- ✓ High-profiled international editorial board
- ✓ High ethical review standards including copyright registration

*Oral Diseases* is a multidisciplinary and international journal with a focus on head and neck disorders. This includes the basic sciences, well designed and controlled clinical research and analytical epidemiology. The essential requirement is that all research is hypothesis-driven. Equal emphasis will be placed on aetiology, pathogenesis, diagnosis, prevention and treatment. *Oral Diseases* provides a forum for addressing biological and clinical issues linked by this anatomical locale, thus bridging often isolated concerns of dentistry and medicine.
