

# Developmental Science

## *Early Career Researcher Prize*

In order to help recognise the emergence of new researchers with outstanding potential in the field of developmental sciences, the *Developmental Science* editors wish to award an annual prize for the best original scientific paper or report to appear in the journal *Developmental Science*.

### Rules

- The recipient must be the first author on a paper or research report of outstanding originality and impact that has been accepted or has appeared in *Developmental Science* during the year in question. The award will be announced early in the following year;
- He or she will be within 5 years of completing their PhD when the paper was accepted;
- PhD students are also eligible.

### How to nominate

- Nominations will be considered from co-authors and members of the full editorial board;
- To nominate a candidate, please send a brief e-mail to Developmental Science ([devscience@psychology.bbk.ac.uk](mailto:devscience@psychology.bbk.ac.uk)) stating the author's name and the corresponding article title. If you wish, you may want to include a brief statement as to the significance of the paper and the nominee's contribution to the work reported;
- Nominations will close at the end of January for the previous year (e.g. If you wish to nominate a candidate for the 2009 prize, please do so by the end of Jan 2010).

### Prize announcement

- The Editors and Associate Editors will select the winning paper;
- The winning author and paper will be announced with a brief citation highlighting the importance of the work reported;
- The winner will receive a certificate, a personal annual subscription to the journal and \$500, kindly donated by Wiley-Blackwell.
