

CHAPTER 19 Answers to Problems

Problem 19.1. See Section 19.1.1.

Problem 19.2. See Section 19.1.2.

Problem 19.3. $H_S = 0.12$.

Problem 19.6. This policy is not biologically sound because some genotypes may be more invasive than others of the same species. Allowing the import of additional strains that could be more invasive is unwise. In addition, increasing genetic variation through the import of additional individuals may increase the invasibility of a species.
