Conflict and Cooperation

Institutional and Behavioral Economics

A. ALLAN SCHMID

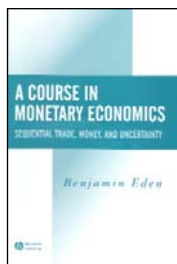

Michigan State University

"Right from the beginning, Schmid's magnificent volume has individuals interacting with historically-given institutions. There is no isolated Robinson Crusoe here. Schmid's book is a superb overview of the modern literature on human agency in an institutional setting; it is the best and most comprehensive introduction to this cutting-edge literature in modern economics."

GEOFFREY HODGSON,
UNIVERSITY OF HERTFORDSHIRE

For those who wonder how ethics and psychology fit into economics, Allan Schmid's innovative text, **CONFLICT AND COOPERATION**, explores the importance of moral judgments in settling conflicts of interest, and the profound effects of human behavior on economic theories and models. Investigating the institutional 'rules of the game' - both formal and informal - and how these rules change to serve competing interests, this text addresses the substantive impact of alternative institutions and institutional evolution. An economic framework emerges, acknowledging human learning and preference change, bounded rationality, and disequilibrium.

NEW

A Course in Monetary Economics

Sequential Trade, Money, and Uncertainty

BENJAMIN EDEN

Vanderbilt University and the University of Haifa

A **COURSE IN MONETARY ECONOMICS** is an insightful introduction to the advanced topics in monetary economics. Accessible to students who have mastered the diagrammatic tools of economics, it discusses real issues with a variety of modeling alternatives, allowing for a direct comparison of the implications of the different models. The exposition is clear and logical, providing a solid foundation in monetary theory and the techniques of economic modeling.

The inventive analysis explores an extensive range of topics including the optimum quantity of money, optimal monetary and fiscal policy, and uncertain and sequential trade models. Additionally, the text contains a simple general equilibrium version of Lucas' (1972) confusion hypothesis, and presents and synthesizes the results of recent empirical work. The text is rooted in the author's years of teaching and research, and will be highly suitable for monetary economics courses in both the upper-level undergraduate and graduate levels.

International Journal of Economic Theory

Edited by KAZUO NISHIMURA & MAKOTO YANO

The **INTERNATIONAL JOURNAL OF ECONOMIC THEORY (IJET)** publishes original articles in all fields of economic theory and aims to be

a leading outlet for theorists' work. As well as covering both pure and applied economic theory, it aims to publish articles concerned with theoretical issues in any specialized field. The journal also intends to encourage the

work of young researchers who are not yet established in the profession. **IJET** is produced in co-operation with Keio University and Kyoto University as a joint project of the research programs funded by the Ministry of Education.

Economica

Edited by **FRANK COWELL,**
TORE ELLINGSEN & ALAN MANNING

ECONOMICA is an international journal devoted to research in all branches of economics. Theoretical and empirical articles are welcome from all parts of the international research community. **ECONOMICA** is a leading economics journal, appearing high in the published citation rankings. In addition to the main papers which make up each issue, there is an extensive review section, covering a wide range of recently published titles at all levels.

The Economic Journal

Edited by **MARIANNE BERTRAND,**
LEONARDO FELLI, STEVE MACHIN,
ANDREW SCOTT & JAUME VENTURA

THE ECONOMIC JOURNAL is among the foremost of the learned journals in economics and a key source for professional economists in higher education, business, government service and the financial sector. It has successfully launched two types of issue - articles and features. More than 40 high-quality refereed articles are published each year offering readers the best new work in theoretical, applied and empirical research from across the entire field of economics. The features section publishes symposia and special articles that cover topical policy relevant questions in contemporary economics, and regular features on data and technology including extensive book reviews and informative software reviews. **THE ECONOMIC JOURNAL** represents unbeatable value for those who want to keep abreast in current thinking in economics.

SAMPLE CONTENTS

- ⊙ Sargent-Wallace Meets Krugman-Flood-Garber or: Why Sovereign Debt Swaps Don't Avert Macroeconomic Crises?
J. Aizenman, K. Kletzer and B. Pinto

Winners and Losers in Globalization

GUILLERMO DE LA DEHESA
Centre for Economic Policy Research

This book presents a technical, objective and dispassionate analysis of the globalization debate, detailing the economic effects of globalization on governments, nation-states and on business. It assesses its impact on both labor markets and financial markets, on global economic growth and on income distribution and real convergence between different national economies. Seeking reason in an impassioned debate, Dehesa examines who stands to win and who stands to lose from the process of globalization, in prose accessible to readers unfamiliar with economic theory.

Economics

New Classical versus Neoclassical Frameworks

XIAOKAI YANG
Monash University

This innovative text ushers in a new way of examining basic economic issues, teaching economics from a different standpoint; using a division-of-labor theme to eliminate the need for a dichotomy between microeconomics and macroeconomics. While innovative in content, it maintains the continuity of mainstream economics through a synthesis of existing and emerging branches of economics. This is an exceptional work that will encourage both creative and critical thinking.

EMU: Assessing the Impact of the Euro

Edited by **RICHARD E. BALDWIN, GIUSEPPE BERTOLA & PAUL SEABRIGHT**

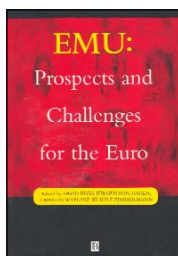

Graduate Institute of International Studies, Geneva; European University Institute, Firenze; Université des Sciences Sociales de Toulouse

The Euro has been in operation since January 1999 - just long enough to provide sufficient data for a first look at its actual performance. In contrast to the many other Euro-studies that rely on forecasting and extrapolation from historical experiences, the eight studies in this book use post-1999 data to provide a first look at how the Euro is actually affecting trade, financial markets, macroeconomic policy making, and Europe's economic performance.

EMU: Prospects and Challenges for the Euro

Edited by **DAVID BEGG, JÜRGEN VON HAGEN, CHARLES WYPLOSZ & KLAUS E. ZIMMERMANN**

Birkbeck College, University of London; University of Bonn; Graduate Institute for International Studies, Geneva; University of Munich

Written prior to adoption of the Euro, this volume explores the likely impact of monetary union. Some of the best European and American economists use available theories and data, including historical evidence, to look at the operation of monetary and fiscal policy, at the effects of shocks and at the international role of the euro. This book serves as the reference for understanding the early challenges of EMU.

Economic Outlook

Edited by ADRIAN COOPER

ECONOMIC OUTLOOK is the product of an exciting collaborative venture between the Centre for Economic Forecasting at London Business School and Oxford Economic Forecasting, which began in 1999.

ECONOMIC OUTLOOK provides a combination of independent analysis, commentary and forecasts of the UK and other major world economies. It is designed for use by corporate executives, business libraries, corporate planners, research departments, and government and policy-making institutions.

World Economic Prospects is the OEF's monthly update on the world economy, available to subscribers of **ECONOMIC OUTLOOK** since January 2004. Covering the major economies and emerging markets, this publication contains the latest data and forecasts, as well as providing insightful analysis of unfolding events and issues.

The American Journal of Economics and Sociology

Edited by
LAURENCE S. MOSS

THE AMERICAN JOURNAL OF ECONOMICS AND SOCIOLOGY

(AJES) was founded in 1941, with support from the Robert Schalkenbach Foundation, to provide a forum for continuing discussion of issues emphasized by the American political economist, social philosopher, and activist, Henry George (1839-1897). Today, the exciting encounters between sociology and economics remain a natural subject to explore, and AJES continues to publish carefully crafted essays in the social sciences.

German Economic Review

Edited by BERNHARD FELDERER,
PAUL C. DE GRAUWE, STEFAN
REICHELSTEIN, URS SCHWEIZER,
& DAVID E. WILDASIN

GERMAN ECONOMIC REVIEW, the official publication of the German Economic Association (Verein für Socialpolitik), is an international journal publishing original and rigorous research of general interest in a broad range of economic disciplines, including macro- and microeconomics, economic policy, international economics, public economics, finance, and business administration. The scope of research approaches includes theoretical, empirical and experimental work. Innovative and thought-provoking contributions, in particular from younger authors, are especially welcome. **GER** is edited by an international board of editors and associate editors from Europe and overseas. This ensures access to an international pool of referees and guarantees a high intellectual standard of published contributions. Editors are committed to a prompt turnaround of submissions.

The Japanese Economic Review

Edited by AKIRA OKADA

Started in 1950 by a group of leading Japanese economists under the title **THE ECONOMIC STUDIES QUARTERLY**, the journal became the official English language publication of the Japanese Economic Association in 1959. As its successor, **THE JAPANESE ECONOMIC REVIEW** aims to become the Japanese counterpart of *The American Economic Review*, publishing substantial economic analysis of the highest quality across the whole field of economics from researchers both within and outside Japan. It also welcomes innovative and thought-provoking contributions with strong relevance to real economic issues, whether political, theoretical or policy-oriented.

The Review of Income and Wealth

Edited by BART VAN ARK & STEFAN KLASEN

The major objectives of **THE REVIEW OF INCOME AND WEALTH** are the furthering of research on national and economic and social accounting, including the development of concepts and definitions for the measurement and analysis of income and wealth; the development and further integration of systems of economic and social statistics; and related problems of statistical methodology. In particular, the **REVIEW** is concerned with the international aspects of these questions, such as: international comparisons of income and wealth; the use of economic and social accounting for budgeting and policy analysis in different countries, and the experiences of different countries in the development of economic and social accounting systems.

Metroeconomica

International Review of Economics

Edited by HEINZ D. KURZ

First published in 1949, **METROECONOMICA** is essential reading for professionals and students interested in a wide spectrum of theoretical approaches to analytical economics, providing an international forum for debate among competing theories and research programs going beyond the traditional emphasis on market equilibrium/disequilibrium by:

- Focusing on economic processes in real time
- Addressing the role of social institutions, technical change and income distribution
- Emphasizing the behavioural foundations of economics
- Exploring methodological innovations in economics and from other disciplines.

METROECONOMICA also publishes occasional commissioned survey articles and workshop/conference proceedings.

The Scandinavian Journal of Economics

Edited by JONAS AGELL & CHRISTIAN SCHULTZ

THE SCANDINAVIAN JOURNAL OF ECONOMICS is one of the oldest and most distinguished economics journals in the world. It publishes research of the highest scientific quality from an international array of contributors in all areas of economics and related fields. The JOURNAL features theoretical and empirical articles in all fields of economics, book reviews, comprehensive surveys of the contributions to economics of the recipients of the Alfred Nobel Memorial Prize in Economics, and a special issue each year on key topics in economics.

OF EXCELLENCE

Kyklos

International Review for Social Sciences

Edited by RENÉ L. FREY

KYKLOS regards economics as a social science. It therefore emphasizes contributions dealing with relevant issues in the real world, as well as economic policy applications. While a sound analytical base is required, the journal is wide open for unorthodox approaches promising to yield fresh insights. Pure formalisms staying within received models are rejected in favour of readable, challenging and interesting articles.

Oxford Bulletin of Economics & Statistics

Edited by ANINDYA BANERJEE, DAVID BEVAN, GAVIN CAMERON, BRIAN HENRY, DAVID HENDRY, ADRIAAN KALWIJ, JOHN KNIGHT & JONATHAN TEMPLE

Publishing international research papers on current practical issues in applied economics, the OXFORD BULLETIN OF ECONOMICS & STATISTICS is essential reading for academic and professional economists in both the private and public sector. Whilst the BULLETIN publishes papers in all areas of applied economics, emphasis is placed on the practical importance, theoretical interest and policy relevance of their substantive results, as well as on the methodology and technical competence of the research.

**NOW RANKED
#1 JOURNAL IN
INDUSTRIAL
RELATIONS**

The Journal of Industrial Economics

Edited by YEON-KOO CHE, KENNETH HENDRICKS,
PIERRE RÉGIBEAU & FRANK VERBOVEN

First published in 1952 the **JOURNAL** has a very wide international circulation and is recognised as a leading journal in the field. It was founded to promote and publish the analysis of modern industry, particularly the behavior of firms and the functioning of markets. Contributions are welcomed in all areas of industrial economics including: organization of industry, applied oligopoly theory, product differentiation and technical change, theory of the firm and internal organization, regulation, monopoly, merger and technology policy. Necessarily, these subjects will often draw on adjacent areas such as international economics, labor economics and law. The **JOURNAL** has a tradition of publishing a blend of theory and evidence.

Industrial Relations

A Journal of Economy & Society

Edited by DAVID I. LEVINE & DANIEL J. B. MITCHELL

Corporate restructuring and downsizing, the changing employment relationship in union and non-union settings, high performance work systems, the demographics of the workplace, and the impact of globalization on national labor markets - these are just some of the major issues covered in **INDUSTRIAL RELATIONS**. The journal offers an invaluable international perspective on economic, sociological, psychological, political, historical, and legal developments in labor and employment. It is the only journal in its field with this multidisciplinary focus on the implications of change for business, government and workers.

Labor Markets and Employment Relationships

A Comprehensive Approach

JOYCE P. JACOBSEN &
GILBERT L. SKILLMAN

Both Wesleyan University

This innovative text grounds the economic analysis of labor markets and employment relationships in a unified theoretical treatment of labor exchange conditions. In addition to providing thorough coverage of standard topics including labor supply and demand, human capital theory, and compensating wage differentials, the text draws on game theory and the economics of information to study the implications of key departures from perfectly competitive labor market conditions. Analytical results are consistently applied to contemporary policy issues and empirical debates.

The text is supplemented by text boxes that illustrate key concepts with real-world applications, chapter appendices that explore technical material in greater depth, and end-of-chapter study questions that encourage students to apply, extend, and critically evaluate the theories under study.

Economic Development and the Division of Labor

XIAOKAI YANG

Monash University

"Economic Development and the Division of Labor is an exciting contribution that offers innovative perspectives on growth and development. It covers a void in the literature, and provides a rich and deep interpretation of the impact of endogenous specialization, institutions, and economic structure on growth. The text strikes a very good balance between the intuitive and analytical discussions, and relies constantly on references to contemporary data and the problems facing developing countries."

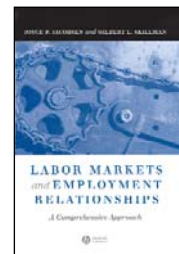

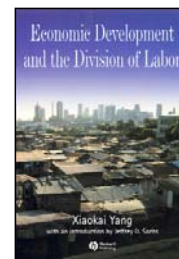

JOSHUA AIZENMAN, DARTMOUTH COLLEGE

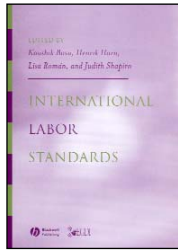

"Economists, whatever their speciality, will find the book rewarding to read and stimulating to teach."

MERTON J. PECK, YALE UNIVERSITY

This innovative new book from Xiaokai Yang introduces students to development economics through the lens of inframarginal and marginal analyses, and shows how this way of thinking has influenced a shift back to classical economic theory within the field of economic development. Yang offers a thorough analysis of trade and macroeconomics not to be found in comparable works, and focuses on institutional and transaction cost issues of critical interest to development economists.

International Labor Standards

History, Theories, and Policy Options

Edited by KAUSHIK BASU, HENRIK HORN,
LISA ROMAN & JUDITH SHAPIRO

Cornell University; University of Stockholm; EGD Secretariat; New Economic School

"An extremely valuable and wide-ranging introduction to current debates over labor standards. The book gives a detailed history of standards; a broad and even-handed view of economic arguments for and against standards; and serious discussion of the problem of child labor. [It] concludes with an intriguing analysis of the potential role of the World Trade Organization in helping to raise standards. In place of the vitriole and rhetoric that the debate over standards all too often degenerates into, this volume is a serious investigation of what we know and do not know in this area."

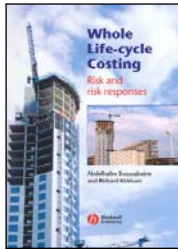

RICHARD FREEMAN, LONDON SCHOOL OF ECONOMICS

This book addresses the controversial call for international labor standards, seeking to productively further this debate by considering the economic implications and history of these standards. A result of an initiative by Professor Kaushik Basu in his capacity as member of the Expert Group of Development Issues (EGDI) sponsored by the Swedish Foreign Ministry, the contributions are based on discussions at a seminar held in Stockholm in August 2001. They focus on four central questions:

- ⊙ How did the labor standards movement evolve in the past, and what can we learn from its history?
- ⊙ What do contemporary economic theories tell us about the possible impact of international labor standards?
- ⊙ What solid empirical evidence do economists have about the incidence, causes and effects of child labor?
- ⊙ What kind of global institutions do we have or need in order to enforce any agreement on labor standards, and what role should the ILO and WTO play?

Compiling the best research in the field, this book provides a solid basis for policy decisions, while also serving as a challenging text for students in trade, development, and labor economics.

KEY TEXTBOOK

Mathematics for Economics and Business

An Interactive Introduction
Second Edition

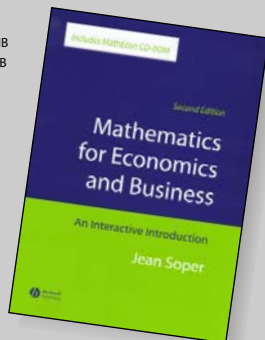

JEAN SOPER
University of Leicester

This text offers the ideal approach for economics and business students seeking to understand the mathematics relevant to them. Each chapter demonstrates basic mathematical techniques, while also explaining the economic analysis and business context where each is used. By following the worked examples and tackling the practice problems, students will discover how to use and apply each of these techniques.

Now in its second edition, the text features expanded summaries of economic analysis, new sections on matrix algebra and linear programming, and additional demonstrations of economics applications. Along with these new features, the book continues to separate mathematical methods and economics applications into discrete sections, allowing the student to learn the mathematics needed, or to proceed immediately to the economics examples.

Although the book is complete in itself, it also encourages students to develop their understanding of both mathematics and economics by using the interactive CD-ROM in the back of the book. This CD-ROM includes the award-winning MathEcon software, Excel files, Powerpoint slides, all definitions and 'remember' boxes, and additional practice questions. In its flexibility, comprehensiveness, and readable format, this text will continue to serve as an essential resource for students in this area.

Macroeconomics for Managers

MICHAEL K. EVANS
Formerly Northwestern University

This text offers business managers and business school students an excellent practical explanation of the short-term linkages that impact the performance of the overall economy.

Engaging the reader through many features, the text includes detailed case studies and 'Manager's Briefcase' discussions, which provide practical applications of macroeconomic concepts to real-world situations. Additionally, each chapter ends with a list of key concepts, a chapter summary, and practice questions. Its short-term, empirically oriented approach makes this text a distinctive and practical resource for better understanding macroeconomics.

Lecturer resources, including chapter summaries, teaching suggestions, additional examples, chapter questions and solutions are available at www.blackwellpublishing.com/mfm

Managerial Economics

Second Edition

IVAN PNG
National University of Singapore

Presenting the essentials of managerial economics in an accessible style, this book uniquely integrates the discipline to other managerial functions — including accounting, finance, human resource management, and marketing. **MANAGERIAL ECONOMICS** teaches students how to make better business decisions, not how to build models.

This second edition also emphasizes the economic principles of the 'new economy', particularly scalability and network effects.

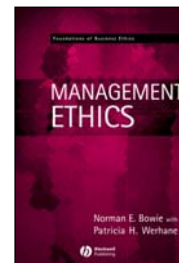

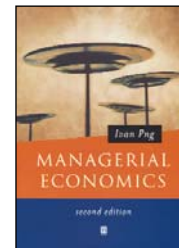

MANAGERIAL ECONOMICS is supported by an instructor's manual and on-line resources for students and instructors. Visit: www.comp.nus.edu.sg/~ipng/mecon.htm

The Economics of an Aging Society

ROBERT L. CLARK, RICHARD V. BURKHAUSER, MARILYN MOON, JOSEPH F. QUINN & TIMOTHY M. SMEEDING

North Carolina State University; Cornell University; American Institute for Research; Boston College; Syracuse University

"The Economics of an Aging Society should be required reading in any economics or policy course for gerontology students. What is new and praiseworthy about the text is its melding of economic and policy analyses. The reader is given the context and models to understand the economic choices that governments, firms, and individuals must make in an aging society. The book is ultimately empowering."

CHARLES LONGINO, WAKE FOREST UNIVERSITY

Written by leading thinkers in the field, this text provides an in-depth analysis of the economic and policy issues associated with the aging of individuals and populations. The discussion concentrates on:

- ⊙ The effects of aging populations on the United States and other nations
- ⊙ The economic well-being of the elderly, highlighting women and minorities
- ⊙ Public and private programs providing income for the elderly
- ⊙ Medicare, Medicaid, and private health insurance
- ⊙ Social Security and Medicare reform options
- ⊙ Employer-based retirement programs and pensions
- ⊙ Retirement patterns and factors influencing retirement decisions.

The authors draw from the experiences of other countries in evaluating the US experience and options. Additionally, each chapter engages the reader through practical examples and stimulates further investigation by providing practice questions with relevant website addresses.

Global Governance and Public Accountability

Edited by DAVID HELD & MATHIAS KOENIG-ARCHIBUGI

Both London School of Economics and Political Science

This volume brings together prominent scholars from the fields of politics and international relations in order to explore questions of crucial importance to the creation of a viable and legitimate system of global governance.

Questions addressed include: To what extent are those who shape global public policies accountable to those affected by their decisions? Are there accountability deficits? Do these deficits weaken the effectiveness and legitimacy of global policy making? And what can realistically be done to reduce such deficits?

Real Estate Economics

Edited by DAVID C. LING,
CROCKER LIU &
THOMAS G. THIBODEAU

As the official journal of the American Real Estate and Urban Economics Association, **REAL ESTATE ECONOMICS** is the premier journal on real estate topics. Since 1973, the journal has been facilitating communication among academic researchers and industry professionals and improving the analysis of real estate decisions. Articles span a wide range of issues, from tax rules to brokers' commissions to corporate real estate.

Growth and Change

A Journal of Urban and Regional Policy

Edited by THOMAS R. LEINBACH

Associate Managing Editor:
ANNA STEWART

GROWTH AND CHANGE is a broadly-based forum for scholarly research on all aspects of public, urban, and regional development and policy-making. Interdisciplinary in scope, the journal

publishes both empirical and theoretical contributions from economics, geography, public finance, urban and regional planning, agricultural

economics, public policy, and related fields. These include full-length research articles: Perspectives - essays intended to provoke thought and debate, and Notes - usually brief empirical studies.

Regional Economics and Policy

Third Edition

HARVEY ARMSTRONG & JIM TAYLOR

University of Sheffield; Lancaster University

"This is an excellent textbook on regional economic theory and policy ... This book will continue to remain the definitive overview of the subject and will be widely consulted by all those interested in the regional aspects of economic activity."

JOHN MCCOMBIE, UNIVERSITY OF CAMBRIDGE

The revised edition of this classic text contains discussions of the latest theoretical developments in regional economics and reviews recent changes in regional policy and institutions in the European Union. New case study material based on extensive academic research in Europe and the USA has been added throughout the book.

This book is organized in two free-standing parts examining firstly the economic analysis of regions and then regional policy issues. Topics covered include multiplier and impact analysis, input-output models, growth theory, migration, regional labor markets, regional policy in the EU, regional devolution, small firms policy, foreign direct investment and a detailed explanation of the methods used to evaluate regional policy.

Economics, Real Estate and the Supply of Land

ALAN EVANS

University of Reading

The standard view appears to be that the owners of land have no interest other than to allow their land to be used for the activity which would yield the highest income. But in reality this is not so, and this book's aim is to demonstrate this, to set out the reasons, and to show the economic effects of the fact that landowners have other motives.

Economics and Land Use Planning

ALAN EVANS

University of Reading

This book aims to draw together the economics literature relating to planning and set it out systematically. It analyses the economics of land use planning and the relationship between economics and planning and addresses questions like: What are the limits of land use planning and the extent of its objectives? Is the aim aesthetic? Is it efficiency? Is it to ensure equity? Or sustainability? And if all of these aims, how should one be balanced against another?

Review of Urban & Regional Development Studies

Journal of the Applied Regional Science Conference

Edited by MASAYUKI DOI

REVIEW OF URBAN AND REGIONAL DEVELOPMENT STUDIES (RURDS) focuses on issues of immediate practical interest to those involved in policy formation and implementation. Articles contain rigorous empirical analysis, with many emphasizing policy relevance and the operational aspects of the academic disciplines, others theoretical and methodological issues. Interdisciplinary and international in perspective, **RURDS** has a wide appeal: in addition to scholars, readership includes planners, engineers and managers in government, business and development agencies worldwide. Published in association with the Applied Regional Science Conference and supported by Tokyo International University and Showa Foundation for Economic Research.

Econometrica

Journal of the Econometric Society

Edited by EDDIE DEKEL

ECONOMETRICA publishes original articles in all branches of economics - theoretical and empirical, abstract and applied, providing wide-ranging coverage across the subject area. It promotes studies that aim at the unification of the theoretical-quantitative and the empirical-quantitative approach to economic problems and that are penetrated by constructive and rigorous thinking. It explores a unique range of topics each year - from the frontier of theoretical developments in many new and important areas, to research on current and applied economic problems, to methodologically innovative, theoretical and applied studies in econometrics.

The Econometrics Journal

Edited by KARIM ABADIR, STÉPHANE GRÉGOIR, SIEM JAN KOOPMAN, EKATERINI KYRIAZIDOU, QI LI, MARIUS OOMS, PIERRE PERRON, PRAVIN K. TRIVEDI & FRANK WINDMEIJER

THE ECONOMETRICS JOURNAL covers all aspects of econometrics: applied, methodological, computational, practical and theoretical. **THE JOURNAL** provides a focus for debate about alternative approaches and encourages reporting of new developments in the context of important applied problems. It invites sustained reviews of central topics by leading figures. All submissions are evaluated by peer review, without prejudice to topic or approach. Accepted papers and free access to datasets are available on the journal's internet site. **THE**

JOURNAL aims to publish papers quickly after acceptance, greatly reducing the long delays common in paper-only journals.

Mathematical Tools for Economics

DARRELL TURKINGTON

The University of Western Australia

This book is designed to demonstrate the essential mathematical concepts-comprehensively and economically-without re-teaching basic material or laboring over superfluous ideas. Utilizing clear exposition and dynamic pedagogical features, it locates the necessary information in a practical economic context and provides students with the analytical skills they need to better grasp their field of study.

An Introduction to Modern Bayesian Econometrics

TONY LANCASTER

Brown University

"Lancaster's text gives an impressive overview of the Bayesian point of view, and should prove a valuable resource to econometricians of all persuasions."

WERNER PLOBERGER, UNIVERSITY OF ROCHESTER

About two hundred and forty years ago, an English clergyman named Thomas Bayes developed a method to calculate the chances of uncertain events in the light of accumulating evidence. In this new and expanding area, Tony Lancaster's text provides a comprehensive introduction to the Bayesian way of doing applied economics. Using clear explanations and practical illustrations and problems, it presents innovative, computer-intensive ways for applied economists to use the Bayesian method. In addition, each chapter includes numerical and graphical examples and demonstrates their solutions using the S programming language and Bugs software.

The textbook is also supported by online supplements, including Data Sets and Solutions to Problems, at www.blackwellpublishing.com/lancaster

KEY TEXTBOOK

A Guide to Econometrics

Fifth Edition

PETER KENNEDY

Simon Fraser University

A GUIDE TO ECONOMETRICS provides an overview of the subject and an intuitive feel for its concepts and techniques without the notation and technical detail that characterize most econometrics textbooks.

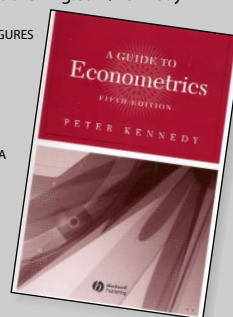

The fifth edition has two major additions; a chapter on panel data and an innovative chapter on applied econometrics. Existing chapters have been revised and updated extensively, particularly:

- ⑤ The specification chapter (to coordinate with the applied econometrics chapter)
- ⑤ The qualitative dependent variables chapter (to better explain the difference between multinomial and conditional logit)
- ⑤ The limited dependent variables chapter (to provide a better interpretation of Tobit estimation)
- ⑤ The time series chapter (to incorporate the vector autoregression discussion from the simultaneous equations chapter and to explain more fully estimation of vector error correction models).

Several new exercises have been added, some of which form new sections on bootstrapping and on applied econometrics.

Further resources for lecturers are available at www.blackwellpublishing.com/kennedy

JCMS: Journal of Common Market Studies

Incorporating The European Union: Annual Review

Edited by **JIM ROLLO & WILLIAM PATERSON**

JCMS: JOURNAL OF COMMON MARKET STUDIES is the leading publication in the field, publishing high quality, accessible articles on the latest EU issues. For more than 40 years it has been the forum for the development and evaluation of theoretical and empirical issues in the politics and economics of European integration. The **JOURNAL** is committed to deepening the theoretical understanding of the processes of integration and aims to achieve a disciplinary balance between political science and economics, including the various sub-disciplines such as monetary economics, fiscal policy, political economy, public policy studies, public administration and international relations. Each year the *European Union: Annual Review* gives a comprehensive review of the activities of the European Union in the previous year.

The Economics of Transition

Edited by **PHILIPPE AGHION & WENDY CARLIN**

Published for the European Bank for Reconstruction and Development, (EBRD) **THE ECONOMICS OF TRANSITION** publishes high quality, refereed articles on the economics of transition towards developed market systems. It includes innovative theoretical work, as well as econometric analyses of the process of economic reform. It also includes policy symposia and regular book reviews. In order to reflect the recent evolutionary changes in the study of transition, **THE ECONOMICS OF TRANSITION** has broadened its scope to include the analysis of the institutional features that produce (or may prevent) high and durable growth and welfare in the new market economies. The journal encourages submissions that address these issues theoretically and empirically and invites studies of Asian countries such as China and Vietnam, of middle income countries in Latin America and of other emerging market economies.

NEW IN 2005

The Russian Economy

STEVEN ROSEFIELDE

University of North Carolina at Chapel Hill

The epic tale of the Soviet Union's quest to construct a socialist economy was, until recently, the principal motif of textbooks on the Russian economy. Traditional Soviet and post-Soviet books usually adopt an historical approach, exploiting the dichotomies between socialism and capitalism as a convenient device for highlighting the differences in Soviet and western arrangements. These conventions remain useful, but require refurbishing.

Rosefielde's new text offers a more sober recounting of the Bolshevik saga, stripped bare of socialist romanticism, focused equally on the micro- and macroeconomics of administrative command planning, and Russia's post-Communist market system. Understanding the Soviet economic system and the causes of its failure are central to any student's study of Russia's struggle towards a market economy and its prospects for the future.

Comparative Economic Systems

Culture, Wealth and Power in the 21st Century

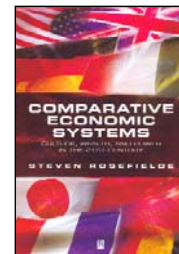

STEVEN ROSEFELDE

University of North Carolina at Chapel Hill

"This is an ambitious and innovative work that rigorously and successfully addresses a question that economists often and mistakenly ignore: namely, how do ethics, culture, and politics affect the operation of core economic principles and the relative performance of the major economic systems in the global economy?"

CHARLES WOLF, RAND

304 PAGES / 46 FIGURES / 0-631-22961-2 HB / 0-631-22962-0 PB / 2002

International Macroeconomics and Finance

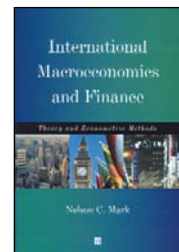

Theory and Econometric Methods

NELSON C. MARK

University of Notre Dame

This short, concrete, and to-the-point book guides students through this vast field of conflicting opinions. The book begins with the premise that students benefit most from seeing a balanced treatment of all available views, and by giving consideration to each 'mini debate', the book shows how each approach has its good and bad points.

296 PAGES / 0-631-22288-X PB / 2001

China's Economic Transformation

GREGORY C. CHOW

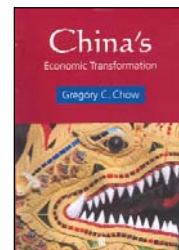

Princeton University

"Gregory Chow has parlayed his knowledge of Chinese history, culture, economic development, together with his expertise in modern econometric methods into an assessment of China's economic progress since 1980 and into this new century. His book provides an authoritative interpretation of a strategic world area about which outsiders know too little, yet need to know much more."

LAWRENCE KLEIN, UNIVERSITY OF PENNSYLVANIA

Combining historical-institutional and theoretical-quantitative approaches, this book provides a penetrating and comprehensive analysis of the factors which have contributed to China's transformation process, and forecasts an economic future with imperative worldwide implications.

Integration in an Expanding European Union

Reassessing the Fundamentals

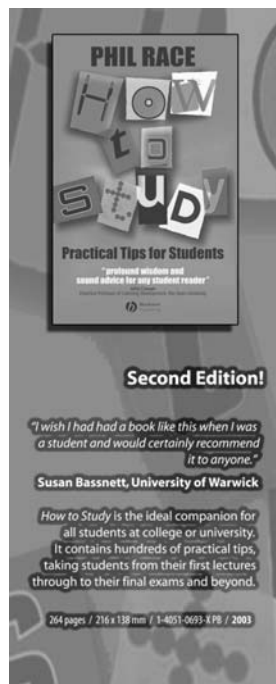

Edited by JOSEPH H.H. WEILER,
IAIN BEGG & JOHN PETERSON

New York University; London School of Economics; University of Glasgow

This volume brings together a world-class group of scholars and practitioners to examine the fundamentals of integration in an expanding EU. They explore key questions about the nature of the EU, its structure and procedures, but also take a more profound look at the social, political and economic dimensions of integration and their relevance for a revitalised European Union.

International Trade, Growth, and Development

Essays by Pranab Bardhan

PRANAB BARDHAN
University of California at Berkeley

"Pranab Bardhan is a master of small, clear, and pointed economic models. He is also a virtuoso at making them speak to important questions of economic development. The last third of this book reveals yet another Bardhan: the patient digger after the ways in which social institutions and economic law combine to activate village economies in rural India. There is something to learn about economic development on every page."

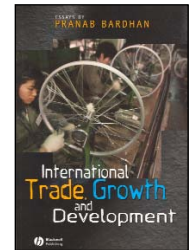

ROBERT SOLOW, NOBEL LAUREATE, MIT

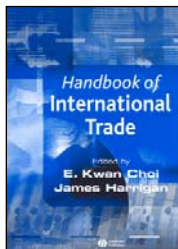

"Pranab Bardhan is one of the most influential development economists of his generation. His approach, which emphasises the interplay of economic and social institutions in shaping resource allocation, now permeates mainstream thinking about how economies work. These essays provide key insights into the economics of growth, trade, and factor markets and will be of interest to a wide range of scholars interested in the processes of economic development."

TIMOTHY BESLEY, LONDON SCHOOL OF ECONOMICS

This collection of essays draws from over 30 years of work by noted economist Pranab Bardhan to address the interrelated themes of international trade, growth, and rural development. Covering a wide range of important issues within the field, the essays describe theoretical and empirical perspectives on economic agents both at the micro and macro levels of the economy in development. Additionally, introductions to each of the book's three sections place the articles in perspective and relate them to current research.

NEW

Handbook of International Trade, Volume I

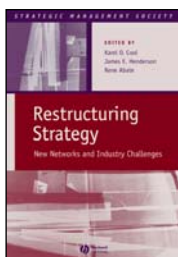

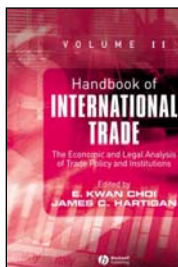

Edited by E. KWAN CHOI & JAMES HARRIGAN

Iowa State University; Federal Reserve Bank of New York

This **HANDBOOK** is a detailed exploration of the theories, policies, and issues stemming from the field of international trade. Written by specialists in the field, the chapters focus on four important areas: factor proportions theory, trade policy, investment, and new trade theory. The extensive analysis covers such topics as the Heckscher-Ohlin Trade Model and the Stolper-Samuelson Price Link, as well as wages, antidumping, and political economics.

Handbook of International Trade, Volume II

Economic and Legal Analyses of Trade Policy and Institutions

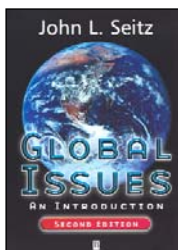

Edited by E. KWAN CHOI & JAMES C. HARTIGAN

Iowa State University; University of Oklahoma

This second volume of the **HANDBOOK OF INTERNATIONAL TRADE** focuses on the economic and legal analysis of international laws and institutions as they impact trade. Containing chapters written by both economic and legal scholars, this volume encourages cross-discipline discussion with writing that is accessible to those approaching the material from any background. Central issues to those studying international trade are addressed, including labor, environmental rights, and preferential trade agreements; antitrust policy; patent rights; trade liberalization; and foreign direct investment.

Antipode

A Radical Journal of Geography

Edited by **JAMIE PECK & NOEL CASTREE**

For more than 30 years **ANTIPODE** has published dissenting scholarship that explores and utilizes key geographical ideas like space, scale, place and landscape. It aims to challenge dominant and orthodox views of the world through debate, scholarship and politically committed research, creating new spaces and envisioning new futures. **ANTIPODE** welcomes the infusion of new ideas and the shaking up of old positions, without being committed to just one view of radical analysis or politics.

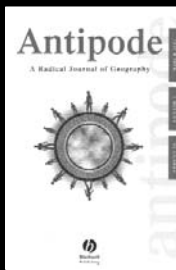

- ⊙ Essential reading for critical social scientists
- ⊙ Publishes cutting-edge radical theory and research
- ⊙ The only left-wing journal dedicated to exploring the geographical constitution of power and resistance
- ⊙ Explores how space, place, scale and landscape both shape and are shaped by unequal social relations.

Political Economy

DAN USHER

Queen's University, Ontario, Canada

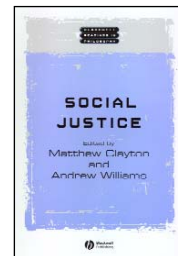

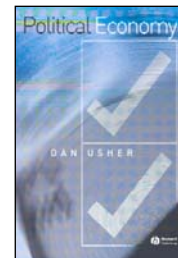

"The field of political economy has made a full comeback into the center of economic analysis. Dan Usher's very readable text demonstrates the power of political economy analysis to address questions in welfare economics, political behavior, public administration, and legal arrangements... Usher's text is a welcome addition to literature in modern political economy."

PETER J. BOETTKE,
GEORGE MASON UNIVERSITY

This thought-provoking introduction to economics exposes readers to the workings of the market in a democratic state. The text explains basic economic concepts from a political perspective: how the price mechanism substitutes for central authority in determining production and allocation of goods; the use of demand and supply curves to trace the impacts of tariffs, taxes, subsidies, quotas, and patents; and the redistribution of income.

Assuming no prior background in economics or calculus, the text relies largely on simple stories and paradigms to convey important economic concepts, preparing the student for more advanced courses and applying the lessons of economics for the citizen in a modern democratic society.

Economic Affairs

Edited by PHILIP BOOTH

ECONOMIC AFFAIRS is a journal for those interested in the application of economic principles to practical affairs. It aims to stimulate debate on economic and social problems by asking its authors, while analysing complex issues, to make their analysis and conclusions accessible to a wide audience. Each issue has a theme on which the main articles focus, providing a succinct and up-to-date review of a particular field of applied economics. Each issue of **ECONOMIC AFFAIRS** includes regular columnists: Tim Congdon (City news), James Tooley (education), Roger Bate (environmental issues), John Meadowcroft (the economics of government).

Taxation under the early Tudors 1485-1547

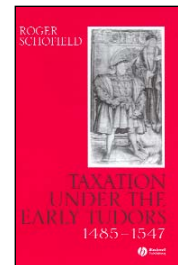

ROGER SCHOFIELD
Cambridge University

If taxation is the mobilization of economic resources for political ends, it is evident that any study of taxation must probe well beyond the administrative technicalities of its subject. Social, economic, political and administrative history are all part of the investigation.

This new study examines the taxes granted by Parliament to the Crown between 1485 and 1547. Under Henry VIII, taxation based on the direct assessment of each individual was revived, having been abandoned as unworkable in the fourteenth century. In the long run, the Tudor experiment failed: direct assessment was abandoned again after decades of complaint about evasion and under-assessment in the mid-seventeenth century, and was not restored until the end of the eighteenth. But examination of the experiment, and of the timing and causes of its failure, throws light on the changing political limits of the Tudor state.

Schofield's research marks an important advance in our understanding not only of the fiscal resources available to the English crown but also of the broader political culture of early Tudor England.

A Companion to the History of Economic Thought

Edited by WARREN J. SAMUELS, JEFF E. BIDDLE & JOHN B. DAVIS

Michigan State University; Michigan State University; Marquette University

Assembling contributions from top thinkers in the field, this **COMPANION** offers a comprehensive and sophisticated exploration of the history of economic thought. The volume has a threefold focus: the history of economic thought, the history of economics as a discipline, and the historiography of economic thought. The essays in the first section focus on the history of economic ideas, with topics ranging from ancient, medieval and Islamic thought, to Marxian, Utopian and post-war thought. The second section explores important historiographical topics, including the sociology of economics, methodology, exegesis, and textuality.

Each chapter serves as a complex introduction to the chosen topic and, gathered together, they provide an extensive synthesis of the field as a whole. The volume is an essential resource for anyone researching or studying the history of economic thought, and will also serve as an excellent text for courses in this area.

KEY TEXTBOOK

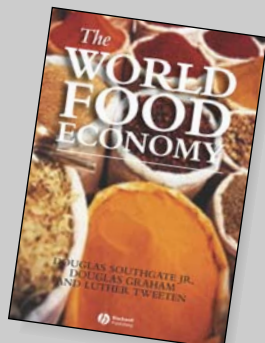

The World Food Economy

**DOUGLAS SOUTHGATE, JR.,
DOUGLAS GRAHAM &
LUTHER TWEETEN**

All Ohio State University

The questions of population growth and food supply have long been of central concern to economists. **THE WORLD FOOD ECONOMY** seeks to examine the lessons of the past for wealthy nations, where agricultural output has steadily risen for decades, as well as for developing nations where the advances of the 'Green Revolution' in the 1960s have introduced new problems in addition to solutions. This text assesses the challenge of satisfying food demand during the twenty-first century as consumers and producers in every part of the world - rich and poor alike - feel the effects of expanded global commodity trade, food aide, and national legislation in response to globalization.

Community Economics

Linking Theory and Practice
Second Edition

**RON SHAFFER, STEVE DELLER &
DAVID MARCOUILLER**

All University of Wisconsin-Madison

The first edition of Shaffer's *Community Economics: Economic Structure and Change in Smaller Communities* provided readers with a comprehensive understanding of the many non-farm economic activities in rural America. In this complete revision of that classic edition, authors Deller and Marcouiller join Shaffer to review the economics of smaller communities, with continued emphasis on what it takes to set and achieve community development goals. The text also demonstrates how local experts can be used to identify problems, form solutions, and maintain community support for long-term goals.

Food Policy Old and New

Edited by **SIMON MAXWELL &
RACHEL SLATER**

Both Overseas Development Institute

This book demonstrates the need for a new food policy to deal with the challenges to the global food system posed by globalization, urbanization, technical change and industrialization.

Comprising a series of papers written by experts from Denmark, Italy, the UK and the US, it points out that the food system is no longer about moving basic staples from farm to plate; nor is it concerned mainly with famine and food insecurity. Food policy, the contributors suggest, now needs to encompass issues such as obesity, food safety, and competition policy in the retail sector. The book concludes by warning that addressing these pressing concerns needs to be on the agenda of policy makers throughout the world.

International Trade and Agriculture

Theories and Practices

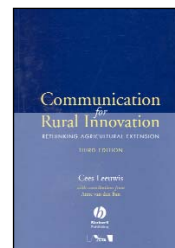

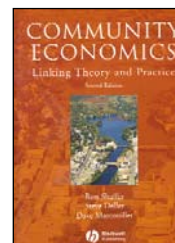

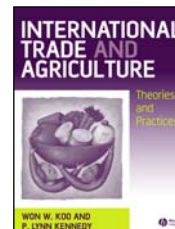

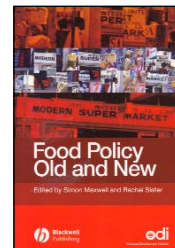

WON W. KOO & P. LYNN KENNEDY

North Dakota State University; Louisiana State University

In an increasingly globalized world, an understanding of the role of international trade is central to the study of agricultural economics and agribusiness. This text interweaves these two elements, explaining the theories and practices relevant to agricultural trade. Using real-life examples to explain theories and models, the text prepares readers to critically examine agricultural trade issues.

Starting with the basic economics of trade, the text covers agricultural policies affecting trade flows, macroeconomic issues such as exchange rates and the balance of trade, and other important issues including foreign direct investment and the environment. Each chapter features overviews and summaries, key concepts, questions for review, and suggested readings. With its international focus, agricultural perspective, and engaging pedagogy, this text offers an innovative and accessible approach to the study of agricultural trade.

Agricultural Economics

Edited by STEPHAN VON
CRAMON-TAUBADEL

AGRICULTURAL ECONOMICS is a highly-ranked journal in its field and a forum for high-level, international research. The journal publishes articles covering the range of work done on agricultural economics, divided into three categories: disciplinary work, multi-disciplinary subject matter areas, and problem solving. All of these may require knowledge of values, non-monetary as well as monetary. Work in each of these three categories may deal with teaching, extension and out-reach, consulting, advising, entrepreneurship and administration, as well as research.

The Economics of the Environment and Natural Resources

R. QUENTIN GRAFTON, WIKTOR ADAMOWICZ, DIANE DUPONT,
HARRY NELSON, ROBERT HILL & STEVEN RENZETTI

Australian National University; University of Alberta; Brock University; University of British Columbia, Vancouver;
University of New South Wales; Brock University

"This is an excellent text from some of the best practitioners in the field. It is very clearly written and provides a good coverage of the major topics essential to a course in environmental and resource economics."

IAN BATEMAN, UNIVERSITY OF EAST ANGLIA

"Rigorous but accessible, this book provides an excellent introduction to the literature on resource and environmental economics. For those interested in economics as the science of allocating scarce resources, this is an ideal starting point."

JOHN QUIGGIN, UNIVERSITY OF QUEENSLAND

THE ECONOMICS OF THE ENVIRONMENT AND NATURAL RESOURCES covers the essential topics students need to understand environmental and resource problems and their possible solutions. Its unique lecture format provides an in-depth exploration of discrete topics, ideal for upper-level undergraduate, graduate, or doctoral study.

The book's broad treatment of the field includes discussions of general theoretical approaches, particular natural resources, the theory and practice of environmental valuation, and larger-scale environmental issues. This book challenges the reader through its rigorous coverage of these topics, while also provoking further exploration.

Issues in Environmental Economics

Edited by **NICK HANLEY & COLIN J. ROBERTS**

University of Glasgow; University of Edinburgh

This volume comprises a series of specially commissioned papers centred around three key themes in the rapidly developing field of environmental and natural resource economics: the economics of pollution control, resource economics, and valuation.

Written by a cross-section of authors, ranging from well-established scholars to rising talent, the collection as a whole demonstrates that, while environmental and natural resource economics enters the twenty-first century in good form, there are still many challenges to be met. It should stimulate students, researchers and policy-makers to further discussion and action.

BUSINESS ETHICS AND THE NATURAL ENVIRONMENT

examines the present status of relations between corporate enterprise and the natural environment in the world today.

What obligations does the corporation bear to protect the natural environment, to respect entities that are not human and not protected by law, to be concerned with humans that will not exist for decades into the future, and to seek more environmentally friendly ways to do business? The author argues that the search for 'green' innovations in business practice yields dividends beyond expectation, and that the competitive firm in this century will be the firm whose practices protect and enhance the natural environment.

An excellent resource for students, this book provides a full background in ethics, an overview of business ethics, environmental legal issues and environmental philosophy, and an account of the problems associated with globalization and the response of Non-Governmental Organizations.

NEW

NEW COMPANION

A Companion to Urban Economics

Edited by **RICHARD ARNOTT & DANIEL MCMILLEN**

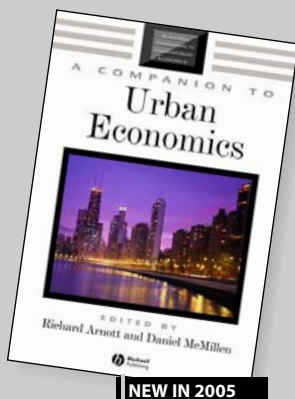

Boston College; University of Illinois at Chicago

Urban economics is a dynamic, constantly evolving subject, central to the study and practice of economics. **A COMPANION TO URBAN ECONOMICS** provides a state-of-the-art overview of this field, communicating the intellectual richness of the topic, while offering a comprehensive review of the academic literature. Including a diverse portfolio of authors and topics, this text produces a set of expert, conceptually interesting, and engagingly written papers that together demonstrate the spirit of modern urban economics.

NEW

Catalysing Development? A Debate on Aid

JAN P. PRONK ET AL

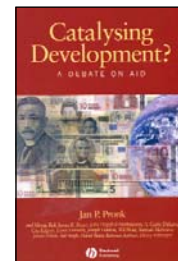

Former Minister for Development Co-operation of the Netherlands

In this volume, a select group of experts puts development aid under the microscope. Examining its history, its rationale, and its effectiveness, they reach some challenging conclusions as to the part aid plays in catalysing, or indeed stifling, development. While some argue that aid remains vital, and must be maintained or increased, others are more sceptical, and fear that it may even prolong underdevelopment in certain circumstances.

State Failure, Collapse & Reconstruction

Edited by **JENNIFER MILLIKEN**

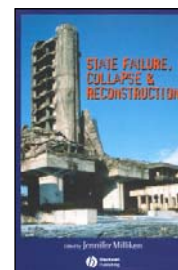

Graduate Institute of International Studies, Geneva

State collapse in such places as Afghanistan, Somalia, and Yugoslavia has led to widespread human suffering, regional instability, and transnational threats of organised crime and international terrorism. This collection situates state failure and collapse against the backdrop of the emergence, consolidation, expansion, and erosion of the Western state system. The contributors examine why and how states collapse through case studies of countries including Nigeria, Georgia, and Afghanistan, and through analyses of warlordism, conflict goods, and small arms and light weapons proliferation. Humanitarian and post-conflict reconstruction efforts in such places as East Timor, Cambodia, Somalia and Bosnia are also analysed and critiqued.

Population and Development Review

Edited by PAUL DEMENY

POPULATION AND DEVELOPMENT REVIEW is essential reading to keep abreast of population studies, research on the interrelationships between population and socioeconomic change, and related thinking on public policy. Its interests span both developed and developing countries, theoretical advances as well as empirical analyses and case studies, a broad range of disciplinary approaches, and concern with historical as well as present-day problems.

SAMPLE CONTENTS

- ⊙ Population Aging and the Rising Cost of Public Pensions
John Bongaarts
- ⊙ Hidden in Plain Sight: Global Labor Force Exchange in the Chinese American Population, 1880-1940
Kenneth S. Y. Chew and John M. Liu
- ⊙ The Media Marketplace for Garbled Demography

Africa Confidential

Edited by PATRICK SMITH

AFRICA CONFIDENTIAL is an essential guide to understanding the latest developments in Africa and the forces that shape them. For the last 44 years, **AFRICA CONFIDENTIAL** has established an unrivalled reputation for its inside knowledge of African politics and economics. It doesn't kowtow to sectional interests and prides itself on its accuracy and objectivity in reporting developments in the region. Among its readers are Africans who have shaped the world: Nelson Mandela and Kofi Annan.

Africa Research Bulletin: Economic, Financial and Technical Series

Edited by PITA ADAMS

AFRICA RESEARCH BULLETIN is the leading bulletin service on Africa, appearing in two series - *Economic, Financial and Technical* and *Political, Social and Cultural* - available separately or in a combined subscription.

The coverage of the *Economic, Financial and Technical* series includes: continental developments, policy and practice, communications and transport, commodities, industries and economic aid, with countries and regional entities listed alphabetically within each of these main sections. All sources are acknowledged and each issue is comprehensively indexed.

Fact and comment is drawn from a large range of local press, radio and on-line sources, and when complemented with information from international organizations, the world press, news agencies and the World Wide Web, provides an indispensable source of key summaries and extensive reports.

Used together, the *Economic* and *Political Bulletins* give readers an in-depth understanding of Africa since 1964.

Development Policy Review

Edited by DAVID BOOTH

DEVELOPMENT POLICY REVIEW is the refereed journal that makes the crucial links between research and policy in international development. Edited by staff of the Overseas Development Institute, the London-based think-tank on international development and humanitarian issues, it publishes single articles and themed issues on topics at the forefront of current development policy debate.

Coverage includes the latest thinking and research on poverty-reduction strategies, inequality and social exclusion, property rights and sustainable livelihoods, globalization in trade and finance, and the reform of global governance. Informed, rigorous, multi-disciplinary and up-to-the-minute, **DPR** is an indispensable tool for development researchers and practitioners alike.

SAMPLE CONTENTS

- ⊗ *Edoardo Gaffeo* on the economics of HIV/AIDS
- ⊗ *Sarah Lister and Warren Nyamugasira* on aid architecture and the role of civil society organisations in Uganda
- ⊗ *Brian Cooksey* on the rise and fall of agricultural liberalisation in Tanzania
- ⊗ *J. Ram Pillarisetti* on the kind of tax systems low-income countries need
- ⊗ *Andrew Dorward, Jonathan Kydd et al.* on missing links in livelihoods analysis

Review of Development Economics

An Essential Resource for any Development Economist

Edited by E. KWAN CHOI

The **REVIEW OF DEVELOPMENT ECONOMICS** is a leading journal publishing high quality research in development economics. It publishes rigorous analytical papers, theoretical and empirical, which deal with contemporary growth problems of developing countries, including the transition economies. The **REVIEW** not only serves as a link between theorists and practitioners, but also builds a bridge between development economists and their colleagues in related fields. While the level of the **REVIEW OF DEVELOPMENT ECONOMICS** is academic, the materials presented are of value to policy makers and researchers, especially those in developing countries.

Oil and Energy Trends

A Monthly Publication of International Energy Statistics and Analysis

Edited by MARK HESTER

Newly-available online via *Synergy* in 2005, **OIL AND ENERGY TRENDS** is the world's most comprehensive monthly source of energy information. Each issue gives up-to-date information for all major energy statistics, presented in a consistent format from a wide and constantly reviewed range of sources.

2004 saw the introduction of a new online supplement, *World Energy Review*, available exclusively to **OET** subscribers. Recent reports have included:

- ☉ The USA and the Quest for Energy Security
- ☉ OPEC Crude Oil Production Capacity to 2010
- ☉ Central Asia and the Trans-Caucasus

Visit the website to access *World Energy Review* and the **OET** database.

The **OIL AND ENERGY TRENDS** database holds information from almost every country and all regions around the world, including smaller countries in the Developing World as well as larger producers in OPEC and consumers in the OECD.

Statistical tables are also supplied to all subscribers on disk for direct entry into spreadsheets.

The Blackwell Encyclopedia of Management

Second Edition

Edited by **CARY L. COOPER, CHRIS ARGYRIS & WILLIAM STARBUCK**

University of Lancaster; Graduate School of Business Administration, Harvard University; New York University

Bringing together specially-commissioned and carefully edited entries from an international team of the world's best scholars and teachers, the new edition of this major reference work is divided into twelve individual subject volumes and an index. All of the volumes provide clear, concise, expert definitions and explanations of the key concepts in each area. With entries ranging from extended explorations of major topics, to short definitions of key terms, each dictionary volume has been carefully designed to give both the expert and the newcomer a multi-level guide and reference source to the subject.

Visit www.managementencyclopedia.com for detailed volume information, contributor listings, and sample content from the new edition.

The Journal of Finance

Edited by ROBERT F. STAMBAUGH

THE JOURNAL OF FINANCE publishes leading research across all the major fields of financial research. It is the most widely cited academic journal on finance and one of the most widely cited journals in all of economics as well. Each issue of the journal reaches over 8,000 academics, finance professionals, libraries, government and financial institutions around the world. Published six times a year, the journal is the official publication of The American Finance Association, the premier academic organization devoted to the study and promotion of knowledge about financial economics.

The American Finance Association (AFA) is the premiere academic organization devoted to the study and promotion of knowledge about financial economics. The purpose of the Association is to provide for the mutual association of persons with an interest in finance to improve public understanding of financial problems, and to provide for the exchange of financial ideas through the distribution of a periodical and other media; to encourage the study of finance in colleges and universities, and to conduct such other activities as may be appropriate for a non-profit, professional society in the field of finance.

The Future of Global Financial Services

ROBERT GROSSE

Thunderbird, The Garvin School of International Management

"Robert Grosse shows that, despite the Internet, most financial services are still delivered locally; indeed the world's largest international financial institutions (such as Allianz and Merrill Lynch) are leaders in their home markets but are not true global leaders. He also shows that, in retail banking, the performance of commercial banks is strongly determined by the growth of their home markets."

ALAN RUGMAN, INDIANA UNIVERSITY

After living through the stock market crises of 1987 and 2001-2, many people wonder just how safe the financial system is, and what kinds of financial instruments they should trust their savings to. This book explores the future of the financial services industry, giving readers an idea of the kinds of institutions and services that will survive in the early twenty-first century.

The book focuses on the changes that we will face in the near future, such as greater use of the Internet for banking transactions and the increasing globalization of financial services. It considers changing conditions in key financial centres around the world, especially in the US, the UK, Germany, Japan and Switzerland; and it points to the probable disappearance of the insurance sector as a separate industry. The book describes the strategies of major financial services firms, and discusses the likelihood that various strategies will be viable in the future.

The author's informative and, at times, provocative assertions will be of interest to anyone who wants to understand how the financial services sector is developing.

Continuous-time Finance

ROBERT C. MERTON

Harvard University

"The thoughtful way in which the book is organized, the connective sections, and the fullness of this remarkable scholar's accomplishments, succeed in making this collection into a watershed event in finance. It is a testament to how much of modern finance he has formulated, advanced, and, in a meaningful sense, brought to a satisfactory completeness. Modern finance has much to do, but it can do no better than to add to what Merton has already done, and I recommend this book to all who wish to learn what finance has been up to for the past two decades."

JOURNAL OF FINANCE

Robert C. Merton's widely-used text provides an overview and synthesis of finance theory from the perspective of continuous-time analysis. It covers individual financial choice, corporate finance, financial intermediation, capital markets, and selected topics on the interface between private and public finance. For this revised edition a new section on managing university endowments has been added. The book begins with a foreword by Paul Samuelson.

JOURNALS

The only journal bridging the gap between theory and policy in macroeconomics and microfinance

International Finance

Edited by **DR. BENN STEIL**

"International Finance is one of the most interesting new journals to come on the scene in a very long time. The papers published merit attention and deserve to be taken seriously."

BENJAMIN M. FRIEDMAN, HARVARD UNIVERSITY

INTERNATIONAL FINANCE features the best analysis on today's complex market and policy issues presented in a literate and engaging style. **IF** is not just another journal, it is intended as a vigorous intellectual forum for scholars who believe that it is necessary to be relevant as well as original, to influence policy as well as to publish research. The approach is aimed at ensuring that **IF** is consistently relevant, challenging and thought provoking.

World Banking Abstracts

The International Journal of the Financial Services Industry

Edited by **E.P.M. GARDENER**
& **PHILIP MOLYNEUX**

WORLD BANKING ABSTRACTS (WBA) is an invaluable reference source providing immediate access to all the important articles published internationally in over 400 banking and finance publications. Each issue of the journal contains concise, 75-word abstracts of published information in all areas of finance, classified by subject and fully indexed. The abstracts are drawn from journals, magazines, and hard-to-find research reports such as those from the US Federal Reserve Banks, the EC research institutes and universities throughout the world.

Abstracts are sorted into easily searchable sub-categories:

- ⊙ Financial Institutions
- ⊙ Financial Instruments and Markets
- ⊙ Financial Operations and Services
- ⊙ Management, Accounting and Technology
- ⊙ Policy, Law and Regulation
- ⊙ International and National Economics
- ⊙ Principles and Methods

WORLD BANKING ABSTRACTS is now available online as a fully searchable database.

The Economics and Finance of Uncertainty

GABRIELLE DEMANGE & GUY LAROQUE
DELTA, Paris; INSEE-CREST, Malakoff, France

This book explores the growing range of economic decisions that are conducted under uncertainty both on the personal level—with individual savings, insurance, portfolio choices—as well as by large firms including insurance companies, stock exchanges, and futures and derivatives assets that utilize financial tools to facilitate the exchange of risks.

Presenting the basic principles and discussing them in a unified framework within elementary models, **THE ECONOMICS AND FINANCE OF UNCERTAINTY** analyzes the allocation of risk in the context of the current literature, and emphasizes the role of information in decisions and prices. Including end-of-chapter exercises, this book provides students with a tool for understanding the theoretical analysis of decision-making under uncertainty, and its applications to the world of economics and finance.

Risk Analysis

An International Journal

Edited by ELIZABETH L. ANDERSON

Published for the Society for Risk Analysis, RISK ANALYSIS traces the evolution of risk-based thought and its application to the world around us. Ranked among the top ten journals in the ISI Journal Citation Reports under the social sciences, mathematical methods category, it is designed to meet the need for organization, integration, and communication, and provide a focal point for new developments in the field. The analysis of risk is being increasingly viewed as a field in itself, and the demand for a more orderly and formal treatment of risk is great. This international journal is committed to publishing critical empirical research, conference proceedings, and commentaries dealing with risk issues.

Understanding Market, Credit, and Operational Risk

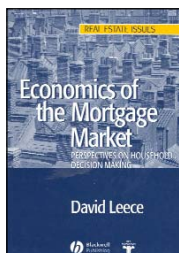

The Value at Risk Approach

LINDA ALLEN, JACOB BOUDOUKH & ANTHONY SAUNDERS

City University of New York; New York University; New York University

"This book is a clear explanation of the science and art of the Value at Risk approach to risk measurement. There is no better explication of both the theory underlying the approach and its practical implementation. It is an invaluable tool to anyone involved in any type of risk management."

MARK ZANDI, ECONOMY.COM

A step-by-step, real-world guide to the use of Value at Risk (VaR) models, this text applies the VaR approach to the measurement of market risk, credit risk, and operational risk. The book describes and critiques proprietary models, illustrating them with practical examples drawn from actual case studies. Explaining the logic behind the economics and statistics, this technically sophisticated yet intuitive text should be an essential resource for all readers operating in a world of risk.

Featuring comprehensive coverage of the BIS bank capital requirements, and including the latest proposals for the New Capital Accord, the book describes the newest application of VaR techniques to operational risk measurement. The text examines the promise and the pitfalls of these risk measurement models, and makes recommendations for future research into this important area.

Economics of the Mortgage Market

Perspectives on Household Decision Making

DAVID LEECE

Keele University

The analysis of the mortgage market is a specialised field, yet it examines a financial market with extremely wide-ranging implications; it affects the stability of the whole economy.

The 1990s saw an enormous growth of mortgage market analysis as an academic subject and there is a vast literature scattered among the key real estate journals. There is now a great need to not only bring this very complex subject area together, but also to abstract the main issues and to render them intelligible. This book provides an organised research resource and also informs and motivates further research into the microeconomics of mortgage markets.

NEW EDITION

Global Corporate Finance

Sixth Edition

SUK KIM & SEUNG H. KIM

University of Detroit-Mercy; St Louis University

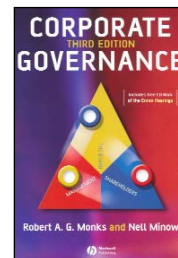

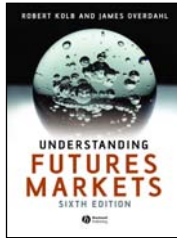

GLOBAL CORPORATE FINANCE provides students with the practical skills needed to understand global financial problems and techniques. The sixth edition of this comprehensive text retains the user-friendly aspects of previous editions while offering expanded material on corporate finance and governance, international markets, global financial dynamics and strategies, and risk management techniques.

Each chapter begins with a real-world case study to be explained by theories and research findings presented throughout the chapter. End-of-chapter mini-cases further reinforce students' understanding of the material covered.

Improved supplemental materials including a Student's Study Guide on CD-ROM as well as a website containing the Instructor's Manual, additional exercises, an expanded Test Bank, and PowerPoint slides, combine to make **GLOBAL CORPORATE FINANCE** a lasting and indispensable text for undergraduate and graduate students. Security Analysis and Investment Strategy

GEOFFREY POITRAS

Simon Fraser University

This innovative text presents the theoretical foundations of security analysis and investment strategy, and explores the practical applications of these theories. After establishing an historical foundation, the book examines fixed income securities, equity analysis and investment strategy. Developing an advanced treatment of the subject throughout, the text remains focused on the practical concerns of security analysts.

Guided by the insight that philosophical differences exist among the various approaches to investment analysis and strategy, the text assesses a range of approaches to security analysis. Numerous case studies, end-of-chapter questions and references are featured in the text, making it accessible and engaging. Integrating history, theory, technique, and application, this book should be required reading for every serious student of finance.

Online material to accompany this book can be found at www.blackwellpublishing.com/poitras

624 PAGES / 1-4051-1248-4 HB / SEPTEMBER 2004

KEY TEXTBOOK

Futures, Options, and Swaps

Fourth Edition

ROBERT W. KOLB

University of Colorado at Boulder

"Bob Kolb's Futures, Options, and Swaps is the best college textbook I have ever reviewed in my 25-year teaching career. In my opinion, every finance professor and practitioner should have a copy because it breaks new ground on several fronts. This book is self-contained and combines theory with practice. It is solidly grounded in modern derivative theory and yet has strong ties to the real world of financial derivatives."

SUK H. KIM, UNIVERSITY OF DETROIT, MERCY

"This edition, with its outstanding balance of theory and application along with its thorough coverage of relevant institutional arrangements, provides students at all levels with an excellent understanding of these markets. The accompanying OPTION! software is a powerful teaching aide for the pricing of various option and swaps products."

GERRY GAY, GEORGIA STATE UNIVERSITY

Written in a clear, conversational style, this fourth edition of the classic **FUTURES, OPTIONS, AND SWAPS** provides the most comprehensive coverage of derivatives currently available. This book is renowned for providing an excellent balance between introductory and advanced topics.

This new edition includes many new applications exercises at the end of each chapter. An enhanced and updated version of OPTION! - the IBM PC-compatible program that can compute virtually every option and swap value discussed in this book - is included with the text. The software is also downloadable from the **FUTURES, OPTIONS, AND SWAPS** website, www.blackwellpublishing.com/kolb.

The fourth edition has been extensively updated and reflects the evolution away from the 'Chicago'-style markets that has happened in recent years. Chapters on futures markets, interest rate futures, and stock index futures have also been significantly revised.

Bonds and Bond Derivatives

Second Edition

MILES LIVINGSTON

University of Florida

This book provides an introduction to bond markets and bond derivatives for students as well as for executives in commercial businesses and financial institutions. While many topics about debt instruments involve mathematics, this text presents the essential elements in an intuitive manner. Containing material that is accessible and engaging to students and practitioners alike, the book is ideally suited for debt markets courses, and provides a good fit with any finance curriculum. For practitioners, the book can be readily used as a training manual and reference source for firms involved in debt markets.

This new edition includes: updated institutional material; new sections on callable bonds and the yield to call, convertible bonds, and methods for estimating and modern models of term structure of interest rates; as well as a comprehensive discussion of bonds in the European Economic Union. Additional end-of-chapter questions, PowerPoint slides, and an Instructor's Test Bank make this text and invaluable resource to students, scholars, and practitioners.

304 PAGES / 1-4051-1912-8 PB / DECEMBER 2004

Bond Evaluation, Selection, and Management

R. STAFFORD JOHNSON

Xavier University

BOND EVALUATION, SELECTION, AND MANAGEMENT synthesizes fundamental and advanced topics in the field, offering comprehensive coverage of bond and debt management. This text provides readers with the basics needed to understand advanced strategies, and explanations of cutting edge advanced topics. Focusing on concepts, models, and numerical examples, readers are provided with the tools they need to select, evaluate, and manage bonds.

The text covers a broad range of topics including: the characteristics of debt securities, the factors governing these securities and their markets, bonds with embedded options, asset-backed securities, and bond derivatives. Additionally, extensive review questions, web exercises, and practice problems reinforce important concepts. Taken together, this book provides readers with the solid foundation they need to understand the complexities of evaluating and selecting bonds and other fixed income securities.

Credit Derivatives

Applications, Pricing and Risk Management

GUNTER MEISSNER

Hawaii Pacific University

The market for credit derivatives — financial instruments designed to transfer credit risk from one party to another — has grown exponentially in recent years, with volume expected to reach more than \$4.8 trillion by 2004.

CREDIT DERIVATIVES is the first student-oriented text to explain this field to business students with a background in finance. Real-world examples are cited throughout, reinforced by end-of-chapter questions, and students can take advantage of links to pricing models on the Internet. This concise book is ideal for instructors seeking to supplement traditional derivatives course material, as well as those looking to enhance their own understanding of this fast-growing area.

240 PAGES / 1-4051-2676-0 HB / NOVEMBER 2004

Investing Online

BENTON E. GUP

University of Alabama

In a clear and concise form, this text explains the basics of investing online, highlighting what investors should know before, during, and after they invest. Written in an engaging style, it gives the reader instant access to information previously available only to investment professionals.

The text makes extensive use of online resources, providing a directory of websites at the end of the book, and referring the reader to relevant websites in the end-of-chapter questions. Additionally, 'Investor Insight' boxes use practical examples to illustrate key points for the reader.

Mutual Funds

Risk and Performance Analysis for Decision Making

JOHN A. HASLEM

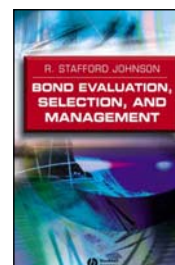

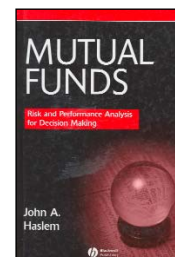

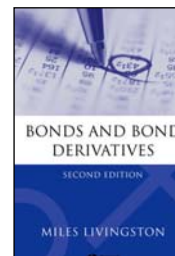

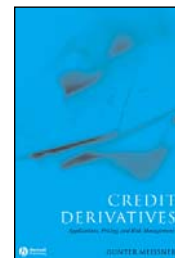

University of Maryland

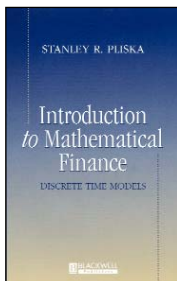

"This marvelous compendium of mutual fund information is an answer to the prayers of investors who want to dig beneath the superficial to reach the fundamental. Dr. Haslem's book is more than a textbook. It is perhaps the first substantive attempt to evaluate mutual funds from an academic and historic perspective. I commend it highly to the serious investor."

JOHN C. BOGLE, FOUNDER AND FORMER CEO, THE VANGUARD GROUP

This authoritative book enables readers to evaluate the various performance and risk attributes of mutual funds, while also serving as a comprehensive reference for students, academics, and general investors alike.

592 PAGES / 18 FIGURES / 0-631-21561-1 HB / JANUARY 2003

Introduction to Mathematical Finance

Discrete Time Models

STANLEY R. PLISKA

University of Illinois at Chicago

"I believe that this is an excellent text for undergraduate or MBA classes on mathematical finance. The bulk of the book describes a model with finitely many, discrete trading dates, and a finite sample space, thus it avoids the technical difficulties associated with continuous time models. The major strength of this book is its careful balance of mathematical rigor and intuition."

PETER LAKNER, NEW YORK UNIVERSITY

This book is designed to serve as a textbook for advanced undergraduate and beginning graduate students who seek a rigorous yet accessible introduction to the modern financial theory of security markets.

272 PAGES / 1-55786-945-6 HB / 1997

Quantitative Methods for Finance and Investments

JOHN L. TEALL & IFTEKHAR HASAN

Pace University; New Jersey Institute of Technology

This book ensures that readers come away with a reasonable degree of comfort and proficiency in applying elementary mathematics to several types of financial analysis. All of the methodology discussed is geared toward the development, implementation, and analysis of financial models to solve financial problems.

Mathematical Finance

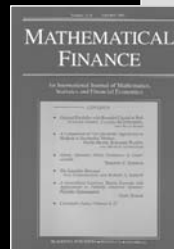

An International Journal of Mathematics, Statistics and Financial Economics

Edited by

ROBERT A. JARROW

MATHEMATICAL FINANCE is a high-quality journal which brings together work on the mathematical aspects of finance theory from such diverse fields as finance, economics, mathematics, and statistics. An essential resource for academic

finance researchers and practitioners alike, the journal publishes clear and concise articles, which present the latest theoretical developments in an accessible way.

SAMPLE CONTENTS

- ⊙ Equilibrium Pricing in the Presence of Cumulative Dividends Following a Diffusion
Knut K. Aase
- ⊙ A General Approach to Hedging Options: Applications to Barrier and Partial Barrier Options
Hans-Peter Bermin
- ⊙ American Options on Assets with Dividends near Expiry
J. D. Evans, R. Kuske and Joseph B. Keller

Accounting Ethics

RONALD F. DUSKA &
BRENDA SHAY DUSKA

The American College; Rosemont College

"The Duskas provide a basic primer on ethics for accounting that is helpful to accountants and non-accountants alike. They deftly weave the saga of Enron and Arthur Andersen through a practical and realistic presentation of accounting ethics."

THOMAS W. DUNFEE, THE WHARTON SCHOOL,
UNIVERSITY OF PENNSYLVANIA

"This book is a long awaited and significant contribution to business ethics. At last, a book that addresses the full range of accounting, tax, and audit issues, integrating the perspective of the accounting profession with that of a trained ethicist. This is a must-read for everyone in the accounting profession and in business ethics. Bravo Duskas!"

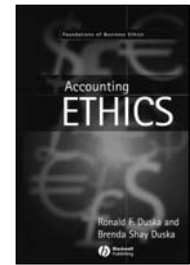

PATRICIA H. WERHANE, DARDEN GRADUATE
SCHOOL, UNIVERSITY OF VIRGINIA

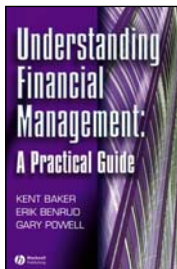

ACCOUNTING ETHICS uses real-life examples, including the Enron/Arthur Andersen debacle, to examine the ethical responsibilities of individual accountants as well as accounting firms.

It concludes with an investigation into the ethical responsibilities of accounting firms, and the pressures that militate against the fulfilling of those responsibilities.

Understanding Financial Management

A Practical Guide

KENT BAKER & GARY POWELL

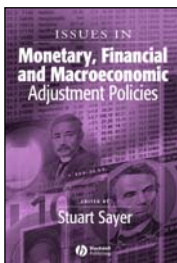

American University; Towson University

UNDERSTANDING FINANCIAL MANAGEMENT is designed for those who want to gain an understanding of the fundamental concepts and techniques used in financial management.

An underlying premise of the book is that the objective of the firm is to maximize value or wealth. Drawing on a wealth of experience in the academic and professional worlds, the authors discuss how firms can accomplish this objective by making appropriate investment and financing decisions.

Bridging the gap between financial theory and practice, the authors present fundamental concepts in an intuitive and nontechnical way, and provide numerous practical financial tips to readers. The focus is on current practice, using results from recent surveys to show the most popular techniques and approaches used by financial managers today.

Issues in Monetary, Financial and Macroeconomic Adjustment Policies

Edited by STUART SAYER

University of Edinburgh

This volume sheds light on crucial questions in the field of monetary, financial, and macroeconomic policy. Consisting of a series of surveys written by leading international economists, it addresses questions such as: What is the role of the financial sector in economic development? Is financial liberalization good for development? Why do financial crises occur and how can they be avoided? And do macroeconomic adjustment measures exacerbate poverty?

Textbook Resources

Many of our core economics and finance textbooks are supported by online lecturer resources via 'textsites' or on CD-ROM. Below, you will find a list of such key textbooks with details of where you can find the online ancillary materials. Typically, each website or link will contain a selection or all of the following components:

- ⊗ **Test bank of:**
 - ⊗ 1) Multiple choice questions (MCQs)
 - ⊗ 2) 'Fill in the blank' questions
 - ⊗ 3) Essay questions/answers
- ⊗ **Online glossary**
- ⊗ **Chapter summaries**
- ⊗ **Sample chapters**
- ⊗ **Feature articles by the authors**
- ⊗ **Periodic online updates of the textbook**
- ⊗ **'About the authors'**
- ⊗ **PowerPoint lecture presentations**
- ⊗ **PowerPoint figures**
- ⊗ **Course planning ideas**
- ⊗ **Links to other websites / useful web resources**
