd ed. Philadelphia: WB Saunders, 1987
  3. Jones G. Textbook of paediatrics. Uppsala: *Almqvist & Wiksell*, 1974:193-9
  4. D'Hondt E, Berge E, Colinet G. Production and quality control of the Oka strain live varicella vaccine. *Postgrad Med J* 1985; 61 Suppl 4:53-6

## RECOMMENDED NUMBER OF PAGES, REFERENCES, ETC., FOR VARIOUS TYPES OF ARTICLES

Type of article	No. of references	Abstract	Max no. of printed pp	Headings	Keywords
Regular	30	Yes 200 words	4 (= 12 ms pages*) approx. 3250 words #	Yes	Yes
Short Communication	15	No	2 (= 6 ms pages*) approx. 1550 words #	No	No
Technical Note	15	Optional 75 words	2 (= 6 ms pages*) -"-	No	Yes
Clinical Observation	15	Yes 150 words	2 (= 6 ms pages*) -"-	Yes	-"-
Clinical Overview	30	Yes 75 words	3 (= 9 ms pages*) approx. 2400 words #	-"-	-"-
Therapeutic Note	15	No	2 (= 6 ms pages*) approx. 1550 words #	-"-	-"-
Quest for the Diagnosis <a href="#">Instructions</a>	15	No	3 (= 9 ms pages*) approx. 2400 words #	No	No
Letter	3	No	1/2 printed page or max. 500 words #	-"-	-"-
Commentary	20	No	2 (= 6 ms pages*) approx. 1550 words #	Optional	Yes
Review Article	60	Yes 75 words	8 (= 24 ms pages*) approx. 6650 words #	-"-	-"-
Viewpoint Article	30	Yes 150 words	5 (= 15 ms pages*) approx. 3950 words #	Optional	-"-
A Different View **	10	No	2 (= 6 ms pages*) approx. 1550 words #	-"-	-"-

\* Ordinary double-spaced manuscript pages - tables, illustrations and references included (*i.e. the more space tables and illustrations require the shorter the text*).

# Tables and illustrations not included
