

Plate 8.1 *Our genes partly determine how aggressive we are, but so too does the social environment.*

Plate 8.2 *Do guns make us more likely to behave aggressively?*

Plate 8.3 *To what extent are footballers' levels of violence determined by their exercise-induced arousal?*

Plate 8.4 *Mothers' and children's levels of aggression are significantly correlated only for girls.*

Plate 8.5 *Are women really less aggressive than men?*

Plate 8.6 *Even moderate amounts of alcohol lead to increased aggressive behaviour.*

Plate 8.7 *Intimate partner violence is a serious problem across the world. Research looks at whether men and women are involved as perpetrators to the same or a different degree.*

Plate 8.8 *Bullying, either in schools or in the workplace, denotes aggressive behaviour directed at victims who cannot easily defend themselves.*
